A Pilot'S Story 2012-08-27

this is my story the story of a pilot who flew airplanes for some thirty seven years ten years in the united states air force primarily in jet fighters and then twenty seven years flying commercial jet airliners i was inspired to write this story after reading the autobiography a few years ago of gen chuck yeager he being the world renowned test pilot world war ii fighter ace and first man to break the sound barrier in the bell x 1 my story is the story of an average pilot an average guy who survived several close calls had many interesting experiences along the way and often wondered am i still here because i was especially good or because i was especially lucky i think the answer is definitely a combination of the two just as yeager says or implies in his book with him it may have been a larger contribution of skill but as he said the secret of my success is that i always managed to live to fly another day i have to echo that comment while flying around the country with american airlines during hours of complete boredom as we say we pilots often traded our war stories of our flying and other experiences i often thought that i had many tales that were similar to some of yeagers and that i should put my experiences down on paper even if it would only be my family who might read it so this then is my story my life primarily as it revolved around my aviating experiences over some thirty seven years from the viewpoint of a pilot who has no particular claim to fame but who has survived to fly another day one of the best descriptions of a flying career says you start out with a big bag of luck and an empty bag of experience you want to fill the bag of experience before you empty the bag of luck i guess i have done that

flying has been my dream since before i can remember literally my aunt odette tells me that when i was three years old she took me with her to the port au prince international airport to pick someone up and when i saw an airliner up close for the first time i excitedly yelled out i want to drive that i don t recall that event but it serves as evidence that my fascination with flying began at a remarkably young age my first memory of wanting to fly came a few years later at the age of seven i was on my very first flight from port au prince to new york city where i was going to start a new life in a new country i remember looking at all the people boarding the airplane and wondering how that big silver bird was going to get us into the air that silver bird was an american airlines boeing 727 to this day the whole experience is vivid in my mind being greeted with a smile by the captain at the aircraft entry door the funny feeling in my stomach as the plane accelerated down the runway leaping into the air and my utter disbelief that we didn t drop out of the sky i was mesmerized by it all and by the time the plane came to a stop at our gate my dream had been born i wanted to become an airline pilot i have been blessed to be living that dream since 1999 it s a dream from which i hope never to awaken this is the story of the lifelong journey i have taken in realizing that dream i invite you to come along with me as we go from my birth in haiti to the present day as i live my dream every day you will come with me as i move to america at the age of seven a country i knew nothing about and whose language i didn t speak a land that would truly prove to be the land of opportunity you will feel my sense of wonder and bewilderment growing up in new york city trying to understand my new world you will face my struggles to fit in with the kids in the housing project where my family lived for a decade as mom and dad saved money to buy a house you will meet my parents who encouraged my dream of flying and my fifth grade teacher who helped me to see that it was possible not only to dream it but also to achieve it it s a story of potential fulfilled and my family s sacrifices to get me through college and flight school you will fly with me from my first lesson to my first airline job as a copilot to the day i earned my four stripes and first heard someone call me captain you will sit with me in the captain s seat as i fly an airline jet over haiti for the first time looking down from thirty eight thousand feet onto the land of my birth where my dream had been born you will soar with me over the majestic amazon jungle in brazil over the desert flanked Nile river in egypt and the sparkling mediterranean sea you will fly with me through new york city blizzards indian monsoons and arabian sandstorms you will travel with me on adventures to europe south america the middle east south asia the caribbean and other parts of the world i used to dream of going to as a child places that have affected me profoundly and where i left a little part of myself i have seen all these things through the eyes of the seven year old boy from haiti that i was and in many ways still am the little boy who had a sense of just how incredible the world and life are who dreamt of a life of worldwide adventure and was blessed to have his dream come true that is the reason for the title of this book the seven year old pilot because even after years of flying around the world in many ways i still feel like that little boy and i always try to approach my travels and my life with his sense of gratitude amazement and awe i truly believe that every one of us has life experiences and lessons worth sharing that can inspire enlighten teach and benefit others because we have all liv
