what does it mean to be an illegal immigrant or the child of immigrants in this era of restrictive immigration laws in the united states as lawmakers and others struggle to respond to the changing landscape of immigration the effects of policies on people s daily lives are all too often overlooked in everyday illegal award winning author joanna dreby recounts the stories of children and parents in eighty one families to show what happens when a restrictive immigration system emphasizes deportation over legalization interweaving her own experiences dreby illustrates how bitter strains can arise in relationships when spouses have different legal status she introduces us to suddenly single mothers who struggle to place food on the table and pay rent after their husbands have been deported taking us into the homes and schools of children living in increasingly vulnerable circumstances she presents families that are divided internally with some children having legal status while their siblings are undocumented even children who are u s citizens regularly associate immigration with illegality with vivid ethnographic details and a striking narrative everyday illegal forces us to confront the devastating impacts of our immigration policies as seen through the eyes

of children and their families as legal status influences identity formation alters the division of power within families and affects the opportunities children have outside the home it becomes a growing source of inequality that ultimately touches us all

State of Insecurity 2003

this book examines the adaptation experiences of legal immigrants with undocumented spouses considering the structural limitations that they face in their private social and professional lives as well as in regard to their finances and health the first study to systematically analyze the ways in which legal immigrants are affected by federal and state policies that target their undocumented spouses it reveals that regardless of their immigration status all members of mixed status families are directly or indirectly subjected to the same intrusive and punitive laws based on an autoethnographic approach everyday fears of legal immigrants with undocumented spouses under u s immigration policy also draws on additional qualitative research as well empirical evidence from existing studies and the latest quantitative data from various governmental agencies and think tanks it thus integrates multiple approaches to ways of knowing and understanding the experiences of

legal immigrants in mixed status families and will therefore appeal to social scientists with interests in migration

everyday life as an immigrant in a deportation nation is fraught with risk but everywhere immigrants confront repression and dispossession they also manifest resistance in ways big and small immigrants under threat shifts the conversation from what has been done to mexican immigrants to what they do in response from private strategies of avoidance to public displays of protest immigrant resistance is animated by the massive demographic shifts that started in 1965 and an immigration enforcement regime whose unprecedented scope and intensity has made daily life increasingly perilous immigrants under threat focuses on the way the material needs of everyday life both enable and constrain participation in immigrant resistance movements

studies of immigration to the united states have traditionally focused on a few key states and urban centers but recent shifts in nonwhite settlement mean that these studies no longer paint the whole picture many latino newcomers are flocking to places like the southeast where typically few such immigrants have settled resulting in rapidly redrawn communities in this historic moment jennifer jones brings forth an ethnographic look at changing racial identities in one southern

city winston salem north carolina this city turns out to be a natural experiment in race relations having quickly shifted in the past few decades from a neatly black and white community to a triracial one jones tells the story of contemporary winston salem through the eyes of its new latino residents revealing untold narratives of inclusion exclusion and interracial alliances the browning of the new south reveals how one community s racial realignments mirror and anticipate the future of national politics

this book examines national debates on immigration asylum seekers and guest worker programs from 1970 to the present over the past 45 years contemporary immigration has had a profound impact throughout north america europe and australasia yet the admission of ethnically diverse immigrants was far from inevitable in the midst of significant social change policymakers grappled with fundamental questions what is the purpose of immigration in an age of mass mobility which immigrants should be selected and potentially become citizens and who should be excluded how should immigration be controlled in an era of

universal human rights and non discrimination stevens provides an in depth case study comparison of two settler societies australia and the united states while drawing parallels with europe canada and new zealand though contemporary immigration history that focuses on one national setting is well established this book is unique because it actively compares how a number of societies debated vexing immigration policy challenges the book also explores the ideas values and principles that underpin this contentious area of public policy and in doing so permits a broader understanding of contemporary immigration than outlining policies alone

some 16.6 million people nationwide live in mixed status families containing a combination of u s citizens residents and undocumented immigrants u s immigration governance has become an almost daily news headline yet even in the absence of federal immigration reform over the last twenty years existing policies and practices have already been profoundly impacting these family units based on ethnographic fieldwork in san diego over more than a decade border brokers documents the

reveals the impossible choices and downright terror mixed status families often face for their loved ones living in a mixed status immigrant family might mean that your grandmother could be deported at any moment your son could be arrested at work or your mother's deportation hearing is postponed again such uncertainty and fear are the reality of life for mixed status families those that include both undocumented immigrants and us citizens in contested americans cassandra rodriguez explores how members of mixed status families experience and articulate belonging in the united states the sixteen million people in the us who fall under this classification share the fear of a family member's possible deportation or the anxiety of leaving behind a child or elderly relative rodriguez highlights how different members of the same mixed status families mediate undocumented statuses while maintaining the collective whole of a family for many young adults this may mean negotiating the sponsorship of their immigrant parents and for the parents planning for the emotional physical and financial well being of their children in case of deportation contested americans is a timely book filled with vivid storytelling that shows how

immigration policies racism and privilege collide in the backdrop of the lives of millions of mixed status families

the term sanctuary city gained a new level of national recognition during the 2016 united states presidential election and immigration policies and debates have remained a top issue since the election of donald trump the battle over immigration and deportation will be waged on many fronts in the coming years but sanctuary cities municipalities that resist the national government s efforts to enforce immigration laws are likely to be on the front lines for the immediate future and social workers and others in the helping professions have vital roles to play in this book melvin delgado offers a compelling case for the centrality of sanctuary cities cause to the very mission and professional identity of social workers and others in the human services and mental health professions the text also presents a historical perspective on the rise of the sanctuary movements of the 1970s and 2000s thereby giving context to the current environment and immigration debate sanctuary cities communities and organizations serves as a helpful resource for human service practitioners academics and the general public

over the past twenty years elite colleges and universities enacted policies that reshaped the racial and class composition of their campuses and over the past decade latino college attendance notably increased while discussions on educational mobility often focus on its perceived benefits that it will ultimately lead to social and economic mobility less attention is paid to the process of making it and the challenges low income youth experience when navigating these elite spaces in meanings of mobility sociologist Leah C Schmalzbauer explores the experiences of low income latino youth attending highly selective elite colleges to better understand these experiences schmalzbauer draws on interviews with 60 low income latino youth who graduated or were set to graduate from Amherst College one of the most selective private colleges in the United States the vast majority of these students were the first in their immigrant families to go to college in the U.S. she finds that while most of the students believed attending Amherst provided them with previously unimaginable

opportunities adjusting to life on campus came with significant challenges many of the students schmalzbauer spoke with had difficulties adapting to the cultural norms at amherst as well as with relating to their non latino non low income peers the challenges these students faced were not limited to life on campus as they attempted to adapt to amherst many felt distanced from the family and friends they left behind who could not understand the new challenges they faced the students credit their elite education for access to extraordinary educational and employment opportunities however their experiences while in college and afterward reveal that the relationship between educational and social mobility is much more complicated and less secure than popular conversations about the american dream suggest many students found that their educational attainment was not enough to erase the core challenges of growing up in a marginalized immigrant family many were still poor faced racism and those who were undocumented or had undocumented family members still feared deportation schmalzbeauer suggests ways elite colleges can better support low income latino students and lower the emotional price of educational mobility including the creation of immigration offices on campus to provide programming and support for undocumented

students and their families she recommends educating staff to better understand the centrality of family for these students and the challenges they face as well as educating more privileged students about inequality and the life experiences of their marginalized peers meanings of mobility provides compelling insights into the difficulties faced by low income latinos pursuing educational and social mobility in america s elite institutions

aloha compadre latinxs in hawai'i is the first book to examine the collective history and contemporary experiences of the latinx population of hawai'i this study reveals that contrary to popular discourse latinx migration to hawai'i is not a recent event in the national memory of the united states for example the latinx population of hawai'i is often portrayed as recent arrivals and not as long term historical communities with a presence that precedes the formation of statehood itself historically speaking latinxs have been voyaging to the hawaiian islands for over one hundred and ninety years from the early 1830s to the present they continue to help shape hawai'i s history yet their contributions are often overlooked latinxs have been a part of the cultural landscape of hawai'i prior to annexation territorial status and statehood in 1959 aloha compadre also explores the expanding boundaries of latinx migration beyond the western hemisphere and into oceania

the perception of the immigrant as criminal or

in recent years crackdowns on immigrant labor and a shrinking job market in california arizona and texas have pushed latine immigrants to new destinations particularly places in the american south although many of these immigrants work in manufacturing or food processing plants a growing number belong to the professional middle class these professionals find that despite their privileged social class and regardless of their national origin many non latines assume that they are undocumented working class mexicans the stereotype of the typical latine in precarious privilege sociologist irene

browne focuses on how first generation middle class mexican and dominican immigrants in atlanta respond to this stigmatizing assumption browne finds that when asked to identify themselves by race these immigrants either reject racial identities entirely or draw on belief systems from mexico and the dominican republic that emphasize european indigenous mixed race identities when branded as typical latines in the u s mexican middle class immigrants emphasize their social class or explain that a typical latine can be middle class while dominicans simply indicate that they are not mexican rather than blame systemic racism both mexican and dominican middle class immigrants often attribute misperceptions of their identity to non latines ignorance or to individual latines lack of effort in trying to assimilate but these middle class latine immigrants do not simply seek to position themselves on par with the u s born white middle class instead they leverage their cosmopolitanism for example their multilingualism or their children s experiences traveling abroad to engage in what browne calls one up assimilation a strategy that aims to position them above the white middle class who are often monolingual and unaware of the world outside the united states middle class latines cosmopolitanism and valuing of diversity also lead them to have

cordial relations with african americans but these immigrants do not see themselves as sharing african americans status as oppressed minorities although the stereotype of the typical latine has made middle class latine immigrants susceptible to stigma they insist that this stigma does not play a significant role in their lives in many cases they view the stereotype as a minor issue feel that opportunities for upward mobility outweigh any negative experiences or downplay racism by emphasizing their class privilege browne observes that while downplaying racism may help middle class latine immigrants maintain their dignity it also perpetuates inequality by reinforcing the lower status of working class undocumented immigrants it is thus imperative browne argues to repeal harsh anti immigration policies a move that will not only ease the lives of the undocumented but also send a message about who belongs in the country offering a nuanced exploration of how race social class and immigration status intersect precarious privilege provides a complex portrait of middle class latine immigrants in the united states today

in fighting for dignity sarah s willen explores what happened when the israeli government launched an aggressive deportation campaign targeting newly arrived migrants from countries as varied as ghana and the philippines nigeria colombia and ukraine although the campaign was billed as a solution to high unemployment it had another goal as well to promote an exclusionary vision of israel as a jewish state in which non jews have no place the deportation campaign quickly devastated tel aviv s migrant communities and set the stage for even more aggressive antimigrant and antirefugee policies in the years to come fighting for dignity traces the roots of this deportation campaign in israeli history and the israeli palestinian conflict and shows how policies that illegalize and criminalize migrants wreak havoc in their lives endanger their health and curtail the human capacity to flourish children born to migrant parents are especially vulnerable to developmental and psychosocial risks drawing on nearly two decades of ethnographic engagement in homes and in churches medical offices advocacy organizations and public spaces willen shows how migrants struggle to craft meaningful flourishing lives despite the exclusions and vulnerabilities they endure to

complement their perspectives she introduces israeli activists who reject their government's exclusionary agenda and strive to build bridges across difference repair violations of migrants dignity and resist policies that violate their own moral convictions willen's vivid and unflinching ethnography challenges us to reconsider our understandings of global migration human rights the middle east and even dignity itself

over two million of the nation's eleven million undocumented immigrants have lived in the united states since childhood due to a broken immigration system they grow up to uncertain futures in lives in limbo roberto gonzales introduces us to two groups the college goers like ricardo whose good grades and strong network of community support propelled him into higher education only to land in a factory job a few years after graduation and the early exiters like gabriel who failed to make meaningful connections in high school and started navigating dead end jobs immigration checkpoints and a world narrowly circumscribed by legal limitations this ethnography asks why highly educated

undocumented youth ultimately share similar work and life outcomes with their less educated peers even as higher education is touted as the path to integration and success in america gonzales bookends his study with discussions of how the prospect of immigration reform especially the deferred action for childhood arrivals daca program could impact the lives of these young americans provided by publisher

they develop demonstrates how efforts to enforce national borders trigger countless resistances and shows how some environments provide the relational opportunities to nurture these small resistances into sustained mobilizations written to appeal to a broad audience of students scholars policy makers and activists without sacrificing theoretical rigor

the migration and settlement of 11 million unauthorized immigrants is among the leading political challenges facing the united states today the majority of unauthorized immigrants in the u s have been here for more than five years and are settling into american communities working forming families and serving in the military even though they may be detained and deported if they are discovered an open question remains as to what to do about unauthorized immigrants who are already living in the united states on one hand it is important that the government sends a message that future violations of immigration law will not be tolerated on the other sits a deeper ethical dilemma that is the focus of this book what do the state and

citizens owe to unauthorized immigrants who have served their adopted country earned citizenship argues that long term unauthorized immigrant residents should be able to earn legalization and a pathway to citizenship through service in their adopted communities their service would act as restitution for immigration law violations military service in particular would merit naturalization in countries with a strong citizen soldier tradition including the united states the book also considers the civic value of caregiving as a service to citizens and the country contending that family immigration policies should be expanded to recognize the importance of caregiving duties for dependents this argument is part of a broader project in political theory and public policy aimed at reconciling civic republicanism with a feminist ethic of care and its emphasis on dependency work as a whole earned citizenship provides a non humanitarian justification for legalizing unauthorized immigrants based on their contributions to citizens and institutions in their adopted nation

based on legal philosophical research and informed by insights gleaned from empirical case studies this book sets out three central claims about integration requirements as conditions for attaining increased rights ie family migration permanent residency and citizenship in europe 1 that the recent proliferation of these mandatory integration requirements is rooted in a shift towards individualised conceptions of integration 2 that this shift is counterproductive as it creates barriers to participation and inclusion for newcomers who will most likely permanently settle and is normatively problematic insofar as it produces status hierarchies between native born and immigrant citizens 3 that the remedy for this situation is a firewall that disconnects integration policy from access to rights the book draws on perspectives on immigrant integration in multiple eu member states and includes legal and political reactions to the refugee migrant crisis

becoming transnational youth workers contests mainstream notions of adolescence with its study of a previously under documented cross section of mexican immigrant youth preceding the latest wave of central american children and teenagers now fleeing violence in their homelands isabel martinez examines a group of unaccompanied mexican teenage minors who emigrated to new york city in the early 2000s as one of the consequences of intractable poverty in their homeland these emigrant youth exhibit levels of agency and competence not usually assigned to children and teenage minors and disrupt mainstream notions of what practices are appropriate at their ages leaving school and family in mexico and financially supporting not only themselves

through their work in new york city but also their families back home these youths are independent teenage migrants who upon migration wish to assume or resume autonomy and agency rather than dependence this book also explores community and family understandings about survival and social mobility in an era of extreme global economic inequality

how many immigrants should we allow into the us annually and who gets to come the question

is easy to ask but hard to answer for thoughtful individuals and for our nation as a whole philosopher philip cafaro answers the question as a political progressive who perhaps surprisingly wants to reduce immigration into the united states cafaro details how current immigration levels the highest in american history undermine attempts to achieve progressive economic environmental and social goals he shows that by thinking through immigration liberals can get clearer on their own goals these do not include having the largest possible percentage of racial and ethnic minorities but creating a society free of racial discrimination where diversity is appreciated they do not include an ever growing economy but an economy that works for the good of society as a whole they most certainly do not include a crowded cooked polluted ever more tamed environment but a healthy spacious landscape with sufficient room for wild nature finally liberals goals should include playing our proper role as global citizens while paying attention to our special responsibilities as americans like it or not those responsibilities include setting us immigration policy
