a collection of financial papers gathered from the desk of a man who lived in the mid twentieth century provides us with a unique entry point into understanding the history of banking paper made the democratization of banking possible in the twentieth century paper facilitated finances and provided security to those who worried about remembering transactions credits and debits are abstractions but when put to paper they were more easily manageable as concrete items that could be passed around bought and sold like other commodities this case study helps us to think about how something so simple so mundane as paper was an essential invention that sparked further innovations in the banking and financial markets

2014-02

excerpt from commercial paper a d104 book for merchants
bankers and investors in the past few years all who have had to
do with commercial paper have learned much regarding it
recent events have brought increased interest in commercial
paper a larger understanding of it and an evident desire to use
this important agent in broader and at the same time in sounder
ways today the importance of commercial paper and the need of
its proper protection are more evident than ever yet with a
constantly growing knowledge there has been the occasional
need of creditors committees often followed by receiverships
and failures due almost wholly to unprotected short time debt
chiefly that of commercial paper this faulty finance has proved
of great inconvenience and expense not only to both lender and
borrower in individual instances but to the industrial world at
large it is clearer than ever that good business is a science just as
are medicine and law and that the good practice of finance is as
important to the world individually and collectively as the
proper practice of other sciences like preventive medicine
preventive bad finance is of the greatest value with this in
mind the second edition of this book is presented to the public
