speed as a factor for success our modern industrial society lives life in the fast lane the catchwords faster shorter more powerful reflect what we experience in almost all aspects of our lives whether at home or at work we are constantly on the move and in a rush in our private lives we find rapid exchange of information most entertaining and we are fascinated by the wide range of information that pours in on us from all around the world mainly via the new media it gives us the feeling of being a part of the action everywhere and all the time seldom are we aware that the only reason this flood of information often referred to as overstimulation does not lead to overkill is that we manage to organize our time effectively there are many parallels to this in the business world here too a great deal of time pressure is exerted from outside goals are set ever higher and deadlines become tighter in other words demands on our time demand faster reaction crucial information travels around the globe across all time zones in a matter of seconds in fact instead of cet or cest it would make sense to have a single time zone for the worldwide network called gst for global simultaneous time in business more so than in private life we are almost constantly online
