case study from the year 2018 in the subject health public health grade 70 00 language english abstract guaranteeing that the national health service organisations and the affiliated human resources deliver high quality and equitable care is one of the major priorities in the contemporary health services yet the metrics necessary to evaluate the quality and assurance of the healthcare is a matter subject to continuous debate in the recent past the concerns associated with the quality of care has attracted wide ranging interests particularly by the mid staffordshire hospital scandal an inquiry report into the mid staffordshire nhs foundation trust the francis report released on february 2013 paints a grim picture of the events that transpired during fermentation of the scandal unfortunately these events led to the loss of lives due to issues

which could have been managed or addressed better briefly the stafford and cannock chase hospitals decided to pursue the foundation trust in 2005 which was subsequently granted in 2008 however abnormally high death rates raised eyebrows from various quarters triggering the formulation of the taskforce to look into the matter it is largely believed that the scandal was triggered by the quest of the managers to cut down the operational costs and accomplish the minimum labour requirements in attempts to achieve the foundation status and qualify for the nhs trust funds this indicates that the scandal was as a result of catastrophic organisational challenges that were triggered by poor change management

A Study in Hospital Efficiency 2014-03

introducing the first evidence based casebook for hospital clinicians this book introduces illustrated evidence based clinical cases drawn from real world hospital practice geared to the needs of hospital clinicians clinical care conundrums challenging diagnoses in hospital medicine focuses on sharpening clinical reasoning and diagnostic skills giving readers the tools to recognize and diagnose a wide array

of diseases while promoting diagnostic safety in hospital medicine written by leading experts on the topics under discussion this volume offers a hand picked collection of case studies from the widely popular clinical care conundrum ccc series found in the journal of hospital medicine each chapter presents a case to an expert clinician who explains his or her approach to diagnosing challenging medical dilemmas each chapter concludes with a concise review of recent literature and if applicable with discussions of cognitive errors that may impact clinical diagnosis and patient care readers will find an appealing presentation style that combines high quality images and text coverage of both common conditions and uncommon but important diseases encountered in the hospital setting a look at the state of the art of clinical reasoning an area of critical interest to clinicians practical pearls for each case study that readers can apply in their own practice clinical care conundrums is an indispensable reference for hospitalists hospital based physicians and midlevel providers physicians in training and the many other medical practitioners who come up against difficult cases on a daily basis
