The Entomologist

1881

from the late nineteenth century until world war i a group of columbia university students gathered under the mentorship of the renowned historian william archibald dunning 1857 1922 known as the dunning school these students wrote the first generation of state studies on the reconstruction volumes that generally sympathized with white southerners interpreted radical reconstruction as a mean spirited usurpation of federal power and cast the republican party as a coalition of carpetbaggers freedmen scalawags and former unionists edited by the award winning historian john david smith and j vincent lowery the dunning school focuses on this controversial group of historians and its scholarly output despite their methodological limitations and racial bias the dunning historians writings prefigured the sources and questions that later historians of the reconstruction would utilize and address many of their pioneering dissertations remain important to ongoing debates on the broad meaning of the civil war and reconstruction and the evolution of american historical scholarship this groundbreaking collection of original essays offers a fair and critical assessment of the dunning school that focuses on the group s purpose the strengths and weaknesses of its constituents and its legacy squaring the past with the present this important book also explores the evolution of historical interpretations over time and illuminates the ways in which contemporary political racial and social questions shape historical analyses

new york magazine was born in 1968 after a run as an insert of the new york herald tribune and quickly made a place for itself as the trusted resource for readers across the country with award winning writing and photography covering everything from politics and food to theater and fashion the magazine s consistent mission has been to reflect back to its audience the energy and excitement of the city itself while celebrating new york as both a place and an idea

Q.P. Indexes

1886

each year thousands of tourists visit mount mitchell the most prominent feature of north carolina s black mountain range and the highest peak in the eastern united states from native americans and early explorers to land speculators and conservationists people have long been drawn to this rugged region timothy silver explores the long and complicated history of the black mountains drawing on both the historical record and his experience as a backpacker and fly fisherman he chronicles the geological and environmental forces that created this intriguing landscape then traces its history of environmental change and human intervention from the days of indian european contact to today among the many tales silver recounts is that of elisha mitchell the renowned geologist and university of north carolina professor for whom mount mitchell is named who fell to his death there in 1857 but nature s stories of forest fires chestnut blight competition among plants and animals insect invasions and most recently airborne toxins and acid rain are also part of silver s narrative making it the first history of the appalachians in which the natural world gets equal time with human history it is only by understanding the dynamic between these two forces silver says that we can begin to protect the black mountains for future generations

Bulletin of the United States Geological Survey

1949

examines the successes and failures of the clean air act in order to lay a foundation for future energy policy

Official Gazette of the United States Patent Office

1880

from the deserts of egypt to the emergence of the great monastic orders the story of late antique and medieval monasticism in the west used to be straightforward but today we see the story as far messier less linear less unified and more historicized in the first part of this book the reader is introduced to the astonishing variety of forms and experiences of the monastic life their continuous transformation and their embedding in physical socio economic and even personal settings the second part surveys and discusses the extensive international scholarship on which the first part is built the third part a research tool rounds off the volume with a carefully representative bibliography of literature and primary sources

The Dunning School

2013-10-14

evaluating statistical procedures through decision and game theory as first proposed by neyman and pearson and extended by wald is the goal of this problem oriented text in mathematical statistics first year graduate students in statistics and other students with a background in statistical theory and advanced calculus will find a rigorous thorough presentation of statistical decision theory treated as a special case of game theory the work of borel von neumann and morgenstern in game theory of prime importance to decision theory is covered in its relevant aspects reduction of games to normal forms the minimax theorem and the utility theorem with this introduction blackwell and professor girshick look at values and optimal strategies in games general structure of statistical games utility and principles of choice classes of optimal strategies fixed sample size games with finite Ω and with finite a

sufficient statistics and the invariance principle sequential games bayes and minimax sequential procedures estimation and comparison of experiments a few topics not directly applicable to statistics such as perfect information theory are also discussed prerequisites for full understanding of the procedures in this book include knowledge of elementary analysis and some familiarity with matrices determinants and linear dependence for purposes of formal development only discrete distributions are used though continuous distributions are employed as illustrations the number and variety of problems presented will be welcomed by all students computer experts and others using statistics and game theory this comprehensive and sophisticated introduction remains one of the strongest and most useful approaches to a field which today touches areas as diverse as gambling and particle physics

The Monthly Army List

1920

as plant physiology increased steadily in the latter half of the 19th century problems of absorption and transport of water and of mineral nutrients and problems of the passage of metabolites from one cell to another were investigated especially in germany justus von liebig who was born in darmstadt in 1803 founded agricultural chemistry and developed the techniques of mineral nutrition in agriculture during the 70 years of his life the discovery of plasmolysis by nagel 1851 the investigation of permeability problems of artificial membranes by traube 1867 and the classical work on osmosis by pfeffer 1877 laid the foundations for our understanding of soluble substances and osmosis in cell growth and cell mechanisms since living membranes were responsible for controlling both water movement and the substances in solution permeability became a major topic for investigation and speculation the problems then discussed under that heading included passive permeation by diffusion donnan equilibrium adjustments active transport processes and antagonism between ions in that era when organelle isolation by differential centrifugation was unknown and the electron microscope had not been invented the number of cell membranes their thickness and their composition were matters for conjecture the nature of cell surface membranes was deduced with remarkable accuracy from the reactions of cells to substances in solution in 1895 overton in u s a published the hypothesis that membranes were probably lipid in nature because of the greater penetration by substances with higher fat solubility

in this examination of zion theology and how it arises in the book of psalms antti laato s starting point is that the hebrew bible is the product of the exilic and postexilic times which nonetheless contains older traditions that have played a significant role in the development of the text laato seeks out these older mythical traditions related to zion using a comparative methodology and looking at biblical traditions alongside ugaritic texts and other ancient near eastern material as such laato provides a historical background for zion theology which he can apply more broadly to the psalms in addition laato argues that zion related theology in the psalms is closely related to two events recounted in the hebrew bible first the architectural details of the temple of solomon 1 kings 6 7 which can be compared with older mythical zion related traditions second the religious traditions related to the reigns of david and solomon such as the ark narrative which ends with david s transfer of the ark to jerusalem 2 sam 6 from this laato builds an argument for a possible setting in jerusalem at the time of david and solomon for the zion theology that emerges in the psalms

Mount Mitchell and the Black Mountains

2003-12-04

the basis problem for modular forms of degree one is to find a basis for a space of modular forms with elements whose fourier coefficients can be computed explicitly the authors give a general treatment for all cases the main idea in the solution is to consider two kinds of forms theta series associated with special order and bases of primitive neben space

Lessons from the Clean Air Act

2019-05-09

this book introduces the thermodynamics of liquids and explains how recent advances have improved our understanding of liquid properties

Medieval Monasticisms

2020-03-23

an insightful contribution to old testament studies showing how the seemingly bloodthirsty oracle of jeremiah 48 nevertheless contains a positive christian reading in this sophisticated study julie woods identifies some salient features of jeremiah s moab oracle by means of a careful analysis and comparison of both the septuagint and the masoretic text of jeremiah 48 she also explores the implications of links between the moab oracles in jeremiah 48 and isaiah 15 16 the focus then moves to theological hermeneutics via an examination of some recent christian interpretations of the oracle from walter brueggemann ronald clements terence fretheim douglas jones and patrick miller building on the observations of these scholars and the conclusions reached from her own textual analyses woods provides an innovative christian reading of the oracle including two imaginative film scripts to bring the text to life perhaps one of the more surprising proposals is that easter is the ultimate horizon of jeremiah 48

the language communication society triangle defies traditional scientific approaches rather it is a phenomenon that calls for an integration of complex transdisciplinary perspectives if we are to make any progress in understanding how it works the highly diverse agents in play are not merely cognitive and or cultural but also emotional and behavioural in their specificity indeed the effort may require building a theoretical and methodological body of knowledge that can effectively convey the characteristic properties of phenomena in human terms new complexity approaches allow us to rethink our limited and mechanistic images of human societies and create more appropriate emo cognitive dynamic and holistic models we have to enter into dialogue with the complexity views coming out of other more material sciences but we also need to take steps in the linguistic and psycho sociological fields towards creating perspectives and concepts better fitted to human characteristics our understanding of complexity is different but not opposed to the one that is more commonly found in texts written by people working in physics or computer science for example the goal of this book is to extend the knowledge of these other more human or socially oriented perspectives on complexity taking account of the language and communication singularities of human agents in society our understanding of complexity is different but not opposed to the one that is more commonly found in texts written by people working in physics or computer science for example the goal of this book is to extend the knowledge of these other more human or socially oriented perspectives on complexity taking account of the language and communication singularities of human agents in society

Irish National Inventory of Historic Scientific Instruments

1995-11-15

the us led coalition which launched an invasion of iraq on 20 march 2003 led to a decade long military presence in the country in the run up to that invasion many comparisons were made with the 1991 gulf war ahmed ijaz malik takes these two instances of military intervention by republican us governments to highlight how the official discourse of leaders and decision makers has an impact on foreign policy and its results by taking these two examples he examines how discourse affects real events and the extent to which the legacy of the cold war has influenced the decisions which are made at the upper echelons of the us government us foreign policy and the gulf wars critically analyses the post cold war liberal cosmopolitan and realist discourses related to these two instances of us military intervention using an approach which malik labels critical realism this book examines the ways in which discourses often act as ideological covers for material interests whilst still not holding a deterministic view whereby these interests alone shape policies from this perspective this book assesses the themes of just war humanitarianism and cosmopolitanism it furthermore uses the approach of critical realism to engage with a variety of arguments on the emerging role of the us as they were displayed in academic discourses and other intellectual contributions around each of the 1991 and 2003 wars malik relates these discussions to an analysis of the official discourses documents and policies displayed prior to the 1991 and 2003 wars as well as to an examination of the resulting actual conduct since the implications of the us military presence in the middle east are so central to the study of international relations and security studies this book will be invaluable for specialists in these disciplines as well as for those interested in policy formation and the wider middle east

Women of ... , International

1923

discursive practices during war polarize and politicize gender they normally require men to fulfill a single overriding task destroy the enemy but impose a series of often contradictory expectations on women the essays in the book establish links between political ideology history psychology cultural studies cinema literature and gender studies and addresses questions such as what is the role of women in war or military conflicts beyond the well studied victimization can the often contradictory expectations of women and their traditional roles be re thought and re constructed how do cultural representations of women during war times reveal conflicting desires and poke holes in the ideological apparatus of the state and society

emergency response management of offshore examines the deepwater horizon disaster and offers processes for

safety and environmental protection though renewable energy is a growing piece of the energy pie fossil fuels still dominate our energy supplies and will continue to do so for decades this makes offshore drilling especially in places like the gulf of mexico and north sea extremely important for the future of the world s energy supply unfortunately the world has been witnessing over and over again accidents deadly explosions spills and environmental disasters that could have been avoided with proper safety and environmental processes put in place the deepwater horizon catastrophe is the largest offshore oil spill in u s history and an ecological nightmare of epic proportions emergency response management of offshore oil spills aids in the response of this and future disasters by providing this handy reference volume for engineers managers and other emergency responders this timely publication outlines the toxic nature of crude oil covering properties of crude oil chemical composition toxicity to humans and marine life and investigates the impact of oil spills from historical case studies the current arsenals available to address oil spills such as dispersants absorbing booms skimming and other methods are also discussed technologies that are rapidly being developed to address the gulf oil spill are considered along with extensive information on chemical protective clothing air monitoring respiratory protection management of waste and much more the book concludes with a chapter discussing responsible care and takes a critical look at the reasons why the deepwater horizon rig catastrophe happened and examines the follow up that ensued after the incident emergency response management of offshore oil spills provides examples of 26 major oil spills ranked from largest to smallest describing each incident and the amount of oil spilled recommendations and guidance on proper air monitoring methods suggestions related to protective garments such as respirators comparative product information on chemical dispersants shoreline bleaching and cleaning chemicals detailed toxicity data for humans and marine life discussions in the areas of deficiencies in responding to spills and why the oil industry needs to be more responsive to developing technologies hazardous materials protocols including osha and epa recommended safe work practices for dealing with hazardous materials

New York Magazine

1991-04-15

in strategic coupling henry wai chung yeung examines economic development and state firm relations in east asia focusing in particular on south korea taiwan and singapore as a result of the massive changes of the last twenty five years new explanations must be found for the economic success and industrial transformation in the region state assisted startups and incubator firms in east asia have become major players in the manufacture of products with a global reach taiwan s hon hai precision has assembled more than 500 million iphones for instance and south korea s samsung provides the iphone s semiconductor chips and retina displays drawing on extensive interviews with top executives and senior government officials yeung argues that since the late 1980s many east asian firms have outgrown their home states and are no longer dependent on state support as a result the developmental state has lost much of its capacity to steer and direct industrialization we cannot read the performance of national firms as a direct outcome of state action yeung calls for a thorough renovation of the still dominant view that states are the primary engine of industrial transformation he stresses action by national firms and traces various global production networks to incorporate both firm specific activities and the international political economy he identifies two sets of dynamics in these national global articulations known as strategic coupling coevolution in the confluence of state firm and global production networks and the various strategies pursued by east asian firms to attain competitive positions in the global marketplace
