based on rigorous analysis of the propaganda of five western european separatist parties this book provides in depth examination of the nationalism of the rich defined as a type of nationalist discourse that seeks to end the economic exploitation suffered by a group of people represented as a wealthy nation and supposedly carried out by the populations of poorer regions and or by inefficient state administrations it shows that the nationalism of the rich represents a new phenomenon peculiar to societies that have set in place complex systems of wealth redistribution and adopted economic growth as the main principle of government legitimacy the book argues that the nationalism of the rich can be seen as a rhetorical strategy portraying independent statehood as a solution to the dilemma between solidarity and efficiency arisen in western europe since the end of the glorious thirties it further suggests that its formation can be best explained by the following combination of factors 1 the creation from the end of the second world war of extensive forms of automatic redistribution to a scale previously unprecedented 2 the beginning from the mid 1970s of an era of permanent austerity exacerbated in specific contexts by situations of serious public policy failure 3 the existence of national cultural cleavages roughly squaring with uneven development and sharp income differentials among territorial areas of a given state
