early 2000s a new wave of documentaries emerged that centered on palestinians and mizrahim s jews of middle eastern origins historical and lived experiences of pain and oppression across israel palestine and beyond the documentaries challenge the systemic removal of self represented palestinian and mizrahi pain from mainstream media and the public realm dominated by israel this book explores how palestinians and mizrahim perform their long endured pain on screen analysing key documentary films from the first decade of the 2000s shirly bahar offers a nuanced reading of the cinematic documentary corpus emerging from israel palestine as well palestinians and mizrahim s different and unequal yet interrelated forms of oppression and racialization under israeli rule while pain sets them apart the documentary representations of pain of palestinians and mizrahim invite us to consider reconnection by focusing on the very relational nature of pain in the increasingly multi racial everyday embodied experiences transform from being anecdotal to having social and political significance what can the experience of corporeality offer social and political discourse and how does that discourse change when those bodies belong to arab americans and african americans therí a pickens discusses a range of literary cultural and archival material where narratives emphasize embodied experience to examine how these experiences constitute arab americans and african americans as social and political subjects pickens argues that arab american and african american narratives rely on the body s fragility rather than its exceptional strength or emotion to create urgent social and political critiques the creators of these narratives find potential in mundane experiences such as breathing touch illness pain and death each chapter in this book focuses on one of these everyday embodied experiences and examines how authors mobilize that fragility to create social and political commentary pickens discusses how the authors focus on quotidian experiences complicates their critiques of the nation state domestic and international politics exile cultural mores and the medical establishment new body politics participates in a vibrant interdisciplinary conversation about cross ethnic studies american literature and arab american literature using intercultural analysis pickens explores issues of the body and representation that will be relevant to fields as varied as political science african american studies arab american studies and disability studies an unprecedented analysis of the crucial but underexplored roles the united states and other nations have played in shaping syria s ongoing civil war one of the best informed and non partisan accounts of the syrian tragedy yet published patrick cockburn independent syria s brutal long lasting civil war is widely viewed as a domestic contest that began in 2011 and only later drew foreign nations into the fray but in this book christopher phillips shows the crucial roles that were played by the united states russia iran saudi arabia turkey and qatar in syria s war right from the start phillips untangles the international influences on the tragic conflict and illuminates the west s strategy against isis the decline of u s power in the region and much more originally published in 2016 the book has been updated with two new chapters the search for a cause of the global warming phenomenon on our planet has sparked some interest in the scientific community the connection between changes occurring in the sun and global warming presents one fundamental perspective which has been investigated by a number of scientific research groups in recent times there have been some promising results that might help us uncover the clues about such a link the sun climate connection over the last millennium facts and questions presents fundamental information about the solar activity space weather terrestrial climates and their variations over an extended period of time the information presented is a set of analyses based on modern methods of statistical analysis of non stationary time series including fourier wavelet and singular spectral analysis while considering space weather phenomena solar winds solar flares aurora borealis etc and other terrestrial manifestations of solar activity the physical mechanisms potentially linking solar activity and space weather to climate are discussed based on these analyses the ebook also provides some context of modern millennial temperature reconstructions for explaining global warming in the 20th century scenarios of the solar activity and climate evolution throughout the 21st century are considered on the basis of the updated data the ebook provides useful facts for researchers seeking information on climate and space research with respect to solar phenomena educational technology is now ubiquitous in schooling both in p 12 and at universities despite the imposition of technology in most aspects of teaching and learning little attention has been given to the implications educational technology has for healthy student development humane pedagogy teacher labor academic freedom and the aims of social justice rather than merely a set of neutral tools educational technology is bound up with systems of power and privilege that tend to deepen rather than confront inequality in calling for a reassessment of the relationship between schools and technology this book asks readers to think differently about the role technology can serve in socially just schools an accessible and compelling read this book will appeal to students and scholars of sociology social justice politics and all those interested in the impact technology is having on the education system in the usa 2014 has the potential to go down as a crucial year in modern world history a resurgent and bellicose russia took over crimea and fueled a civil war in eastern ukraine post saddam iraq in many respects a creature of the united states because of the war that began in 2003 lost a third of its territory to an army of hyper violent millennialists the peace process in israel seemed to completely collapse finally after coalescing in syria as a territorial entity the islamic state swept into northern iraq and through northeastern syria attracting legions of recruits from europe and the middle east in short the post cold war security order that the us had constructed after 1991 seemed to be coming apart at the seams david kilcullen was one of the architects of america s strategy in the late phases of the second gulf war and also spent time in afghanistan and other hotspots in blood year he provides a wide angle view of the current situation in the middle east and analyzes how

america and the west ended up in such dire circumstances whereas in 2008 it appeared that the u s might pull a modest stalemate from the jaws of defeat in iraq six years later the situation had reversed after america pulled out of iraq completely in 2011 the shi ite president cut sunnis out of the power structure and allowed iranian influence to grow and from the debris of assad s syria arose an extremist sunni organization even more radical than al Qaeda unlike al Qaeda isis was intent on establishing its own state and within a remarkably short time they did interestingly kilcullen highlights how embittered former iraqi ba athist military officers were key contributors to isis s military successes kilcullen lays much of the blame on bush s initial decision to invade iraq which had negative secondary effects in afghanistan but also takes obama to task for simply withdrawing and adopting a leading from behind strategy as events have proven kilcullen contends withdrawal was a fundamentally misguided plan the u s had uncorked the genie and it had a responsibility to at least attempt to keep it under control instead the u s is at a point where administration officials state that the losses of ramadi and palmyra are manageable setbacks kilcullen argues that the u s needs to re engage in the region whether it wants to or not because it is largely responsible for the situation that is now unfolding blood year is an essential read for anyone interested in understanding not only why the region that the u s invaded a dozen years ago has collapsed into utter chaos but also what it can do to alleviate the grim situation the journal of the civil war era volume 3 number 2 june 2013 table of contents editor s note william blair articles stephen cushman when lincoln met research on the many issues raised by the sectional crisis war reconstruction and memory of the conflict while bringing fresh understanding to the struggles that defined the period and by extension the course of american history in the nineteenth century this book examines the increasing territorialisation of party competition and the relaxation of unitarian rule through devolution presenting a long term analysis of electoral developments in the united kingdom since the end of the second world war subsequently the book looks into the undermining of the traditional majoritarian mode of british government as a result it analyzes the significant role of these long term developments and their detrimental effect on the parliament s ability to resolve issues like the scottish independence referendum or the uk s vote to leave the european union and it addresses their underlying causes the author additionally reconnects these electoral developments to the changing nature of devolution and shows how the deepening of devolution accelerates the negative electoral consequences for the british system of government finally the book shows why the british labour party is turning more and more into a long term minority party as a result of these developments the book is a must read for scholars students and policy makers interested in a better understanding of comparative politics and devolution in general as well as in the more specific case of the united kingdom s electoral system the purpose of the work life balance series is to highlight particular challenges that higher education faculty face as they participate in the demands of the academy and try to prevent those demands from invading their personal lives on the high wire looks at a specific subset of university faculty education faculty with school aged children and the specific professional personal balance these faculty need to find the title on the high wire suggests the precarious nature of the walk for education faculty who are parents of school aged children we know that our identities are central to how we experience the world and how the world reacts to us this reality is clearly visible in this book these multiple identities and roles come into conflict at multiple points and in different ways this book explores these identities and roles through autoethnographic accounts written by varied education faculty in order to make these tensions visible for the field to address ciudad Juárez has recently become infamous for its murder rate which topped 3 000 in 2010 as competing drug cartels grew increasingly violent and the military responded with violence as well despite the atmosphere of intimidation by troops police and organized criminals women have led the way in civil society activism spurring the Juárez resistance and forging powerful alliances with anti militarization activists an in depth examination of la resistencia juareense courage resistance and women in ciudad Juárez draws on ethnographic research to analyze the resistance s focus on violence against women as well as its clash with the war against drugs championed by mexican president felipe calderón with the support of the united states through grounded insights the authors trace the transformation of hidden discourses into public discourses that openly challenge the militarized border regimes the authors also explore the advocacy carried on by social media faith based organizations and peace and justice activist javier sicilia while calderón faced u s political schisms over the role of border trade in this global manufacturing site bringing to light on the ground strategies as well as current theories from the fields of sociology political anthropology and human rights this illuminating study is particularly significant because of its emphasis on the role of women in local and transnational attempts to extinguish a hot zone as they overcome intimidation to become game how evangelical activism in england contributes to the secularizing forces it seeks to challenge over the past two decades a growing number of christians in england have gone to court to enforce their right to religious liberty funded by conservative lobby groups and influenced by the legal strategies of their american peers these claimants registrars who conscientiously object to performing the marriages of same sex couples say or employees asking for exceptions to uniform policies that forbid visible crucifixes highlight the uneasy truce between law and religion in a country that maintains an established church but is wary of public displays of religious conviction representing god charts the changing place of public christianity in england through the rise of christian political activism and litigation based on two years of fieldwork split between a conservative christian lobby group and a conservative evangelical church

méadhbh mcivor explores the ideas and contested reception of this ostensibly american inspired legal rhetoric she argues that legal challenges aimed at protecting christian values ultimately jeopardize those values as moralities woven into the fabric of english national life are filtered from their quotidian context and rebranded as the niche interests of a cultural minority by framing certain moral practices as specifically christian these activists present their religious convictions as something increasingly set apart from broader english culture thereby hastening the secularization they seek to counter representing god offers a unique look at how christian politico legal activism in england simultaneously responds to and constitutes the religious life of a nation

2014 has the potential to go down as a crucial year in modern world history a resurgent and bellicose russia took over crimea and fueled a civil war in eastern ukraine post saddam iraq in many respects a creature of the united states because of the war that began in 2003 lost a third of its territory to an army of hyper violent millennialists the peace process in israel seemed to completely collapse finally after coalescing in syria as a territorial entity the islamic state swept into northern iraq and through northeastern syria attracting legions of recruits from europe and the middle east in short the post cold war security order that the us had constructed after 1991 seemed to be coming apart at the seams david kilcullen was one of the architects of america s strategy in the late phases of the second gulf war and also spent time in afghanistan and other hotspots in blood year he provides a wide angle view of the current situation in the middle east and analyzes how america and the west ended up in such dire circumstances whereas in 2008 it appeared that the u s might pull a modest stalemate from the jaws of defeat in iraq six years later the situation had reversed after america pulled out of iraq completely in 2011 the shi ite president cut sunnis out of the power structure and allowed iranian influence to grow and from the debris of assad s syria arose an extremist sunni organization even more radical than al qaeda unlike al qaeda isis was intent on establishing its own state and within a remarkably short time they did interestingly kilcullen highlights how embittered former iraqi ba athist military officers were key contributors to isis s military successes kilcullen lays much of the blame on bush s initial decision to invade iraq which had negative secondary effects in afghanistan but also takes obama to task for simply withdrawing and adopting a leading from behind strategy as events have proven kilcullen contends withdrawal was a fundamentally misguided plan the u s had uncorked the genie and it had a responsibility to at least attempt to keep it under control instead the u s is at a point where administration officials state that the losses of ramadi and palmyra are manageable setbacks kilcullen argues that the u s needs to re engage in the region whether it wants to or not because it is largely responsible for the situation that is now unfolding blood year is an essential read for anyone interested in understanding not only why the region that the u s invaded a dozen years ago has collapsed into utter chaos but also what it can do to alleviate the grim situation
