fran ois hartog explores crucial moments of change in society's regimes of historicity or its way of relating to the past present and future inspired by arendt koselleck and ricoeur hartog analyzes a broad range of texts positioning the the odyssey as a work on the threshold of a historical consciousness and then contrasting it against an investigation of the anthropologist marshall sahlins's concept of heroic history he tracks changing perspectives on time in chateaubriand's historical essay and travels in america and sets them alongside other writings from the french revolution he revisits the insight of the french annals school and situates pierre nora's realms of memory within a history of heritage and our contemporary presentism our presentist present is by no means uniform or clear cut and it is experienced very differently depending on one's position in society there are flows and acceleration but also what the sociologist robert castel calls the status of casual workers whose present is languishing before their very eyes and who have no past except in a complicated way especially in the case of immigrants exiles and migrants and no real future since the temporality of plans and projects is denied them presentism is therefore experienced as either emancipation or enclosure in some cases with ever greater speed and mobility and in others by living from hand to

mouth in a stagnating present hartog also accounts for the fact that the future is perceived as a threat and not a promise we live in a time of catastrophe one he feels we have brought upon ourselves

a detailed and richly illustrated analysis of charisma and the political and cultural conditions in which charismatic figures arise this work of historical sociology critically engages with max weber s ambiguous concept of charisma to examine the charismatic careers of a number of figures including joan of arc hitler and nelson mandela as well as that of jesus who the author contends in

contradistinction to max weber was not a charismatic leader in spite of his portrayal in christian theology shedding light on the process of charismatic transformation as it occurs within intensely solidaristic groups and the importance of patronage in charismatic careers the book distinguishes between charismatic rule and charismatic leadership with close attention to the social and political legacy of charisma for modern capitalism it also examines the emergence of a global class of the super rich a process buttressed by a belief on the part of business leaders in their own charismatic powers a rigorous examination of the under researched political process of charisma the understanding of which remains as important in modern society as in history charisma and patronage will appeal to students and scholars across a range of disciplines including sociology history politics and social geography

reassessing the developing world through the lens of europe s past today s developing nations emerged from the rubble of the second world war only a handful of these countries have subsequently attained a level of prosperity and security comparable to that of the advanced industrial world the implication is clear those who study the developing world in order to learn how development can be achieved lack the data to do so in the development dilemma robert bates responds to this challenge by turning to history focusing on england and france by the end of the eighteenth century england stood poised to enter the great transformation france by contrast verged on state failure and life and property were insecure probing the histories of these countries bates uncovers a powerful tension between prosperity and security both may be necessary for development he argues but efforts to achieve the one threaten the achievement of the other a fundamental tension pervades the political economy of development bates also argues that while the creation of a central hierarchy a state may be necessary to the achievement of development it is not sufficient what matters is how the power of the state is used france and england teach us that in some settings the seizure and redistribution of wealth not its safeguarding and fostering is a winning political strategy these countries also suggest the features that mark those settings features that appear in nations throughout the developing world returning to the present bates applies these insights to the world today drawing on fieldwork in zambia and kenya and data from around the globe he demonstrates how the past can help us to understand the performance of nations in today s developing world
