Scientific Careers in the Agricultural Research Service 1969

using a political economic approach supplemented with insights from human ecology this volume analyzes the long term dynamics of food security and economic growth the book begins by discussing the nature of preindustrial food crises and the changes that have occurred since the 19th century with the ascent of technical science and the fossil fuel revolution it explains how these changes improved living standards but that the realization of this improvement was usually dependent on government support for smallholder modernization the author sets out how the evolution of food security in different regions has been influenced by farm policy choices and how these choices were shaped by local societal characteristics international relations and changing configurations in metropolitan countries separate chapters are devoted to the interaction of this evolution with debates on food security and economic growth and with international economic policies the final chapters highlight the new challenges for global food security that will arise as traditional sources of biomass production and the more easily extractable reserves of fossil biomass become depleted or can no longer be used overall the book emphasizes the inadequacy of current explanations with regard to these challenges it explores what is needed to ensure a sustainable future and calls for a rethinking of these issues a necessary reflection in today s unstable global political situation

Science, Politics, And The Agricultural Revolution In Asia 2019-05-28

the agricultural and rural crisis besetting africa is the result of both policy failures and inadequacies and the product of structural rigidities inhibiting access to and control of vital resources the challenge of leadership in the agricultural sector is how to design and implement policies which would help induce growth and development in this sector it is against this background that the africa leadership forum convened in ota ogun state nigeria in july of 1989 to explore a broad range of parameters to be addressed in the formulation of successful policies this volume is derived from papers submitted and presentations made the book provides the main conclusions and recommendations which emanated from the conference they highlight a series of actions which must be taken in such areas and women in 2023-07-19 3/20

Food Security, Agricultural Policies and Economic Growth 2017-04-21

over the past two decades existing documentation of women in the agricultural sector has surveyed topics such as agricultural restructuring and land reform international trade agreements and food trade land ownership and rural development and rural feminisms many studies have focused on either the high income countries of the global north or the low income countries of the global south this separation suggests that the north has little to learn from the south or that there is little shared commonality across the global dividing line fletcher and kubik cross this political economic and ideological division by drawing together authors from 5 continents they discuss the situation for women in agriculture in 13 countries worldwide with two chapters that cover international contexts the authors blur the boundaries between academic and organizational authors and their contributors include university based researchers gender experts development consultants and staff of agricultural research centers and international organizations i e oxfam the united nations world food program the common thread connecting these diverse authors is an emphasis on practical and concrete solutions to address the challenges such as lack of access to resources and infrastructure lack of household decision making power and gender biases in policymaking and leadership still faced by women in agriculture around the world ongoing issues in climate change will exacerbate many of these issues and several chapters also address environment and sustainability this book is of great interest to readers in the areas of gender studies agriculture policy studies environmental studies development and international studies

The Challenges Of Agricultural Production And Food Security In Africa 2013-09-13

the living land sets out a new stakeholder vision for rural regeneration in europe it integrates three themes sustainable agriculture localised food systems and rural community development all three offer ways of rebuilding natural and social capital and a large sustainability dividend is waiting to be released from current practices creating more jobs more wealth and better lives from less

Women in Agriculture Worldwide 2016-07-01

a large proportion of the world's population is directly involved in agriculture many of them as small businessmen each of these businessmen applies his skill and resources day in day out to produce food and raw materials all of them to a greater or lesser extent operate in a changing environment to which they must adjust many aspects of the environments of agricultural institutions by the decisions of other people in the marketplace are influenced in ancillary industries in research institutes and places of learning and in government organisations that create and implement agricultural policy improvements in the quality of decisions made by those who manage all the various parts of the agricultural system can have a major impact on the quality of everyone's life how can such improvements be achieved this book is based on the belief that a grasp of concepts or principles can add a great deal to the understanding and management of agricultural systems of all kinds it therefore attempts to transmit some ideas and observations about management in agriculture it is not about techniques nor about the particular problems of a specific type of agriculture its aim is to promote reflection thought and discussion by professional people whose decisions influence the performance of agricultural vii v11l preface systems as such the book attempts to convey only the central concepts of management in as simple a language as possible

Sustainable Agriculture for Food Security 2021-10-01

the general labour and employment laws of many countries do not necessarily take into account the special circumstances of those who work in the agriculture forestry and fisheries sectors whereas legislation governing these sectors tends not to integrate appropriate labour standards this becomes even more of a concern where there is a general weakness in inter sectoral and inter institutional coordination mechanisms this legislative study seeks to respond to these challenges by providing guidance on the integration of internationally accepted labour standards into national legislation in the agriculture forestry and fisheries sectors it identifies the standards that apply to these sectors and shows how they have been or could be integrated into regulatory frameworks governing organic production and other agricultural commodities contract farming pesticide management forestry fisheries and other related sectors the overall aim of the study is to improve relevant regulatory frameworks with regard to the protection of the rights of people who derive their livelihoods in these sectors

The agricultural Situation in the European Union 2004

gain a holistic view of agricultural re insurance and capital market risk transfer increasing agricultural production and food security remain key challenges for mankind in order to meet global food demand the food and agriculture organisation estimates that production has to increase by 50 by 2050 and requires large investments agricultural insurance and financial instruments have been an integral part to advancing productivity and are becoming more important in increasingly globalized and specialized agricultural supply chains in the wake of potentially more frequent and severe natural disasters in today s key producing markets underwriting pricing and transferring agricultural risks is complex and requires a solid understanding of the production system exposure perils and the most suitable products which vastly differ among developed and developing markets in the last decade new insurance schemes in emerging agricultural markets have greatly contributed to the large growth of the industry from a premium volume of us 10 1 billion 2006 to us 30 7 billion 2017 this growth is bound to continue as insurance penetration and exposure increase and new schemes are being developed agricultural re insurance has become a cornerstone of sovereign disaster risk financing frameworks agricultural risk transfer introduces the main concepts of agricultural re insurance and capital market risk transfer that

are discussed through industry case studies it also discusses best industry practices for all main insurance products for crop livestock aquaculture and forestry risks including risk assessment underwriting pricing modelling and loss adjustment describes agricultural production risks and risk management approaches covers risk transfer of production and financial risks through insurance and financial instruments introduces modelling concepts for the main perils and key data sources that support risk transfer through indemnity and index based products describes risk pricing and underwriting approaches for crop livestock aquaculture and forestry exposure in developed and developing agricultural systems become familiar with risk transfer concepts to reinsurance and capital markets get to know the current market landscape and main risk transfer products for individual producers agribusinesses and governments through theory and comprehensive industry case studies through agricultural risk transfer you II gain a holistic view of agricultural re insurance and capital market solutions which will support better underwriting more structured product development and improved risk transfer

The Agricultural Development Council 1989

excerpt from agriculture in japan a paper read by professor koide before the agricultural section of the royal society 11th june 1918 besides these chief islands there are about 600 small islands not deserving of mention it was called in ancient time oyashima in japanese that means great eight islands japan extends for about 2 100 miles with a width of 200 miles at her widest part and is a very mountainous country there is a solid backbone of mountains running through each of the chief islands we count six mounts which are over 10 000 feet high and nine over 9 000 feet so a great portion of the whole area is taken up by the mountains which can never be utilised for agriculture the mountains form a divide or watershed in each island so rivers which flow down on both sides are mostly short and rapid though numerous of the areas unoccupied by mountains hills rivers or lakes about 70 per cent are taken by upland and 30 per cent by low plains the uplands are mostly on the skirts of volcanic mountains they are generally covered with grass among which grow several varieties of lilies and other flowering herbs they present a gay aspect but are not much used for agriculture low plains are distributed along the courses of rivers everywhere and there all sorts of agriculture are carried on every corner of land being used as far as possible to the utmost degree climate japan is much elongated from north to south almost reaching to the frigid zone and the tropical zone at each end and the country is also influenced much by the cold current of the okhotsk sea in the north and a warm breakthrough prayer the secret of 2023-07-19 10/20

current in the south a great variation of climate is a matter of course but with the exception of the two extremities japan proper lies within the temperate zone i can say with all confidence that we enjoy both in temperature and humidity practically the golden mean about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Primrose McConnell's the Agricultural Notebook 1988-01-01

mineral nutrition of fruit trees summarizes the state of knowledge about the mineral nutrition of fruit trees including peach and apple trees the discussions are organized around six themes fruit tree mineral nutrition and crop quality uptake and transport effect of soil management and fertilizer applications on nutrient uptake direct application of nutrients to foliage and fruits prediction of nutrient requirements and synthesis this text consists of 69 chapters and begins with a section dealing with the effects of nutrition on fruit quality the second section explores the mechanisms of nutrient entry to and movement within fruit trees and the means of influencing the nutrition of both the whole tree and the crop by fertilizers and management practices including irrigation and the use of herbicides the third section describes methods for predicting the needs of the tree for establishment growth and fruit quality the effects of interactions between nutrition and environment on the mineral composition of fruits are considered along with an integrated approach to orchard nutrition and bitter pit control the influence of boron deficiency on fruit quality and calcium accumulation in apple fruit this book will be of interest to scientists working in fields such as biochemistry food technology agriculture horticulture and physiology

Structural Adjustment and the Agricultural Sector in Latin America and the Caribbean 2016-01-03

demand for mechanization in nigeria is growing in a fairly consistent way predicted by economic theories the farming system has intensified and the use of animal traction has grown at a substantial of 2023-07-19

11/20

receiving what you need from god jim cymbala

rate demand side factors considerably explain the low adoptions of tractors in nigeria where demand is sufficient for tractors the private sector has emerged over time as a more efficient provider of hiring services particularly farmer tofarmer services than the public sector conditions are consistent with the hypotheses that because of generally low support for the agricultural sector in nigeria in the past few decades agricultural mechanization tractor use in particular has remained low despite the declining share of the workforce engaged in the agricultural sector agricultural transformation in the form of a declining agricultural labor force has happened partly through the growth in the oil industry since the 1970s instead of inducing further exit from farming tractor adoptions in nigeria might have helped those who have remained in farming to start expanding their production scale a knowledge gap however still remains regarding the dominance of large tractors and the potential effects of tractor adoptions on smallholders who have yet to adopt them

Government Policy and Farmland Markets 2008-02-28

this paper presents a methodology for public expenditure review and analysis for climate change adaptation and mitigation in the agricultural sector it outlines the basic methodological concepts including the classification of public expenditures in the context of their links to climate change adaptation and mitigation it also illustrates how such analysis can usefully contribute to policy decision making to better achieve the climate change adaptation and mitigation goals using the case study of uganda the proposed classification allows for analysing the level and the composition of public expenditures that influence adaptation capacity of the sector to climate change and actions that increase or decrease greenhouse gas emissions ghg in agriculture this in turn allows for assessing whether the sector is stimulated in a way that allows achieving a country's climate change adaptation and mitigation objectives and form a basis for further evaluation of the effectiveness of individual measures in reaching these objectives

excerpt from population and land in world agriculture recent trends and relationships in the fourth and final part a general theory of the growth of the agricultural labor force is presented three hypotheses to explain the growth of the agricultural population are developed on the basis of the material presented in the earlier sections and other evidence and then tested by means of regression analysis a substantive discussion of the regres sion results leads us to a generally satisfactory explanation of the growth of the agricultural labor force about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Public expenditure analysis for climate change adaptation and mitigation in the agricultural sector 2021-05-26

this book addresses one of the most debated and least understood revolutions in the history of our species the change from foraging hunting and gathering to farming ten thousand years ago there were few if any communities whom we can properly call farmers five thousand years later large numbers of the world's population were farmers using a wide variety of crops and animals in different combinations in different regions the possible reasons for the transition have long been one of the most controversial topics in archaeology and continue to be so the author integrates a massive array of information from archaeology including archaeological approaches right across the humanities and science spectrum together with many other disciplines including anthropology botany climatology genetics linguistics and zoology against current orthodoxy he develops a strong case for the parallel development of geographically specific agricultural systems in many areas of the world transformations in the lifeways of forager societies that in some cases have origins reaching much further back in time that commonly suggested he argues that the change from foraging to farming was as much about foragers developing new ways of thinking about their relationship to the world they inhabited as about new ways of obtaining food
