China 1926

a critical analysis of david c kang s china rising which is a fine example of an author making use of creative thinking skills to reach a conclusion that flies in the face of traditional thinking the conventional view that the book opposed known in international relations as realism was that the rise of any new global power results in global or regional instability as such china s development as a world economic powerhouse worried mainstream western geopolitical scholars whose concerns were based on the realist assumption that individual countries will inevitably compete for dominance evaluating these arguments and finding both their relevance and adequacy wanting kang instead turned traditional thinking on its head by looking at asian history without preconceptions and with analytical open mindedness producing several novel explanations for existing evidence kang concludes that china s neighbors do not want to compete with it in the way that realist interpretations predict rather than creating instability by jockeying for position he argues surrounding countries are happy for china to be acknowledged as a leader believing that its dominant position will stabilize asia and give the whole region more of a hand in international relations though critics have taken issue with kang s conclusions his paradigm shifting approach is nevertheless an excellent example of developing fresh new conclusions through creative thinking

China's Turbulent Quest 1972

this volume reviews china s social conditions in 2017 2018 issues discussed include trends in income and spending employment for college graduates social security system education system and others groups such as urban and rural residents university students and graduates receive special attention

An Analysis of David C. Kang's China Rising 2017-07-05

the book presents the comprehensive research findings on the basic features formation mechanisms and evolution laws of chinese enterprise migration from the micro perspective of enterprise migration and on this basis the influences from enterprise migration on industrial agglomeration and diffusion as well as the evolution of regional economy the migration trends power mechanisms determining factors structural and spatial effects of chinese manufacturing industry have also been studied the author also puts forward policy advice on the themes above such as the central government should pay more attention to the fairness goals in the market economy framework some policies should be improved to positively and reasonably guide and regulate firm relocation in china for example enterprises from chinese coastal areas should be encouraged to move to the mid and west areas the industrialization and urbanization in mid and west areas should be accelerated the economic development should be geared to the bearing capacity of natural resources and environment industries and economic activities should be promoted to agglomerate effectively in metropolitan regions this book provides a comprehensive analysis on the relocation of enterprises in china as well as the situation of china s regional economic development the author wei houkai as an authoritative economist on regional development of china completed his detailed survey on china s regional economy from this perspective of enterprise relocation together with his research group this book doubtlessly provides a valuable opportunity for readers in english world to obtain the realistic and rational messages about what is happening in china in certain domains the author whose policy advice has always been

adopted by the government of china raises some significant viewpoints based on his distinctive insight which may be influencing the regional development route in china contents regional economic development in china agglomeration and relocation wei houkai theoretical issues in the current regional economic development wei houkai a critical review of theoretical research on firm relocation bai mei characteristics and tendency of enterprise relocation in china wei houkai and bai mei dynamics and determinants of manufacturing location in china wang yeqiang and wei houkai manufacturing location change in china structural effects and spatial effects a test of the krugman hypothesis wang yeqiang and wei houkai manufacturing firm relocation in east china tendency and mechanism jiang yuanyuan changes in the location of taiwan invested it enterprises in mainland china and their relocation decisions wei houkai and li jing corporate headquarters relocation of listed companies and wealth transfer in china wei houkai and bai mei relocation mechanism and spatial agglomeration of enterprise r d activities liu changquan new industrial division and conflict management in metropolitan area based on the perspective of industrial chain division wei houkai analysis of urban industrial relocation s incentive approaches and effects taking beijing as an example fu xiaoxia wei houkai and wu lixue readership graduate students researchers and professionals interested in enterprise migration in china in particular the influences of enterprise migration on industrial agglomeration and diffusion keywords regional economy in china firm relocation micro perspectivekey features this book discusses china s regional economy from a distinguished perspective of enterprise migration which is a unique and effective way for the topicthe author is one of the most accomplished economists in china

Analysis and Forecast of China's Social Conditions (2018) 2021-11-22

is china becoming the workshop of the world in the same way as britain and the united states once were or is china as some multinational companies believe simply a processing segment in global production networks this book examines china s role in the international division of labor it analyzes the scale and scope of china s manufacture the type and relative sophistication of its exports in the world market and its position in the global value chain it shows that china monopolizes industrial production by being the processing center of world based on extensive original research this book examines the structure of production in global manufacturing industries applying both qualitative and quantitative methods it analyzes each segment of the value chain exploring in depth several specific industrial sectors it concludes that china has become deeply integrated into global manufacturing industry that china s position in the value chain is still quite low with relatively low research and development r d and other similar high value activities but that in some sectors china is catching up rapidly especially in newly emerging sectors

The Micro-Analysis of Regional Economy in China 2013-08-28

this book takes a holistic approach to explore how business is being conducted in china and india and to analyze the factors that influence business decisions in present times in doing so the book seeks to develop a fuller understanding of the present context within the two asian nations drawing upon a complete understanding of the culture history and behaviour of the society and its institutions the authors probe an area that has not been widely addressed before and seek to provide a finer analysis of the

influences behind day to day business operations this study has widespread appeal as it covers business processes at three different levels macro level including government policies and institutions meso level organisations and communities and micro level individuals within business not only appealing to scholars senior executives business professionals and policy makers this book will also provide an interdisciplinary examination of how business is conducted in china and india and will be valuable to anyone with a general interest in asian business

Conducting Business in China and India 2017-07-06

this book investigates various dimensions of the economic conflicts between the us and other democratic market economy countries and state capitalist communist china in the past decade examining how differences in institutions and ideology bring these about through the lens of institutional analysis the book elaborates and explains the underlying institutional designs and reasons behind the disputes highlighting how such variances are embedded and reflect fundamental value divergences between china and other democratic countries this book will be of key interest to scholars students and practitioners in law economics political sciences international relations international organisations and global governance

China and the WTO - A Critical Analysis 2012-11-30

Chinese outward direct investment (ODI) is growing rapidly in recent years as an important phenomenon in the global economy. China's ODI deserves more thorough analysis. This book looks at China's ODI activities from multiple perspectives with the rebalancing of China's own structural growth and China's shift towards a net capital exporter. Her initiatives such as One Belt One Road (OBOR) have brought profound implications to the traditional super-sovereign or multilateral financial and investment cooperation mechanism as her investment destinations and investment methods become more diversified and sophisticated. This book offers unique and refreshing insight into China's ODI activities. The book covers the whole range of history and policy development of China's ODI and analyses China's ODI trends and characteristics in the recent years. It reviews China's major policy changes after the Third Plenary Session of the 18th Central Committee of the Communist Party and how they may impact China's ODI strategy and activities. The book addresses potential challenges and risks of rising ODI activities from practitioners' perspective and discusses how recipient countries may react and respond to the surge of Chinese capital. The book also offers policy implications and future research agenda in relation to the Chinese investments.

Chinese Research Perspectives on Society, Volume 5 2019-10-21

The book endeavors to make a contribution to the regional typology of the Chinese economy. The Chinese provinces are classified into seven large regions. The interregional input-output table is constructed accordingly.

Ultimate Economic Conflict between China and Democratic Countries 2022-05-05

In recent years, in line with China's going out strategy announced in 2000, China's overseas investment activities have increased greatly and at increasing rates. By the end of 2009, the total value of China's outward foreign direct investment had reached US\$5.6 billion. Policies have played strong supporting roles in bringing about this trend by facilitating and encouraging Chinese companies to make overseas investments. This working paper summarises these policies based on an analysis of policy changes over time and identifies the main drivers of these changes. It also highlights some key research questions of relevance to deepening understanding of the impacts of Chinese trade and investment in Africa. The project 'Chinese Trade and Investment in Africa: Assessing and Governing Trade-offs to National Economies, Local Livelihoods and Forest Ecosystems' project launched in March 2010 aims to advance understanding of the social, economic and environmental impacts of Chinese investment in commodities or sectors affecting forests and livelihoods in Africa, e.g. timber, mining, agriculture and to strengthen the capacity of decision makers in government, civil society and the private sector to enact reforms to maximise social and economic benefits while minimising adverse effects.

From World Factory to Global Investor 2017-11-22

Many members of Congress charge that China's policy of accumulating foreign reserves, especially US dollars, to influence the value of its currency constitutes a form of currency manipulation intended to make its exports

cheaper and imports into china more expensive than they would be under free market conditions they further contend that this policy has caused a surge in the u s trade deficit with china and has been a major factor in the loss of u s manufacturing jobs although china made modest reforms to its currency policy in 2005 resulting in a modest appreciation of its currency many members contend the reforms have not gone far enough and have warned of potential legislative action this report summarizes the main findings in crs report rl32165 china s currency economic issues and options for u s trade policy by wayne m morrison and marc labonte and will be updated as events warrant

Interregional Input-output Analysis of the Chinese Economy 2003

china s breathtaking economic growth has often led observers to assume that the country s economic system has been transformed into a capitalist economy dominated by private enterprise although china s reliance on private enterprise and market based incentives has been growing and the ccp s treatment of private enterprises and entrepreneurs has been changing it would be a mistake to minimize the current role of the state and the ccp in shaping economic outcomes in china and beyond the chinese government and state owned enterprises soes remain potent economic forces indeed some of china s soes are among the largest firms in china and the world they are major investors in foreign countries they have been involved in some of the largest initial public offerings in recent years and remain the controlling owners of many major firms listed on chinese and foreign stock exchanges

Analysis of China's overseas investment policies 2012-01-02

fiscal policy has always been a primary measure of macroeconomic control the fiscal revenue and expenditure can influence the operation of the whole economic and social activities by changing the existing gdp distribution pattern affecting the consumption and investment of enterprises and people etc within the framework of macroeconomic analysis this book reviews the evolution of china s fiscal policy and the main changes china s economy has experienced since 1990s to begin with it makes an empirical research of china s national debts including their relationship with macroeconomic regulation and total social demand besides it examines the economic effect mechanism of national debts issuance then it focuses on the taxation issues elucidating the sources of tax revenue growth and the judgments on tax burden the issue of tax reduction is also covered especially its complexity in china lastly it provides insights into china s fiscal tendency changes of macroeconomic policies and financial operation in the context of the new normal scholars and students in economics finance and chinese economic studies will be attracted by this book also it will appeal to readers interested in modern chinese economic history

An Analysis of State-Owned Enterprises and State Capitalism in China 2011-10-26

over the past quarter century china has seen a dramatic increase in income inequality prompting a shift in china s development strategy and the adoption of an array of new policies to redistribute income promote shared growth and establish a social safety net drawing on of household level data from the china household income project changing trends in china s inequality provides an independent comprehensive and empirically grounded study of the evolution of incomes and inequality in china over time edited by leading experts on the chinese economy the volume analyzes this evolution in china as a whole as well as in the urban and rural sectors with close attention to measurement issues and to shifts in the economy institutions and public policy specific essays provides analyses of china s wealth inequality the emergence of a new middle class the income gap between the han majority and the ethnic minorities the gender wage gap and the impacts of government policies such as social welfare programs and the minimum wage

China's Fiscal Policy 2018-05-16

china s reform and opening up have contributed to its long term and rapid economic development resulting in a much stronger economic strength and much better life for its people meanwhile the deepening economic integration between china and the world has resulted in an increasingly complex environment growing influencing factors and severe challenges to china s economic development under the new normal of the chinese economy accurate analysis of the economic situation is essential to scientific decision making sustainable and healthy economic development and to build a moderately prosperous society in all respects by applying statistical and national economic accounting methods and based on detailed statistics and national economic accounting data this book presents an in depth analysis of the key economic fields such as real estate economy automotive industry high tech industry investment opening up income distribution of residents economic structure balance of payments structure and financial operation since the reform and opening up especially in recent years it aims to depict the performance and characteristics of these key economic fields and their roles in the development of national economy thus providing useful suggestions for economic decision making and facilitating the sustainable and healthy development of the economy and the realization of the goal of building a moderately prosperous society in all respects

China - Middle East Relations 2013

this book provides a detailed and up to date analysis of the current and near future domestic economic situation in china based on the concept of new normal which was first proposed by chinese president xi jinping and which is commonly used in discussions on china s current economy china s new normal is the result of the growing pressures on domestic resources environmental restrictions and unstable international economic recovery and characterized by a moderate economic increase a proper increase in commodity pricing

stabilizing new employment and optimizing economic structure the book argues that while china focuses on stability and quality in macro control and enhancing reform and innovation many contradictions and problems in economic operations are gradually being solved therefore optimizing the economic structure the book explores many aspects of china s economic development under the new normal while making analysis and policy suggestions for the present economic trends

Industrial Development in Pre-Communist China 1969

as the second volume of the two volume industrial development in modern china comparisons with japan that studies the different paths of industrialization and economic modernization between china and japan this book explores the process of economic and industrial development in the republic of china 1912 1949 backed up by extensive industrial statistical data gathered and rigorously analyzed by the author this book stands out from previous research that has been limited to theoretical inferences and general judgments with scarce empirical evidence so far from being a purely historical review of china s industrial development this book focuses on the internal logic of economic phenomena especially the relationship among economic variables reflected in economic data and it offers discussions within the framework of economic development theory it sheds light on how china came to be a comparative economic laggard in the period especially in comparison to japan the author uses multivariate statistical analysis to draw comparisons between the industrial development of china and that of japan focusing on outbound investment and its importance for economic growth this volume will appeal to academics and general readers interested in the economic development and modern economic history of east asia as well as development economics and industrial and technological history

Changing Trends in China's Inequality 2020-03-26

a notional analysis of chinese academic discourse on china presents an executive summary of chinese academic discourse about china s progress and achievements in the past one hundred years using a scientometric method to analyse bibliographic records retrieved from the largest library database in china on aspects of chinese studies this book offers an insider s view about social cultural historical and political aspects of china that have never been systematically published in english before this book first follows a quantitative approach using bibliometric analysis to identify keywords in the chinese academic works about china in conceptual clusters for the past hundred years then a qualitative method is adopted to select significant and representative discourses within each conceptual cluster by helping to establish two way communication and facilitate mutual understanding this book holds great potential for helping to resolve conflict and promoting peace this book offers an eye opening experience for anyone studying or researching chinese studies including related subjects such as chinese language culture and education or a broader subject within global politics economy sociology and culture which acknowledges china as a major player in the field

China's Global Role 1980

after more than three decades of rapid growth china is now entering into the new normal era which will be characterised by slower but sustainable quality growth for several decades to come how china will fare under the new normal era matters not only for itself but also for its great impact on global prosperity while presenting as the second instalment of aci s annual tracking of the dynamics of competitiveness among 34 greater china economies this

volume also includes the results of the inaugural regional competitiveness analysis for five regions of greater china as regional imbalance in socioeconomic advancement is a serious issue china has to face up to under the new normal era the results of such competitiveness analysis at provincial and regional levels offer insights for policy makers to help address concerns associated with the regional disparity in development and facilitate industry leaders and other stakeholders in identifying challenges and opportunities for sound decision making contents forewordprefaceacknowledgementsabout the authorslist of economieslist of abbreviationslist of tables and figuresorganisation structure and methodology2014 annual update on competitiveness ranking and simulation studies for 34 greater china economies2014 inaugural regional competitiveness analysis for greater chinacompetitiveness analysis on the eastern coastal area in china beijing fujian guangdong hainan hebei jiangsu shandong shanghai tianjin and zhejiangcompetitiveness analysis on the central china anhui henan hubei hunan jiangxi and shanxicompetitiveness analysis on the western china chongqing gansu guangxi guizhou inner mongolia ningxia qinghai shaanxi sichuan tibet xinjiang and yunnancompetitiveness analysis on the north eastern china heilongjiang jilin and liaoningcompetitiveness analysis on hong kong macau and taiwangeweke causality analysis on development strategies of jiangsu and taiwanconclusion and the way forward to the new normal for greater chinaappendices political development and social experiment in contemporary chinaprovincial level economies competitiveness analysis list of indicatorscompetitiveness analysis the algorithmregional competitiveness analysis list of indicators and notes on data aggregation method readership scholars and researchers interested in china s economic development categorized by provinces keywords greater china competitiveness provinces regional competitiveness development strategies public policy myriads of political economic and cultural factors are intertwined in east asia making this region both fascinating and challenging as a research topic aci has done a remarkable job in tracking and analysing the evolving competitiveness landscape of east asia and particularly greater china resulting in many excellent research findings which are of great reference value to east asian countries and the whole world shandong academy of social sciences will take every opportunity to cooperate with aci to study economic development in shandong province and its neighbouring regions dr tang zhouyan dean shandong academy of social sciences people s republic of china in the debate of pressing socioeconomic issues there has never been a shortage of advice purely hinged on qualitative reasoning or theoretical arguments what is lacking in public policy discourse is an evidence based quantitative approach driven by objective analysis of empirical data which is exactly what is embodied in the methodology crafted by aci to gauge competitiveness at sub national levels therefore the messages conveyed here will form an invaluable source of reference to inspire better government policy formulation as well as business strategic planning professor lee cheng few distinguished professor of finance and economics rutgers business school rutgers university and editor review of quantitative finance and accounting and review of pacific basin financial markets and policies

Statistical Analysis On Key Economic Areas Of China 2021-05-19

this volume is a major breakthrough in helping decipher and piece together the major interactive and flow investment dynamics within the complex chinese economic structure in an effort to guide global investors to formulate their own macro assessment and investment strategy in or related to china different from us that had a relatively short and ascending economic past china endured a much longer history with quite a few volatile economic cycles with that

lesson of history in the background as the country's guiding management principle china's economic policy and management superstructure combined with regional government business consumer and investment community form together a huge and complex operating environment of investment flow dynamics within which macro investment opportunities can be identified and strategies can be formulated by interested global and domestic investors

Economic Analysis and Forecast of China (2015) 2018-12-12

this book from a top international group of scholars explores the ways in which economic tools can be used to improve the quality of regulation in general and legislative tools in particular as the role of law becomes increasingly important in china the question arises of how effective regulatory and legislative tools can be developed to accompany the chinese evolution towards a welfare state china therefore provides a unique case study for scholars and policymakers interested in examining how regulation can play a role in promoting sustainable development economics and regulation in china goes beyond traditional economic analysis of law by focusing specifically on the question of how economic tools can guide the quality of legislation to this end the book centres in on three areas regulation as a tool of economic growth competition policy and environmental policy not only are these three domains of great importance for china but they are also relevant for a broad scholarship interested in the economic analysis of law this volume contributes to discussions on how ex ante evaluation of legislative proposals and ex post analysis can increase the effectiveness and efficiency of regulation using economic tools offering insights that go beyond the particular case of china the analysis offered by this book makes it an invaluable resource for academics and policymakers alike

Industrial Development in Modern China 2020-12-29

by analyzing the status quo of the industrial economy this book argues that the economic growth in china's industrial economy will continue to decline with industries becoming segmented more rapidly profitability slumping and economic structures being adjusted further it also provides policy recommendations to promote the healthy development of china's industrial economy using a wealth of data and figures it assesses the state of china's industrial economy in 2015 and the prospects for 2016 the perspective of this book is of course a chinese one thus helping readers to grasp what and how chinese people think about their country's industrial economy as such it not only represents a valuable resource for academic studies but will also appeal to all readers with an interest in the aspects discussed

A Notional Analysis of Chinese Academic Discourse on China 2023-11

this volume is the product of a conference jointly sponsored by the rand corporation and centre asie ifri and summarizes the discussions at the conference which was held in paris in june 2003 the chapters in the report were written by researchers from both organizations and subsequently edited to produce a mutually acceptable consensus document the resulting volume offers u s and french views of the evolution of chinese national security policy and military capabilities in the next two decades its aim is to examine the issues through a u s french prism and to facilitate analysis of how to develop u s european cooperation on relations with china

2014 Annual Provincial and Regional Competitiveness Analysis for Greater China Economies 2015-11-09

the china society yearbook 2006 provides analysis of and commentary on social issues in contemporary china broken down into chapters on different aspects of china's social development including change in social structure population growth employment standard of living and education
