virtual manufacturing presents a novel concept of combining human computer interfaces with virtual reality for discrete and continuous manufacturing systems the authors address the relevant concepts of manufacturing engineering virtual reality and computer science and engineering before embarking on a description of the methodology for building augmented reality for manufacturing processes and manufacturing systems virtual manufacturing is centered on the description of the development of augmented reality models for a range of processes based on cnc plc scada mechatronics and on embedded systems further discussions address the use of augmented reality for developing augmented reality models to control contemporary manufacturing systems and to acquire micro and macro level decision parameters for managers to boost profitability of their manufacturing systems guiding readers through the building of their own virtual

factory software virtual manufacturing comes with access to online files and software that will enable readers to create a virtual factory operate it and experiment with it this is a valuable source of information with a useful toolkit for anyone interested in virtual manufacturing including advanced undergraduate students postgraduate students and researchers

the ladder of divine ascent the work of an otherwise shadowy figure john climacus meaning of the ladder abbot of st catherine s sinai ca 579 649 ce is one of the most popular and enduring classics of greek ascetic spiritual direction hailed as the great synthesis of early ascetic writings the ladder presents a spirituality self consciously rooted in the literary and theological tradition of the desert fathers and the great old men of gaza despite its incredible popularity among monastic and lay readers the ladder is virtually unknown in scholarship in this work jonathan l zecher offers a sustained study of the ladder s spiritual vision which is

contextualized within an equally sustained genealogical survey of climacus own tradition the ladder is built up through the memory of death a term referring to admonitions of early authors to remember one s inevitable but unknowable death and to contemplate the divine judgment which would follow to cultivate particular ascetic christian lifestyles in their readers in the literature that formed climacus every aspect of the memory of death varied considerably but climacus draws these together in the ladder so that death and the judgment which follows defines a symbolic framework within which monks reflect on their past and approach the future climacus also took up metaphorical practices of dying to oneself and others to craft an idea of spiritual progress in the imitation of christ taking into account failure and frailty at the heart of this study is the abiding question of how tradition forms and in the ladder is an outstanding example of how unflinching fidelity to tradition results in a creative synthetic achievement
