Language Planning and Education in Australasia and the South Pacific 1990

first published in 1909 raymond unwins town planning in practice an
introduction to the art of designing cities and suburbs is an
extraordinary compendium of images and theories on urban design as a
member of the generation of planners following camillo sitte and
preceding the emergence of the modern planners of the 1920s unwins
considered planning a design based discipline rather than a purely
technical one he believed that artistic and practical criteria were
mutually supportive and carried this out in his work by creating plans
that represented a unity of art science and technology unwins is perhaps
the greatest figure of the garden city movement which has had a
tremendous impact on planning in both europe and the united states
although town planning has become the bible of neo traditionalist
planners this book is not a nostalgic view of past planning ideas rather
it is a useful forward looking book that holds valuable lessons for
today s planners its insightful critical analyses of many towns
throughout europe and the united states are accompanied by photographs
plans drawings and six foldout maps this reprint of town planning in
practice includes a new preface by andres duany and an introduction by
walter creese
