Tractor, high power, low speed traction vehicle and power unit mechanically similar to an automobile or truck but designed for use off the road. The two main types are wheeled, which is the earliest form, and continuous track tractors, which are commonly used in agriculture and construction. A tractor is an engineering vehicle specifically designed to deliver a high tractive effort or torque at slow speeds for the purposes of hauling a trailer or machinery such as that used in agriculture, mining or construction. A versatile and all-rounder vehicle used in agriculture, a tractor is a single solution for pulling, moving, ploughing, tilling and hauling soils and materials. Moreover, it can be coupled with trailers, rotary cutters, pallet forks and cultivators to create personalized, unique farming operations. A tractor is a vehicle with large rear wheels designed for lifting, pulling and pushing heavy loads. It gets its name from the fact that it's designed to deliver high traction at low speed. Its main characteristics include four-wheel drive, power steering and a diesel engine. This John Deere tractor is doing both at the same time: the tractor powers the machinery inside the hay baler it's pulling behind it. Tractors have large and powerful diesel engines, just like bulldozers, cranes, railroad trains, ships and other giant machines.
