Facilities Management Contracts 2008

2008

the term facilities management has become global but fraught with confusion as to what the term signifies for some notably in the usa facilities management remains a discipline of human ecology elsewhere the term has become conflated with an alternative meaning providing or outsourcing the provision of various services essential to the operation of particular buildings this volume redresses that imbalance to remind facilities management of its roots presenting evidence of facilities management success stories that engage the wider objectives of the organizations they serve and engaging students scholars and critical practitioners of general management with an appreciation of the power and influence of physical space and its place in the theory and practice of organizations this book includes management perspectives from outside the field to ensure that the issues raised are seen in an organizational and management context informing debate within the facilities management fraternity it draws on human ecology and the perspective of the firm as itself an intra organizational ecology of social constructs the ecology of a firm is not restricted to the firm s boundaries it extends to wider relationships between the firm and its stakeholders including in an age of outsourced building services the facilities management supply chain this volume offers arguments and evidence that managing such constructs is a key role for facilities management and an important participant in the provision of truly usable spaces

Facilities Management

2013

facilities management fm and corporate real estate management crem are two closely related and relatively new management disciplines with developing international professions and increasing academic attention both disciplines have from the outset a strong focus on controlling and reducing cost for real estate facilities and related services in recent years there has been a change towards putting more focus on how fm crem can add value to the organisation this book is driven by the need to develop a widely accepted and easily applicable conceptual framework of adding value by fm and crem it presents the state of the art of theoretical knowledge and empirical evidence about the impact of buildings and facilities on 12 value parameters and how to manage and measure these values the findings are connected to a new value adding management model the book is research based with a focus on guidance to practice it offers a transdisciplinary approach integrating academic knowledge from a variety of different fields with practical experience it also includes 12 interviews with practitioners shedding light as to how they manage adding value in practice this is a much needed resource for practitioners researchers and teachers from the field of fm and crem as well as students at both undergraduate and postgraduate level
