Parenting is the most amazing adventure one could have; it is also the most challenging and the most rewarding experience. Most parenting books usually talk about many aspects of parenting and also give many directions to deal with different kinds of challenges, although they all are valid and have the right intentions. What they lack are simple action items. This makes the process complicated and confusing. It is precisely for this reason that the 7 most important skills of parenting were identified and presented through easy-to-understand examples and simple action items. 7 Skills of Amazing Parents de-clutters many ideas about parenting and presents only the most important and valuable ones. This does not mean that the other skills are not required, but only that these

7 skills will initiate you in the right direction
