serious difficulties facing the developer of international information systems i e supporting business functions in different countries are widely known and their propensity to catastrophic failure has been acknowledged among practitioners for quite some time despite the often pivotal importance that such systems generally have scholarly research in this field has been surprisingly sparse information technology applications with a global range and reach are still largely unstudied and under explored subsequently there is a distinct dearth of theoretical frameworks for dealing with them after a career in information technology line management i have been involved with multinational enterprises and their information systems for over a decade as a consultant working in africa the uk continental europe north america and australasia it was on joining a university in the early nineties that i discovered the near vacuum in this field of research when i decided to make international information systems my field of research it became clear that fairly fundamental work needed to be done i started the project described further on more than 10 years ago it turned out a fairly difficult necessarily broad based and eventually longitudinal research this textbook offers students a systematic guide to how information systems underpin organisational activity in today s global information society covering everything from ict infrastructure and the digital environment to electronic marketing mobile commerce and design thinking while academically rigorous and underpinned by the author s deep knowledge of the subject an engaging writing style combined with extensive pedagogical features cases and innovative examples from around the world ensure that the text remains accessible to those approaching the topic for the first time taking an approach that views businesses as complex systems the book illustrates how valuable systems thinking can be in our everyday working lives while theoretical ideas are always supported by examples of their application in the real world this text is the ideal course companion for all students studying business information
