Distributed Computing and Networking

2013-01-05

this book constitutes the refereed proceedings of the 14th international conference on distributed computing and networking icdcn 2013 held in mumbai india during january 3 6 2013 the 27 revised full papers 5 short papers presented together with 7 poster papers were carefully reviewed and selected from 149 submissions the papers cover topics such as distributed algorithms and concurrent data structures integration of heterogeneous wireless and wired networks distributed operating systems internetworking protocols and internet applications distributed database systems mobile and pervasive computing context aware distributed systems embedded distributed systems next generation and converged network architectures experiments and performance evaluation of distributed systems overlay and peer to peer networks and services fault tolerance reliability and availability home networking and services multiprocessor and multi core architectures and algorithms resource management and quality of service self organization self stabilization and autonomic computing network security and privacy high performance computing grid computing and cloud computing energy efficient networking and smart grids security cryptography and game theory in distributed systems sensor pan and ad hoc networks and traffic engineering pricing network management

NURSING: Solved Question Papers for BSc Nursing—4th Year (2012-1999)

2012

at the 19th annual conference on parallel computational fluid dynamics held in antalya turkey in may 2007 the most recent developments and implementations of large scale and grid computing were presented this book comprised of the invited and selected papers of this conference details those advances which are of particular interest to cfd and cfd related communities it also offers the results related to applications of various scientific and engineering problems involving flows and flow related topics intended for cfd researchers and graduate students this book is a state of the art presentation of the relevant methodology and implementation techniques of large scale computing

Parallel Computational Fluid Dynamics 2007

2009-04-21

being the premier forum for the presentation of new advances and research results in the fields of industrial engineering ieem 2014 aims to provide a high level international forum for experts scholars and entrepreneurs at home and abroad to present the recent advances new techniques and applications face and face to promote discussion and interaction among academics researchers and professionals to promote the developments and applications of the related theories and technologies in universities and enterprises and to establish business or research relations to find global partners for future collaboration in the field of industrial engineering all the goals of the international conference are to fulfill the mission of the series conference which is to review exchange summarize and promote the latest achievements in the field of industrial engineering and engineering management over the past year and to propose prospects and vision for the further development

Proceedings of the 21st International Conference on Industrial Engineering and Engineering Management 2014

2015-01-06

this book constitutes the refereed proceedings of the 9th ifip wg 5 5 socolnet advanced doctoral conference on computing electrical and industrial systems doceis 2018 held in costa de caparica portugal in may 2018 the 30 revised full papers presented were carefully reviewed and selected from 74 submissions the papers present selected results produced in engineering doctoral programs and focus on technological innovation for resilient systems research results and ongoing work are presented illustrated and discussed in the following areas collaborative systems decision support systems supervision systems energy management smart grids sensing systems electrical systems simulation and analysis monitoring systems and energy distribution systems

Technological Innovation for Resilient Systems

2018-04-23

success in evaluation takes a fundamentally different approach to the mainstream supply side discussion of evaluation quality utilization and learning the contributors believe that a systematic focus on success will lead to increased awareness of evaluation and its findings a more positive attitude and a greater chance of actual evaluation use this book offers many different lessons on how to improve evaluation design research processes and reporting it is a realistic look at performance management the evidence movement and the demand barriers that so often block the role evaluators can play in organizational learning and decision making international case studies and lessons are included that both explain success oriented methods and share insightful lessons from the real world together they present a

convincing case that evaluation for success allows for increased constructive interaction amongst both stakeholders and evaluators and as a result learning processes and outcomes will improve

Climate Change Adaptation from Geotechnical Perspectives

2015-06-01

bachelor thesis from the year 2007 in the subject business economics business management corporate governance grade 1.7 university of applied sciences neuss fom fachhochschule für oekonomie management neuss language english abstract in view of the growing competition the increased change in customers wants and the potential of new communication and information technologies more and more companies are faced with the need to permanently adjust and further develop their processes products and offer to be able to exist in the market a company must be in a position to recognise future developments early and include them in the strategy a company should therefore use management instruments which make it able to adjust strategies quickly and communicate them transparently in the whole company there is increasing criticism of the classical controlling instruments it is argued that controlling is supposed to provide management relevant data for the management which do not only include financial historical information as so far but also include future related non monetary figures against this background the balanced scorecard bsc is becoming more important it extends the previous focus on finance issues to assess the performance of a company with a range of other aspects and ratios the customer perspective the internal process perspective and the learning and development perspective are supposed to be considered equally next to the financial perspective in the bsc the targets of this thesis are split into a main target and a sub target the main target of this paper is split again into two parts the first part of the main target is to show and to explain the relevant theoretical framework of the bsc in particular to strategic controlling the second part of the main target is to analyse the bsc as a strategic management system and to give an overview about this strategic controlling tool as it is seen in academic literature the sub target of this paper is to provide a link between theory and practice by applying the theory to a current example taken from the insurance industry the result is a recommendation for a bsc as a strategic controlling instrument for that specific insurance company with this specific bsc for an insurance company comes also a tool for a well structured evaluation of the chances and risks involved with its application

Success in Evaluation

2023-12-12

the international conference on industrial engineering and engineering management is sponsored by the chinese industrial engineering

institution cmes which is the only national level academic society for industrial engineering the conference is held annually as the major event in this arena being the largest and the most authoritative international academic conference held in china it provides an academic platform for experts and entrepreneurs in the areas of international industrial engineering and management to exchange their research findings many experts in various fields from china and around the world gather together at the conference to review exchange summarize and promote their achievements in the fields of industrial engineering and engineering management for example some experts pay special attention to the current state of the application of related techniques in china as well as their future prospects such as green product design quality control and management supply chain and logistics management to address the need for amongst other things low carbon energy saving and emission reduction they also offer opinions on the outlook for the development of related techniques the proceedings offers impressive methods and concrete applications for experts from colleges and universities research institutions and enterprises who are engaged in theoretical research into industrial engineering and engineering management and its applications as all the papers are of great value from both an academic and a practical point of view they also provide research data for international scholars who are investigating chinese style enterprises and engineering management

Coordination and Control of Power Converters in Modern Power Systems

2007-08-01

the two volume set Incs 3644 and Incs 3645 constitutes the refereed proceedings of the international conference on intelligent computing icic 2005 held in hefei china in august 2005 the program committee selected 215 carefully revised full papers for presentation in two volumes from over 2000 submissions based on rigorous peer reviews the first volume includes all the contributions related with perceptual and pattern recognition informatics theories and applications computational neuroscience and bioscience models and methods and learning systems the second volume collects the papers related with genomics and proteomics adaptation and decision making applications and hardware and other applications

Analysis of the Balanced Scorecard as a strategic controlling instrument with an example from the insurance industry

2009

strategic performance management brings together the fields of strategic management strategic management accounting and organizational behaviour to analyse and improve the link between organizational strategy systems of planning and control and performance driven behaviour by assessing market conditions and customer expectations and linking them to a solid operating plan an organization can focus its resources on activities that produce the greatest return on investment strategic performance management teaches readers whether business students or executives how to avoid errors and counter ineffectiveness it provides methods and techniques to implement strategic performance management and support organizations in their pursuit of more performance driven behaviour and better performance new to this edition new introductory chapter defining strategic performance management its processes and its benefits revised chapter considering ict architecture for strategic performance management systems revised and improved coverage of performance pay strategic action plans and barriers for implementing strategic performance management updated and revised case studies strategic performance management is an ideal text for students on mba programmes or covering strategic performance management or management control on specialist postgraduate courses or final year undergraduate modules it will also appeal to business executives keen to build a more successful and more profitable organization

The 19th International Conference on Industrial Engineering and Engineering Management

2005-08-11

the handbook of discrete and computational geometry is intended as a reference book fully accessible to nonspecialists as well as specialists covering all major aspects of both fields the book offers the most important results and methods in discrete and computational geometry to those who use them in their work both in the academic world as researchers in mathematics and computer science and in the professional world as practitioners in fields as diverse as operations research molecular biology and robotics discrete geometry has contributed significantly to the growth of discrete mathematics in recent years this has been fueled partly by the advent of powerful computers and by the recent explosion of activity in the relatively young field of computational geometry this synthesis between discrete and computational geometry lies at the heart of this handbook a growing list of application fields includes combinatorial optimization

computer aided design computer graphics crystallography data analysis error correcting codes geographic information systems motion planning operations research pattern recognition robotics solid modeling and tomography

Creativity, Competence and the International Dimension

2017-09-16

this book constitutes the refereed proceedings of the 11th international conference on modelling tools and techniques for computer communication system performance evaluation tools 2000 held in schauburg il usa in march 2000 the 21 revised full papers presented were carefully reviewed and selected from a total of 49 submissions also included are 15 tool descriptions and one invited paper the papers are organized in topical sections on queueing network models optimization in mobile networks stochastic petri nets simulation formal methods and performance evaluation and measurement tools and applications

Advances in Intelligent Computing

2017-11-22

this book presents the proceedings of the seventh international conference on management science and engineering management icmsem2013 held from november 7 to 9 2013 at drexel university philadelphia pennsylvania usa and organized by the international society of management science and engineering management sichuan university chengdu china and drexel university philadelphia pennsylvania usa the goals of the conference are to foster international research collaborations in management science and engineering management as well as to provide a forum to present current research findings the selected papers cover various areas in management science and engineering management such as decision support systems multi objective decisions uncertain decisions computational mathematics information systems logistics and supply chain management relationship management scheduling and control data warehousing and data mining electronic commerce neural networks stochastic models and simulation fuzzy programming heuristics algorithms risk control organizational behavior green supply chains and carbon credits the proceedings introduce readers to novel ideas on and different problem solving methods in management science and engineering management we selected excellent papers from all over the world integrating their expertise and ideas in order to improve research on management science and engineering management

Basics of Computer Application

2003-06-29

neutrosophic sets and systems has been created for publications on advanced studies in neutrosophy neutrosophic set neutrosophic logic neutrosophic probability neutrosophic statistics that started in 1995 and their applications in any field such as the neutrosophic structures developed in algebra geometry topology etc some articles in this issue parameter reduction of neutrosophic soft sets and their applications geometric programming ngp problems subject to operator the minimum solution ngpr homeomorphism in neutrosophic topological spaces generalized neutrosophic separation axioms in neutrosophic soft topological spaces

Strategic Performance Management

2013-09-25

neutrosophic sets and systems has been created for publications on advanced studies in neutrosophy neutrosophic set neutrosophic logic neutrosophic probability neutrosophic statistics that started in 1995 and their applications in any field such as the neutrosophic structures developed in algebra geometry topology etc

Handbook of Discrete and Computational Geometry

2017-01-30

the implementation of effective decision making protocols is crucial in any organizational environment in modern society emerging advancements in technology and analytics have optimized uses and applications of decision making systems decision management concepts methodologies tools and applications is a compendium of the latest academic material on the control support usage and strategies for implementing efficient decision making systems across a variety of industries and fields featuring comprehensive coverage on numerous perspectives such as data visualization pattern analysis and predictive analytics this multi volume book is an essential reference source for researchers academics professionals managers students and practitioners interested in the maintenance and optimization of decision management processes

Computer Performance Evaluation. Modelling Techniques and Tools

1927

organizations can use the valuable tool of data envelopment analysis dea to make informed decisions on developing successful strategies setting specific goals and identifying underperforming activities to improve the output or outcome of performance measurement the handbook of research on strategic performance management and measurement using data envelopment analysis highlights the advantages of using dea as a tool to improve business performance and identify sources of inefficiency in public and private organizations these recently developed theories and applications of dea will be useful for policymakers managers and practitioners in the areas of sustainable development of our society including environment agriculture finance and higher education sectors

Proceedings of the Seventh International Conference on Management Science and Engineering Management

1985

organizations of all types are consistently working on new initiatives product lines and workflows as a way to remain competitive in the modern business environment no matter the type of project at hand employing the best methods for effective execution and timely completion of the task is essential to business success operations and service management concepts methodologies tools and applications is a comprehensive reference source for the latest research on business operations and production processes it examines the need for a customer focus and highlights a range of pertinent topics such as financial performance measures human resource development and business analytics this multi volume book is ideally designed for managers professionals students researchers and academics interested in operations and service management

Neutrosophic Sets and Systems, Vol. 32, 2020

2013-08-31

this book constitutes the proceedings of the 15th international workshop on cryptographic hardware and embedded systems ches 2013 held in santa barbara ca usa in august 2013 the 27 papers presented were carefully reviewed and selected from 132 submissions the

papers are organized in the following topical sections side channel attacks physical unclonable function lightweight cryptography hardware implementations and fault attacks efficient and secure implementations elliptic curve cryptography masking side channel attacks and countermeasures

Neutrosophic Sets and Systems, Book Series, Vol. 32, 2020. An International Book Series in Information Science and Engineering

Decision Management: Concepts, Methodologies, Tools, and Applications

2013-07-19

vagueness is a familiar but deeply puzzling aspect of the relation between language and the world it is highly controversial what the nature of vagueness is a feature of the way we represent reality in language or rather a feature of reality itself may even relations like identity or parthood be affected by vagueness sorites arguments suggest that vague terms are either inconsistent or have a sharp boundary the account we give of such paradoxes plays a pivotal role for our understanding of natural languages if our reasoning involves any vague concepts is it safe from contradiction do vague concepts really lack any sharp boundary if not why are we reluctant to accept the existence of any sharp boundary for them and what rules of inference can we validly apply if we reason in vague terms cuts and clouds presents the latest work towards a clearer understanding of these old puzzles about the nature and logic of vagueness the collection offers a stimulating series of original essays on these and related issues by some of the world s leading experts

Miscellaneous Publication

this book includes a set of rigorously reviewed world class manuscripts addressing and detailing state of the art research projects in the areas of industrial electronics technology automation telecommunications and networking the book includes selected papers from the conference proceedings of the international conference on industrial electronics technology automation ieta 2006 and international conference on telecommunications and networking tene 06

Handbook of Research on Strategic Performance Management and Measurement

Using Data Envelopment Analysis

2022-01-04

this open access book provides a comprehensive overview of the core subjects comprising mathematical curricula for engineering studies in five european countries and identifies differences between two strong traditions of teaching mathematics to engineers the collective work of experts from a dozen universities critically examines various aspects of higher mathematical education the two eu tempus iv projects metamath and mathgear investigate the current methodologies of mathematics education for technical and engineering disciplines the projects aim to improve the existing mathematics curricula in russian georgian and armenian universities by introducing modern technology enhanced learning tel methods and tools as well as by shifting the focus of engineering mathematics education from a purely theoretical tradition to a more applied paradigm metamath and mathgear have brought together mathematics educators tel specialists and experts in education quality assurance form 21 organizations across six countries the results of a comprehensive comparative analysis of the entire spectrum of mathematics courses in the eu russia georgia and armenia has been conducted have allowed the consortium to pinpoint and introduce several modifications to their curricula while preserving the generally strong state of university mathematics education in these countries the book presents the methodology procedure and results of this analysis this book is a valuable resource for teachers especially those teaching mathematics and curriculum planners for engineers as well as for a general audience interested in scientific and technical higher education

Operations and Service Management: Concepts, Methodologies, Tools, and Applications

2016-01-29

this book constitutes the refereed proceedings of three workshops on the application of evolutionary programming and algorithms in various domains these workshops were held in conjunction with the 5th european conference on genetic programming eurogp 2002 in kinsale ireland in april 2002 the 33 revised full papers presented were carefully reviewed and selected by the respective program committees in accordance with the three workshops evocop evoiasp and evostim evoplan the papers are organized in topical sections on combinatorial optimization problems image analysis and signal processing and scheduling timetabling and ai planning

Cryptographic Hardware and Embedded Systems -- CHES 2013

2007-09-04

this book constitutes the refereed proceedings of the 30th international conference on logic based program synthesis and transformation lopstr 2020 which was held during september 7 9 2020 the 15 papers presented in this volume were carefully reviewed and selected from a total of 31 submissions the book also contains two invited talks in full paper length the contributions were organized in topical sections named rewriting unification types verification model checking and probabilistic programming program analysis and testing and logics

Kristy and the Middle School Vandal (The Baby-Sitters Club Mystery #25)

2018-07-16

the two volume set ccis 143 and ccis 144 constitutes the refereed proceedings of the international conference on electronic commerce application and communication ecwac 2011 held in guangzhou china in april 2011 the 148 revised full papers presented in both volumes were carefully reviewed and selected from a large number of submissions providing a forum for engineers scientists researchers in electronic commerce application and communication fields the conference will put special focus also on aspects such as e business e learning and e security intelligent information applications database and system security image and video signal processing pattern recognition information science industrial automation process control user machine systems security integrity and protection as well as mobile and multimedia communications
