**Advances on P2P, Parallel, Grid, Cloud and
Internet Computing 2019-10-19**

this book presents the latest research findings innovative research results
methods and development techniques related to p2p grid cloud and internet
computing from both theoretical and practical perspectives it also reveals the
synergies among such large scale computing paradigms p2p grid cloud and
internet computing technologies have rapidly become established as
breakthrough paradigms for solving complex problems by enabling aggregation
and sharing of an increasing variety of distributed computational resources at
large scale grid computing originated as a paradigm for high performance
computing as an alternative to expensive supercomputers through different
forms of large scale distributed computing p2p computing emerged as a new
paradigm after client server and web based computing and has proved useful in
the development of social networking b2b business to business b2c business to
consumer b2g business to government and b2e business to employee cloud
computing has been defined as a computing paradigm where the boundaries of
computing are determined by economic rationale rather than technical limits
and it has fast become a computing paradigm with applicability and adoption in
all application domains and which provides utility computing at a large scale
lastly internet computing is the basis of any large scale distributed computing
paradigms it has developed into a vast area of flourishing fields with enormous
impact on today s information societies and serving as a universal platform
comprising a large variety of computing forms such as grid p2p cloud and
mobile computing
