fresh exciting and vividly readable this is popular history at its very best our understanding of world history is changing as new discoveries are made on all the continents and old prejudices are being challenged in this truly global journey political journalist andrew marr revisits some of the traditional epic stories from classical greece and rome to the rise of napoleon but surrounds them with less familiar material from peru to the ukraine china to the caribbean he looks at cultures that have failed and vanished as well as the origins of today s superpowers and finds surprising echoes and parallels across vast distances and epochs a history of the world is a book about the great change makers of history and their times people such as cleopatra genghis khan galileo and mao but it is also a book about us for the better we understand how rulers lose touch with reality or why revolutions produce dictators more often than they produce happiness or why some parts of the world are richer than others the easier it is to understand our own times

this engaging volume tells the story of how the great political visions and idealisms of victorian britain came to be defeated by a culture of consumerism celebrity and self gratification it explains how in each decade political leaders found themselves confounded by the british people who always turned out to be harder to herd than predicted historically britain has been a country on the edge first of invasion then of bankruptcy then on the vulnerable front line of the cold war and later in the forefront of the great opening up of capital and migration this history follows all the political and economic stories of the modern era as well as with such social trends as comedy cars the war against homosexuals oil men and punks margaret thatcher s wonderful good luck political lies and the true heroes of british theater between the death of queen victoria and the turn of the millennium britain has been utterly transformed by an extraordinary century of war and peace a history of 20th century britain collects together for the first time andrew marr s two bestselling volumes a history of modern britain and the making of modern britain together they tell the story of how the country recovered from the grand wreckage of the british empire only to stumble into a series of monumental upheavals from world wars to cold wars and everything in between in each decade political leaders thought they knew what they were doing but found themselves confounded every time the british people turned out to be stropplier and harder to herd than predicted this wonderfully entertaining history follows all the political and economic stories but deals too with the riotous colour of an extraordinary century a century of trenches flappers and spitfires of comedy punks margaret thatcher s wonderful good luck and the

triumph of shopping over idealism like millions of others andrew marr draws he hasn't had lessons yet since childhood the journalist and tv presenter has been at his happiest with a pen or brush in his hand one way or another he draws most days even if it's just a doodle on the edge of a newspaper but why does he do it does it have a point and in what way if any does this activity of his relate to what we think of as art in this intriguing new book andrew marr explores the subject of drawing and painting through his own experience he considers the mechanics of the drawing process the act of making and its importance for a happy life along with the ways in which good drawing or painting can make us think harder and see the world differently he also investigates the tensions between drawing as concentrated work and drawing as an expression of freedom or play and looks at the historical differences between drawing and fine art as well as how drawing fits into today's art world

in the making of modern britain andrew marr paints a fascinating portrait of life in britain during the first half of the twentieth century as the country recovered from the grand wreckage of the british empire between the death of queen victoria and the end of the second world war the nation was shaken by war and peace the two wars were the worst we had ever known and the episodes of peace among the most turbulent and surprising as the political forum moved from edwardian smoking rooms to an increasingly democratic westminster the people of britain experimented with extreme ideas as they struggled to answer the question how should we live socialism fascism feminism meanwhile fads such as eugenics vegetarianism and nudism were gripping the nation while the popularity of the music hall soared it was also a time that witnessed the birth of the media as we know it today and the beginnings of the welfare state beyond trenches flappers and spitfires this is a story of strange cults and economic madness of revolutionaries and heroic inventors sexual experiments and raucous stage heroines from organic food to drugs nightclubs and celebrities to package holidays crooked bankers to sleazy politicians the echoes of today's britain ring from almost every page marr is back and better than ever el entendimiento de la historia mundial está cambiando la antigua visión eurocentrista se ha ido transformado progresivamente y ha dado paso a un discurso inclusivo donde américa África y asia juegan su papel y dejan de estar aisladas de los grandes acontecimientos históricos por ejemplo recientemente se ha desvelado que la liberación de los siervos en rusia contemporánea de la guerra civil americana fue

el detonante de la abolición de la esclavitud en los estados unidos una historia del mundo es un libro sobre los impulsores de los grandes cambios históricos personajes como cleopatra gengis kan galileo o mao pero también sobre nosotros mismos our understanding of world history is changing the old eurocentric vision is gradually transforming into an inclusive discourse in which the americas africa and asia are no longer seen as isolated from major historical events for example it has recently been argued that the liberation of serfs in russia contemporary with the american civil war was the catalyst for the abolition of slavery in the united states two corpses a country on the edge of a political precipice a conspiracy so bold it would make machiavelli wince andrew marr s debut novel imagines what really might be going on behind the door of 10 downing street more than just an anthology we british is a history of britain told through its poetry written by britain s most celebrated political commentator for world poetry day looking at how britain pays its way in the world today like andrew marr s history of modern britain or michael palin s himalaya the book will have a coherence and life beyond the television series mirroring its basic structure but looking at some issues in greater depth and telling additional stories to illustrate some of the ideas this book is about the things that britain produces in order to pay its way in the world from physical goods that we can see and feel to intangible services that are much harder to quantify we don t have to be prejudiced in favour of certain types of value we shouldn t assume finance is modern and manufacturing out of date for example what matters is what sells and for how much from manufacturing to technology design and the services industries this book will provide a cutting edge analysis via entertaining stories about what we make and why it matters all about politics with a foreword by andrew marr covers all the big ideas and powerful people in politics enabling your child to join the debate and get their voice heard all about politics is a straight talking guide to how politics really work all the political structures and ideas are covered from ancient greek philosophy to modern governments you can find out how different systems and beliefs have developed the ways in which laws are made what happens behind the scenes in parliament and how you can get involved and it clearly explains those tricky words and definitions with bright graphics and clever illustrations that kids will love from famous leaders to great speeches revolutions to age old traditions your child will discover all about the really big political issues in the world today andrew marr turns his attention to the monarch and to the monarchy chronicling the queen s pivotal role at the centre of the state which is largely hidden from the public gaze and making a strong case for the institution itself
