citrix presentation server allows remote users to work off a network server as if they weren't remote that means incredibly fast access to data and applications for users no third party vpn connection and no latency issues all of these features make citrix presentation server a great tool for increasing access and productivity for remote users unfortunately these same features make citrix just as dangerous to the network it's running on by definition citrix is granting remote users direct access to corporate servers achieving this type of access is also the holy grail for malicious hackers to compromise a server running citrix presentation server a hacker need not penetrate a heavily defended corporate or government server they can simply compromise the far more vulnerable laptop remote office or home office of any computer connected to that server by citrix presentation server all of this makes citrix presentation server a high value target for malicious hackers and although it is a high value target citrix presentation servers and remote workstations are often relatively easily hacked because they are often times deployed by overworked system administrators who haven't even configured the most basic security features offered by citrix the problem in other words isn't a lack of options for securing citrix instances the problem is that administrators aren't using them eweek october 2007 in support of this assertion security researcher petko d petkov aka pdp said in an oct 4 posting that his recent testing of citrix gateways led him to tons of wide open citrix instances including 10 on government domains and four on military domains the most comprehensive book published for system administrators providing step by step instructions for a secure citrix presentation server special chapter by security researcher petko d petkov aka pdp detailing tactics used by malicious hackers to compromise citrix presentation servers companion site contains custom citrix scripts for administrators to install configure and troubleshoot citrix presentation server

by examining their production practices in a variety of genres including manuscript illustration glass painting and staining tapestry manufacture portrait painting and engraving this book explores how netherlandish artists migrating to england in the early modern period overcame difficulties raised by their outsider status this study examines for the first time in this context the challenges of alien status to artistic production and the effectiveness of cooperation as a countermeasure the author demonstrates that collaboration was chief among the strategies that these foreigners chose to secure a position in london s changing art market curd s exploration of these collaborations primarily follows pierre bourdieu s model of establishment and challenger in which dominance in a field of cultural production depends upon how much cultural political and economic capital can be accumulated and the effectiveness of the strategies used to confront competition the analysis presented here challenges received opinion that a collaborative work is only a joint effort of artists working together on a single monument by demonstrating that the participation of patrons and middlemen can also shape the final appearance of a work of art furthermore this book shows that the strategic use of collaboration served the goal of competition by helping to establish foreign artists in the london art market and suggests that their coping strategies have implications for the study of immigrant behaviors today

russian businesses in the post soviet period have been noted for their unusual sometimes allegedly corrupt business practices and for their role in the enrichment of oligarchs this book which includes a wide range of case study examples and which draws on the author s first hand experience of running a russian company argues that a key to understanding contemporary russian business is the importance of arbitrage that is the ability to take advantage of price and cost differentials in different markets the book argues that the conditions for such arbitrage advantages are often created by businesses which have special links to particular institutions that arbitrage benefits are not available to all businesses in a sector thereby providing unfair competitive advantages to some businesses and that businesses overall activities are often distorted by this system the book includes an analysis of a wide range of different types of arbitrage activities in action

business process management and workflow are by their very nature social activities the collaboration and communication patterns that are now increasingly referred to as social computing were also fundamental to the bpm and workflow models of the early 1990s yet it has been the recent explosion of social computing and accompanying success of social production from linux to wikipedia and facebook to twitter which have had the most dramatic impact on collaboration in business environments today we see the transformation of both the look and feel of bpm technologies along the lines of social media as well as the increasing adoption of social tools and techniques democratizing process development and design it is along these two trend lines the evolution of system interfaces and the increased engagement of stakeholders in process improvement that social bpm has taken shape table of contents the quantum organization how social technology will displace the newtonian view the role of trust and reputation in social bpm change management processes how to link bpm governance and social collaboration through an adaptive paradigm leveraging social bpm for enterprise transformation bpm social technology collaboration and the workplace of the future a model driven approach to social bpm applications how social technologies enhance the bpm experience for all participants voice of the network through social bpm evidence based service listening to customers to improve customer service processes taking channel and distribution management social and contextual social technology makes the world a better place pro bono bpm dynamic clinical pathways adaptive case management for medical professionals a case study of bpm in a kaizen environment next generation social media alignment
