Agrarian Capitalism in Theory and Practice

2017-10-10

susan mann focuses on a longstanding controversy in sociological theory why has agriculture been traditionally resistant to wage labor capitalist development has been slower and more uneven in agriculture than in other spheres of production and major parts of the rural economy remain almost preindustrial in their reliance on family labor lack of separation between industry and household and failure to develop a highly specialized division of labor emphasizing the agriculture of the american south mann adopts an interdisciplinary approach drawing insights from history and economics as well as sociology mann points out that most theories of agrarian capitalism both marxist and non marxist ignore the implications of agriculture as a production process centered in nature with natural features that cannot be synchronized easily into the tempos required by industrial production she argues that various natural and technical features of agricultural production such as the relatively lengthy production time of certain crops and the irregular labor requirements imposed by seasonal production make some types of farming particularly risky avenues for capitalist investment to test this pioneering theory of natural obstacles to rural capitalist development mann creatively combines diverse research methodologies analyzing u s agricultural census data she shows the correlations between type of agricultural commodity or crop produced the natural and technical features of these rural commodities and the use of wage labor using an historical comparative approach she investigates the persistence of nonwage labor in american cotton production after the civil war she examines why sharecropping rather than wage labor replaced slavery in the older cotton producing regions of the southeastern united states she then discusses the domestic and international factors that finally led to the demise of sharecropping and the rise of wage labor in the decades following the great depression in this historical study of the rise and demise of sharecropping the interplay between nature gender race and class is highlighted by closely examining both natural and social obstacles to wage labor within the context of a global economy mann presents not only an intriguing analysis of agrarian capitalist development but also an entirely new framework for examining the social history of the american south originally published in 1990 a unc press enduring edition unc press enduring editions use the latest in digital technology to make available again books from our distinguished backlist that were previously out of print these editions are published unaltered from the original and are presented in affordable paperback formats bringing readers both historical and cultural value

Systems Theory Applied to Agriculture and the Food Chain

1990-09-30

biological and physiological systems animal sciences plant animal interactions in northern temperate sown grasslands and semi natural vegetation exploitation of the systems approach in technical design of agricultural enterprises application of systems theory to farm planning and control modelling resource allocation optimising the mixture of enterprises in a farming system farming systems research extension food policy and food security planning institutional approaches to modelling grain markets and food security in sub saharan africa a systems view of commercial supply and marketing links

Theory and Practice in Plantation Agriculture

1990

the authors assess the relative efficiency of plantation and smallholder agriculture evaluate different forms of plantation management and look at the regional and environmental impact and political and policy issues

Theory and Practice of Modern Agriculture; to which is added the breeding, management, & diseases of cattle, sheep, pigs, horses, and poultry. Third edition, considerably altered, enlarged, improved, and profusely illustrated

1859

this book provides recent understanding about the sustainable development in agriculture it includes information regarding new approaches for sustainable development in agriculture horticulture and fisheries it examines the effect of climate change and provides information on climate smart practices in addition some important aspects like quality seed production role of bioinoculants on farm water harvesting non thermal processing of food importance of water use in organic agriculture have also been discussed it also presents in detail plant disease aspect and their management strategies this book aims to provide an overall understanding of all aspects related to the study of environment resources its protection for sustainable development to meet the growing food demand of the over nine billion people who will exist by 2050 and the expected dietary changes agriculture will need to produce 60 percent more food globally in the same period the goal of sustainable agriculture is to meet society's food and textile needs in the present without compromising the ability of future generations to meet their own needs practitioners of sustainable agriculture seek to integrate three main objectives into their work a healthy environment economic profitability and social and economic equity every person involved in the food system growers food processors distributors retailers consumers and waste managers can play a role in ensuring a sustainable agricultural system

Agricultural Finance

1988

monographic compilation of conference papers on the theoretics of agricultural development and the role of agriculture in economic development in developing countries focuses on economic analysis of farming systems and land tenure systems and covers diffusion of agricultural technology and innovation etc references conference held in bellagio 1973 may

Agricultural Location Theory

1983

international agricultural trade now exceeds one trillion dollars it is one of the key factors in the world economy and the united states like many other countries depends on it to keep food prices reasonable our balance of payments healthy and the dollar from collapsing on the international money exchanges the symposium on international trade and agriculture held at tucson arizona in april 1977 covered all major topics of trade and commerce policy as they relate to agriculture the papers presented in this book reflect the major concerns of outstanding professional economists and a great variety of agricultural research organizations

Innovative Approaches for Sustainable Development

2022-05-25

this unique compendium describes the development status and trends of international climate smart agriculture research methods and development strategies monitoring evaluation and extension typical cases and their implications for the development of climate smart agriculture in china the useful reference text also comprehensively summarizes the relevant achievements and experiences obtained by the climate smart staple crop production project and highlights future policy suggestions and technical systems

Agriculture in Development Theory

1975

the latest title in the new horizons in environmental economics series this text deals with environmental theories and policies for agriculture in europe

International Trade And Agriculture: Theory And Policy

2019-03-08

the work of a v chayanov is today drawing more attention among western scholars than ever before largely ignored in his native russia because they differed from marxist leninist theory and neglected in the west for more than forty years chayanov s sophisticated theories were at last published in english in 1966 that trenchant is reprinted in this wisconsin paperback edition which includes a new introduction by the sociologist teodor shanin of the university of manchester one of the world s leading chayanov scholars the wisconsin edition will be essential reading for political scientists anthropologists and all whose interests include peasant studies third world development and women s studies the past two decades have seen the emergence of a whole new field called peasant studies and along with those of karl marx chayanov s ideas have been central to its development the publishers are to be commended for re issuing the book with both old and new introductions and making it available as an affordable paperback for students the work is a classic times higher education supplement

Theories And Modes Of Climate-smart Agriculture

2024-02-28

in a time of great agricultural and rural change the notion of multifunctionality has remained under theorized and poorly linked to wider debates in the social sciences this book analyses the extent to which the proposed transition towards post productivist agriculture holds up to scientific scrutiny and proposes a modified productivist non productivist model that better encapsulates the complexity of agricultural and rural change by combining existing notions and concepts this book re conceptualizes agricultural change creating a new transition theory and a new way of looking at the future of agriculture

Soil Science and Agriculture

2018

nowadays agricultural food system has been experiencing major changes which are driven mainly by recent developments in consumer preferences and attitudes technological improvements food safety issues and related regulations the advanced agro food sec

Environmental Co-operation and Institutional Change

2002

introduction production and cost functions allocation of one variable input production with two or more variable inputs production of two or more products economies of size and their implications for farms the production process through time introduction to decision theory linear programming farm adjustments in a changing economy notation geometric considerations and a note on calculus introduction to nonlinear programming answer to selected problems and exercises

A.V. Chayanov on the Theory of Peasant Economy

1986

office

Multifunctional Agriculture

2007

an approach to farming the natural way the theory and practice of working with nature and living better for it

Contract Farming: Theory And Practice

2007-05-11

what defines a sustainable food system how can it be more inclusive how do local and global scales interact and how does power flow within food systems how to encourage an interdisciplinary approach to realizing sustainable food systems and how to activate change these questions are considered by eu and north american academics and practitioners in this book using a wide range of case studies it provides a critical overview showing how and where theory and practice can converge to produce more sustainable food systems

Production Economics

1984-02-24

excerpt from an encyclopaedia of agriculture comprising the theory and practice of the valuation transfer laying out improvement and management of landed property the greater part of the article on the horse p 949 and the veterinary part of the subsequent articles on agricultural and domestic animals about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Agriculture in African Development

2014

this book brings together a series of chapters that provides updated information on adaptation practices against climate change in agriculture and livestock information on some new aspects like conservation of carnivorous plants climate smart millets production advances in genomic interventions for climate resilient crops perceptions on disease and pests under changing climate role of neglected crops in climate resilient agriculture nanotechnology in sustainable agriculture use of crop wild relatives for developing climate resilient crops have been discussed it also presents detailed information carbon sequestration practices and green consumption behaviour for sustainable development the last chapter of book mentions about an innovative agronomic technique under rainfed conditions for sustainable yield advantage in soybean crop

Agriculture in Development Theory

1998

agriculture is the largest sector in most sub saharan economies in terms of employment and it plays an important role in supplying food and export earnings rural poverty rates remain high and labor productivity is strikingly low this article asks how these factors shape the role of agriculture in african development strategies is agricultural growth a prerequisite for growth in other sectors or will urbanization and nonagricultural export markets ultimately be the forces that pull the rural economy into higher productivity we argue that agricultural development strategies will vary widely because of heterogeneity across and within countries

The Right to Food

1985

geoffrey r dolby phd one of the principal characteristics of a scientific theory is that it be falsifiable it must contain predictions about the real world which can be put to experimental test another very important characteristic of a good theory is that it should take full cognisance of the literature of the discipline in which it is embedded and that it should be able to explain at least as well as its competitors those experimental results which workers in the discipline accept without dispute readers of john parks book will be left in no doubt that his theory of the feeding and growth of animals meets both of the above criteria the author's knowledge of the literature of animal science and the seriousness of his attempt to incorporate the results of much previous work into the framework of the present theory result in a rich and imaginative integration of diverse material concerned with the growth and feeding of animals through time a theory which is made more precise through the judicious use of mathematics the presentation is such that the key concepts are introduced gradually and readers not accustomed to a mathematical treatment will find that they can appreciate the ideas without undue trauma the key concepts are clearly illustrated by means of a generous set of figures the crux of the theory comprises three differential eqs 7 1 7

The Natural Way of Farming

1849

agricultural extension and its approach to farming agricultural extension and the techno economic aspects of agriculture agricultural extension and the sociocultural aspect of agriculture agricultural extension and its comprehensive approach to rural welfare agricultural extension and the socioeconomic evolution of the rural value attitude pattern agricultural extension as a way to social adjustment agricultural extension as a bridge between farmer and government agricultural extension and its working programme agricultural extension in its meeting face to face with rural reality agricultural extension in its connection with agricultural development and agricultural production increase

On Practical Agriculture; Or, An Attempt to Reduce the Theory and Practice to the Comprehension of the Operator

2016-05-13

the thesis discusses different theories about agricultural growth and their applicability in sub saharan africa starting in a debate about lack of expected results from economic reform programmes the study goes on to describe the situation prevailing on the mossi plateau of central burkina faso this area

has been selected as a case where agricultural reforms have been implemented properly and hence positive results from liberalisation in terms of agricultural growth should be expected in spite of this what is found is an increasing level of income diversification combined with the upholding of self subsistence farming with traditional methods the factor explaining the prevalence of income diversification is the level of reluctance to change underlying this reluctance to change are four indigenous institutions the upholding of social relationships the household as the basic production unit customary land tenure and the upholding of local power structures these four institutions are also found to influence the level of economic dynamism more broadly hence they determine the scope for agricultural growth however some growth is taking place first and foremost in the fields of vegetable gardening cotton cultivation and cattle breeding in these areas change is possible because it can take place without challenging the identity of mosi peasantries some members of households are also able to be more dynamic than others since they have roles that are freer the indigenous institutions that guide mosi economic behaviour are rules that are constitutive that is the upholding of them contribute to create meaning for those who follow them in this they way they belong to logic of appropriateness based on these findings neoclassic as well as new institutional economic theories are criticised as are other theories that indirectly make the assumption that agricultural growth is hindered or held back by an irrelevant institutional pattern in order to make sense theories about agricultural growth in sub saharan africa need to take indigenous institutions into consideration and give them a proper role

Imagining Sustainable Food Systems

1995

this study is an attempt to contribute to our understanding of one of the most important reforms currently advocated by development economists to reduce rural poverty in developing countries land reform dr cohen has based his study on models in which three social groups are acting these for brevity s sake are called land lords peasants and the groups who comprise the non agricultural sector peasants include the so called landless peasants which western countries generally term agrarian workers the method can be extended to larger numbers of groups the actors are involved in various activities including production consumption and saving the latter being available either for physical or for financial invest ment this implies that various wealth components appear in the model alongside flows of goods and services use is made of determinate models with linear and non linear equations of a dynamic character the models are employed to estimate socio economic development under alternative regimes regimes differ on the one hand according to which group is in power and on the other hand according to the instruments of economic policy they use it is an attractive feature of dr cohen s study that the models are applied to two countries for which all the necessary statistical material has been estimated india and chile for both countries a brief socio political sketch precedes the numerical application of the models for india five instruments of socio economic policy are considered land transfers measures to stimulate productivity credit policies taxes and tenure and wage regulations

Induced Innovation Theory and International Agricultural Development

2018-02-06

this is a open access book in the agriculture sector the language of gender integration often ignores the politics and the power dynamics that are central to critical and feminist analysis of gender relations this volume explores largely neglected topics such as power dynamics masculinities gendered social norms feminist research practice intersectionality critical analysis of tools and more that are fundamental to shifting the entrenched power dynamics and politics of gender research in agriculture the purpose of this book is to reduce the gap existing between theory methods and practice of gender relations in agriculture and agricultural research through an in depth analysis of current processes in agriculture and drawing on existing experiences in other sectors it seeks to create pathways for learning catalyzing change and positive impact on gender equity and social inclusion this volume seeks to bring forth a change in how gender relations in agriculture are researched practiced and taught

An Encyclopaedia of Agriculture
