this groundbreaking work challenges modernist military science and explores how a more open design epistemology is becoming an attractive alternative to a military staff culture rooted in a monistic scientific paradigm the author offers fresh sociological avenues to become more institutionally reflexive to offer a variety of design frames of reference beyond those typified by modern military doctrine modernist military knowledge has been institutionalized to the point that blinds militaries to alternative designs organizationally and in their interventions this book seeks to reconstruct strategy and operations in designing ways and develops theories of action through multifaceted contextualizations and recontextualizations of situations showing that military design does not have to rely on set rational analytic decision making schemes but on seeking alternative meanings in and on action the work offers an alternative philosophy of practice that embraces the unpredictability of tasks to be accomplished written by colonel paparone u s army ret phd with a special chapter by two active duty officers it will appeal to all in military and security studies including professionals and policymakers

criminal disenfranchisement the practice of restricting electoral rights following criminal conviction is the only surviving electoral restriction of adult mentally competent citizens in contemporary democracies despite the strong devotion to the principle of universal suffrage criminal offenders are still routinely deprived of active and passive franchise while the justifications for such limitations remain elusive and incoherent in punishment and citizenship milena tripkovic develops an empirical and normative account of criminal disenfranchisement starting from historical precedents of such restrictions and examining the current policies of a number of european countries tripkovic argues that while criminal disenfranchisement is considered a form of punishment it should instead be viewed as a citizenship sanction imposed when a citizen fails to perform their role as a member of a political community in order to determine the justifications of disenfranchisement tripkovic explores various citizenship ideals and examines whether criminal offenders comply with the expectations that are posed before them after developing a theoretical framework of citizenship duties tripkovic concludes that very few criminal offenders fail to satisfy fundamental citizenship conditions and exhaustive voting restrictions cannot ultimately be justified a comprehensive assessment of criminal disenfranchisement punishment and citizenship offers concrete policy suggestions to determine the limited circumstances under which electoral rights could justifiably be withheld from criminal offenders

much of the existing research on race and crime focuses on the manipulation of crime by political elites or the racially biased nature of crime policy in contrast lisa l miller here specifically focuses on political and socio legal institutions and actors that drive these developments and their relationship to the politics of race and poverty in particular the degree to which citizens at most risk of victimization primarily racial minorities and the poor play a role in the development of political responses to crime and violence miller begins her study by providing a detailed analysis of the narrow and often parochial nature of national and state crime politics drawing a sharp contrast to the active and intense local political mobilization on crime by racial minorities and the urban poor in doing so the perils of federalism illustrates the ways in which the structure of u s federalism has contributed to the absence of black and poor victims of violence from national policy responses to crime and how highly organized but narrowly focused interest groups such as the national rifle association have a disproportionate influence in crime politics moreover it illustrates how the absence of these groups from the policy process at other levels promotes policy frames that are highly skewed in favor of police prosecutors and narrow citizen interests whose policy preferences often converge on increasing punishments for offenders ultimately the perils of federalism challenges the conventional wisdom about the advantages of federalization and explains the key disadvantages that local communities face in trying to change policy
