a companion to his acclaimed work in rewriting the rules of the american economy joseph e stiglitz along with carter dougherty and the foundation for european progressive studies lays out the economic framework for a europe with faster growth that is more equitably shared europe is in crisis sluggish economic growth in many countries widespread income stagnation and recession have led to severe political and social consequences social protections

for citizens have been cut back governments offer timid responses to deep seated problems these economic and political failures have contributed to the rise of extremist parties on the right marginalized populations are being made scapegoats for europe s woes but the problems of today s europe stem from decisions based on a blind worship of markets in too many areas of policy if europe is to return to an innovative and dynamic economy and if there is to be shared prosperity social solidarity and justice then eu countries need to break with their current destructive trajectory this volume offers concrete strategies for renewal that would also reinvigorate the project of european integration with fresh ideas in the areas of both macroeconomics and microeconomics including central banking public investment corporate governance and competition policy social policy and international trade

EU Enlargement and its Macroeconomic Effects in

Eastern Europe 1999-01-29

this book provides a new methodological approach to money and macroeconomics realizing that the abstract equilibrium models lacked descriptions of fundamental issues of a modern monetary economy the focus of this book lies on the stylized balance sheets of the main actors money after all is born on the balance sheets of the central bank or commercial bank while households and firms hold accounts at banks with deposits banks hold an account at the central bank where deposits are called reserves the book aims to explain how the two monetary circuits central bank deposits and bank deposits are intertwined it is also shown how government spending injects money into the economy modern monetary theory and european macroeconomics covers both the general case and then the eurozone specifically a very simple macroeconomic model follows which explains the major accounting identities of macroeconomics using this new methodology the eurozone crisis is examined from a fresh perspective it turns out that not government debt but the stagnation of private sector debt was the major economic problem and that cuts in government spending worsened the economic situation the concluding chapters discuss what a solution to the current problems of the eurozone must look like with scenarios that examine a future with and without a euro this book provides a detailed balance sheet view of monetary and fiscal operations with a focus on the eurozone economy students policy

makers and financial market actors will learn to assess the institutional processes that underpin a modern monetary economy in times of boom and in times of bust

on 14 february 2012 the european commission presented its first alert mechanism report amr prepared in accordance with article 3 of regulation eu no 1176 2011 on the prevention and correction of macroeconomic imbalances the amr serves as an initial screening device helping to identify member

states that warrant further in depth analysis to determine whether imbalances exist or risk emerging according to article 5 of regulation no 1176 2011 these country specific in depth reviews should examine the nature origin and severity of macroeconomic developments in the member state concerned which constitute or could lead to imbalances on the basis of this analysis the commission will establish whether it considers that an imbalance exists and what type of policy follow up it will recommend to the council for slovenia the amr noted that two indicators in the scoreboard exceeded their thresholds in 2010 and suggested the need to assess the development and drivers of potential imbalances the amr explained that in the years before the crisis slovenia enjoyed strong growth and domestic demand conditions coupled with some losses in price competitiveness and a gradual widening of the current account deficit it identified signs that overheating occurred particularly as regards private sector credit growth construction value added and property prices the slovenian economy was hit hard by the global crisis and the amr noted that this has brought some perhaps temporary adjustment in the external balance but this is still at an early stage against this background section 2 examines the external and internal dimensions of imbalances including developments in competitiveness private sector indebtedness and in asset markets this is followed by a closer look at the implications of indebtedness of non financial corporations for the

banking sector in section 3 section 4 presents possible policy considerations
