this revised edition of a new geography of ghana is written specially for the waec o level syllabus and provides full coverage of section a of paper 2 for the first time in english a key work of critical geography originally published in 1978 in portuguese for a new geography is a milestone in the history of critical geography and it marked the emergence of its author milton santos 1926 2001 as a major interpreter of geographical thought a prominent afro brazilian public intellectual and one of the foremost global theorists of space published in the midst of a crisis in geographical thought for a new geography functioned as a bridge between geography s past and its future in advancing his vision of a geography of action and liberation santos begins by turning to the roots of modern geography and its colonial legacies moving from a critique of the shortcomings of geography from the field s foundations as a modern science to the outline of a new field of critical geography he sets forth both an ontology of space and a methodology for geography in so doing he introduces novel theoretical categories to the analysis of space it is in short both a critique of the northern anglo centric discipline from within and a systematic critique of its flaws and assumptions from outside critical geography has developed in the past four decades into a heterogenous and creative field of enquiry though accruing a set of theoretical touchstones in the process it has become detached from a longer and broader history of geographical thought for a new geography reconciles these divergent histories arriving in english at a time of renewed interest in alternative geographical traditions and the history of radical geography it takes its place in the canonical works of critical geography in the new geography of jobs award winning berkeley economist enrico moretti looks at the major shifts taking place in the us economy and reveals the surprising winners and losers specifically which kinds of jobs will drive economic growth and where they ll be located while exploring how communities can transform themselves into dynamic innovation hubs a timely and smart discussion of how different cities and regions have made a changing economy work for them and how policymakers can learn from that to lift the circumstances of working americans everywhere barack obama we re used to thinking of the united states in opposing terms red versus blue haves versus have nots but today there are three americas at one extreme are the brain hubs cities like san francisco boston and durham with workers who are among the most productive creative and best paid on the planet at the other extreme are former manufacturing capitals which are rapidly losing jobs and residents the rest of america could go either way for the past thirty years the three americas have been growing apart at an accelerating rate this divergence is one the most important developments in the history of the united states and is reshaping the very fabric of our society affecting all aspects of our lives from health and education to family stability and political engagement but the winners and losers aren t necessarily who you d expect enrico moretti s groundbreaking research shows that you don t have to be a scientist or an engineer to thrive in one of the brain hubs carpenters taxi drivers teachers nurses and other local service jobs are created at a ratio of five to one in the brain hubs raising salaries and standard of living for all dealing with this split supporting growth in the hubs while arresting the decline elsewhere is the challenge of the century and the new geography of jobs lights the way innovation is the main engine of competitiveness however in a world in which everything goes faster the inherent nature of the innovation process has changed this book assesses both the theoretically and empirically intertwined relationship between innovation clusters and

multinational enterprises in today s economy the surprising finding of this book is that contrary to conventional wisdom global income inequality is decreasing critics of globalization and others maintain that the spread of consumer capitalism is dramatically polarizing the worldwide distribution of income but as the demographer glenn firebaugh carefully shows income inequality for the world peaked in the late twentieth century and is now heading downward because of declining income inequality across nations furthermore as income inequality declines across nations it is rising within nations though not as rapidly as it is declining across nations firebaugh claims that this historic transition represents a new geography of global income inequality in the twenty first century this book documents the new geography describes its causes and explains why other analysts have missed one of the defining features of our era a transition in inequality that is reducing the importance of where a person is born in determining his or her future well being this title advances a perspective rooted in economic geography for explaining the changing relationship between contemporary welfare states firms and global financial markets
