HWM Answering Queries Using Views, Second Edition Business Intelligence for the Real-Time

Enterprise Answering Queries Using Views Artificial Neural Networks – ICANN 2009 HWM      

HWM 2008-07 singapore's leading tech magazine gives its readers the power to decide with its informative articles and in depth reviews

Answering Queries Using Views, Second Edition 2022-05-31 the topic of using views to answer queries has been popular for a few decades now as it cuts across domains such as query optimization information integration data warehousing website design and recently database as a service and data placement in cloud systems this book assembles foundational work on answering queries using views in a self contained manner with an effort to choose material that constitutes the backbone of the research it presents efficient algorithms and covers the following problems query containment rewriting queries using views in various logical languages equivalent rewritings and maximally contained rewritings and computing certain answers in the data integration and data exchange settings query languages that are considered are fragments of sql in particular select project join queries also called conjunctive queries with or without arithmetic comparisons or negation and aggregate sql queries this second edition includes two new chapters that refer to tree like data and respective query languages chapter 8 presents the data model for xml documents and the xpath query language and chapter 9 provides a theoretical presentation of tree like data model and query language where the tuples of a relation share a tree structured schema for that relation and the query language is a dialect of sql with evaluation techniques appropriately modified to fit the richer schema

Business Intelligence for the Real-Time Enterprise 2009-08-03 in today's competitive and highly dynamic environment analyzing data to understand how the business is performing to predict outcomes and trends

and to improve the effectiveness of business processes underlying business operations has become critical the traditional approach to reporting is no longer adequate users now demand easy to use intelligent platforms and applications capable of analyzing real time business data to provide insight and actionable information at the right time the end goal is to improve the enterprise performance by better and timelier decision making enabled by the availability of up to date high quality information as a response the notion of real time enterprise has emerged and is beginning to be recognized in the industry gartner defines it as using up to date information getting rid of delays and using speed for competitive advantage is what the real time enterprise is all about indeed the goal of the real time enterprise is to act on events as they happen although there has been progress in this direction and many companies are introducing products toward making this vision a reality there is still a long way to go in particular the whole lifecycle of business intelligence requires new techniques and methodologies capable of dealing with the new requirements imposed by the real time enterprise

Answering Queries Using Views 2022-11-10 the topic of using views to answer queries has been popular for a few decades now as it cuts across domains such as query optimization information integration data warehousing website design and recently database as a service and data placement in cloud systems this book assembles foundational work on answering queries using views in a self contained manner with an effort to choose material that constitutes the backbone of the research it presents efficient algorithms and covers the following problems query containment rewriting queries using views in various logical languages equivalent rewritings and maximally contained rewritings and computing certain answers in

the data integration and data exchange settings query languages that are considered are fragments of sql in particular select project join queries also called conjunctive queries with or without arithmetic comparisons or negation and aggregate sql queries

Artificial Neural Networks – ICANN 2009 2009-09-03 this two volume set lncs 5768 and lncs 5769 constitutes the refereed proceedings of the 19th international conference on artificial neural networks icann 2009 held in limassol cyprus in september 2009 the 200 revised full papers presented were carefully reviewed and selected from more than 300 submissions the first volume is divided in topical sections on learning algorithms computational neuroscience hardware implementations and embedded systems self organization intelligent control and adaptive systems neural and hybrid architectures support vector machine and recurrent neural network

HWM 2008-08 singapore s leading tech magazine gives its readers the power to decide with its informative articles and in depth reviews
