the transformation of sound recording into a scientific technique in the study of birdsong as biologists turned wildlife sounds into scientific objects scientific observation and representation tend to be seen as exclusively visual affairs but scientists have often drawn on sensory experiences other than the visual since the end of the nineteenth century biologists have used a variety of techniques to register wildlife sounds in this book Joeri Bruyninckx describes the evolution of sound recording into a scientific technique for studying the songs and calls of wild birds and asks what it means to listen to animal voices as a scientist the practice of recording birdsong took shape at the intersection of popular entertainment and field ornithology turning recordings into objects of investigation and popular fascination shaped by the technologies and interests of amateur naturalism and music teaching radio broadcasting and gramophone production hobby electronics and communication engineering birdsong recordings traveled back and forth between scientific and popular domains to appear on gramophone recordings radio broadcasts and movie soundtracks Bruyninckx follows four technologies the musical score the electric microphone the portable magnetic tape recorder and the sound spectrograph through a cultural history of field recording and scientific listening he chronicles a period when verbal descriptions musical notations and onomatopoeic syllables represented

birdsong and shaped a community of listeners later electric recordings struggled with notions of fidelity realism objectivity and authenticity scientists early citizen scientists and the recording industry negotiated recording exchange and trained listeners complemented the visual authority of spectrographic laboratory analyses this book reveals a scientific process fraught with conversions between field and laboratory sound and image science and its various audiences

what if we have been missing a whole stage of how the canonical gospels came to be what if there were a whole raft of prior jesus narratives whether written or oral the fragmentary vestiges of which now appear in matthew mark luke and john this would explain why these gospels seem over crowded with incompatible understandings of jesus christologies in the gospels behind the gospels innovative biblical

scholar robert m price attempts to reassemble the puzzle pieces disclosing several earlier gospels of communities who imagined jesus as the predicted return of the prophet elijah the samaritan taheb a second moses a resurrected john the baptist a theophany of yahweh a gnostic revealer a zealot revolutionary etc as these various sects shrank and collapsed their remaining followers would have come together just as modern churches and denominations seek to survive by merging and consolidating our canonical gospels might be the result similarly price explores the possibility that paul apollo cephas and christ listed as if on a par in 1 corinthians 1 12 were originally figureheads of rival sects who eventually merged in much the same way you will never read the gospels the same way again

this is a comprehensive study of the major changes in infantry tactics from the time of frederick the great to the beginning of what many see as the era of modern war in the 1860s ross lays social and political change side by side with technical change he argues that the french revolution due to the fervour and loyalty it inspired in its participants led to huge citizen armies of devolved command which were able to make use of new tactics that swept the poorly paid and poorly treated professional armies of their enemies from the field shortly after the napoleonic wars other european countries experienced similar social change and by the middle of the nineteenth century these massive conscript armies were equipped with breech loading rifles and more powerful artillery the battlefield of the late 1860 s had become a place where close infantry formations could not survive for long in the linear formations of the past
