Questions and Answers 1890

in almost all principled accounts of questions questions are related to the corresponding answers zellig harris harris 1978 1 for example maintains that all interrogative sentences can be derived by means of the independently established transformations of the language from sentences which assert that someone is asking about a disjunction of statements which are the relevant possible answers to that interrogative this amounts to the claim that a yes no question such as will john stay is derived from i ask you whether john will stay and a wh question such as who came is derived from something like i ask you whether a came or b came or or x came though in generative grammar interrogatives are not derived from the corresponding declaratives the semantic interpretation of questions is akin to the syntactic source of questions posited by harris jerrold j katz and paul m postal katz postal 1964

113 117 state a reading rule for q the interrogative constituent which boils down to 1 in the case of yes no questions and to 2 in the case of wh questions 1 tell me which of the following is true john will stay or john will not stay 2 tell me which of the following is true a came or b came or or x came thus the semantic interpretation of questions makes reference to the set of possible answers represented here by a disjunction of statements
