Industry 4.0, China 2025, IoT *2022-11-02*

the book gives an overview about automation technology over the last 50 years based on my own experiences it is a good summery for automation since 1970 for all who want to know about the context of automation developments and their standards it is a fundamental summery and enables the reader to get experience in the complex field of automation in detail the question is arised whether industry 4 0 china 2025 iot ai are a revolution or more an evolution of timewise established availbale technologies in hw sw and algorithms is the hype about industry 4 0 justified or not in that context a timelline since 1970 ist shown for ai ann essential milestones in automation e g osi model automation pyramid standards for bus systems main sw languages robots ai ann pattern recognittion ethernet the 12 most important international field busses their main features and characterisitcs foundation of committees harmonization and standardization efforts opc ua and cloud computing field devices plcs scada mes erp and automation history all that history is seen in the context of µ controller dsp digital signal processor fpgas field programmable gate arrays asics application specific integrated circuit chip on board it is include the hw history from intel 8080 to octuple multicore processors in the same way it is shown the history of field device out from laboratory into the field with all difficulties and benefits of that transition the issues are summerized in a pyramid of complexity requirements for robustness and safety are shown for field devices in the same way it is shown the development of mainframes workstations and pc s sap a leading erp system is explained in mor detail specially it is figured out how sap works and what has to be considered in working with such kind of system the differences between mes and erp systems are discussed specially also for future combined sap mes systems explained are the problems of middlesized companies smes in dealing with industry 4 0 and automation further examples are given and discussed for automized quality control in automotvie pcb handling cigs solar cell production also shown is the upgrade for older products and make them ready for automation standards in detail the history oft he modern robotics is shown for the automotive industry in summery also is figured out the industry 5 0 which is just coming up more and more
