transactions occur daily as goods and services are purchased across the national boundaries of some 200 political units capital flows from nation to nation and so to a lesser extent do jobs as companies seek more favorable locations for their business operations the rules laws governing these exchanges quickly become complex as persons and governments from different countries are involved if problems arise in a cross border relationship whose rules apply what forums are available to resolve disputes are there tax implications to the transaction if so where these and similar questions need to be factored into the decision to go overseas each of the six chapters in this book begins with a brief overview of the subject matter followed by short previews of the chosen case examples the primary content of the chapters consists of some 120 court and arbitration decisions in real disputes between real parties the actual text of the decisions in these cases has been edited some excerpts are quite brief others are more substantial most background facts have been summarized by the author but the edited decision part of each case is quoted from the actual recorded text of the court or arbitrator who decided it clearly a minute sample from tens of thousands of cases cannot provide comprehensive coverage of what all the world s legal rules are our objectives here are simply to indicate some of the major potential flash points of doing international business to illustrate some of the significant differences in the applicable legal rules and to provide an exposure to the language and process by which international business disputes are resolved fore warned is fore armed being aware of these potential trouble spots a sensible business manager will presumably consider them in making the decision to engage in cross border transactions and take appropriate steps to avoid or minimize potential adverse consequences chapter i of this book introduces international law its course of development and its two major sources custom and treaties chapter ii examines the use of national and international courts and arbitrators to resolve cross border disputes chapter iii provides basic coverage of the united nations convention on contracts for the international sale of goods when it applies how the sale contract is formed when risk of loss on the goods passes from seller to buyer and what responsibilities the seller has for the quality of the goods sold chapter iv looks at some of the legal questions that might arise in conducting cross border commercial operations employment issues intellectual property issues and investment issues chapter v considers potential questions regarding taxation of international activities and the regulation of adverse environmental effects chapter vi reviews the efforts by national governments to apply their competition regulations to international business transactions and the difficulties that private parties might have in attempting to enforce legal claims against governments and their agencies while these are surely not the only legal issues that might arise in connection with international business they
