flying cities martian colonies spaceships robots monorails bubble topped cars atomic explosions these have all appeared in both artistic renderings of the future for pulp magazines as serious architectural proposals in the 20th century high low fact fiction mixed in ways that are now impossible to separate design references for the future were drawn from engineering science fiction avant garde architecture pulp fiction mechanix magazines aerodynamics the 1939 new york world s fair and many of these ideas have actually come to pass this wonderful book is a collection of illustration art from the past century portraying the indefatigable gee whiz of the imagined future

A Treatise on the Copyright of Designs for Printed Fabrics 1841

Copyright of designs for printed fabrics is a legal right that belongs to the creator of the design. It is a right that is granted by the law to the creator of the design, and it is a right that is enforceable by the courts. The purpose of this treatise is to explain the law of copyright of designs for printed fabrics, and to show how it applies to the various cases that have arisen in the courts. The treatise is divided into four parts: 1. The nature and extent of the right of copyright of designs for printed fabrics. 2. The conditions which must be satisfied in order to obtain a copyright of designs for printed fabrics. 3. The remedies which are available to the owner of a copyright of designs for printed fabrics. 4. The various cases which have arisen in the courts in relation to the copyright of designs for printed fabrics.

Out of Time 2000-10-01

the whole landscape of space use is undergoing a radical transformation in the workplace a period of unprecedented change has created a mix of responses with one overriding outcome observable worldwide the rise of distributed space in the learning environment the social political economic and technological changes responsible for this shift have been further compounded by constantly developing theories of learning and teaching and a wide acceptance of the importance of learning as the core of the community resulting in the blending of all aspects of learning into one seamless experience this book attempts to look at all the forces driving the provision and pedagogic performance of the many spaces real and virtual that now accommodate the experience of learning and provide pointers towards the creation and design of learning centred communities part 1 looks at the entire

learning universe as it now stands tracks the way in which its constituent parts came to occupy their role assesses how they have responded to a complex of drivers and gauges their success in dealing with renewed pressures to perform it shows that what is required is innovation within the spaces and integration between them part 2 finds many examples of innovation in evidence across the world in schools the higher and further education campus and in business and cultural spaces but an almost total absence of integration part 3 offers a model that redefines the learning landscape in terms of learning outcomes mapping spatial requirements and activities into a detailed mechanism that will achieve the best outcome at the most appropriate scale by encouraging stakeholders to creating an events based rather than space based identity the book hopes to point the way to a fully integrated learning landscape a learning community

Designs for the Dream King 1978
