the kura araxes a cultural tradition of the late 4th and 3rd millennia bc has recently become a focus of international archaeological research it was first discovered in the mountains of the taurus and the south caucasus from near the beginning

of the tradition evidence suggests that populations bearing some of its hallmarks black burnished handmade pottery and a ritual of the hearth spread out over a wide region of the taurus zagros and caucasus mountains and as far south as the area of the sea of galilee in the southern levant recent research has questioned whether the simple narrative of a discreet homeland and unassimilated migrants fairly describes the ancient reality one of the key dependent variables used to trace the prehistory of the kura araxes cultural tradition is pottery this article discusses the cultural meaning and interpretive use of pottery but also the limits of pottery style alone to reconstruct prehistory it adds previously unpublished material from veli sevin s surveys in malatya and elaziğ provinces to the larger database for study of the kura araxes

the evolution and proliferation of plain and predominantly wheel made pottery presents a characteristic feature of the societies of the near east and eastern mediterranean since the fourth millennium b c this plain pottery has received little detailed archaeological attention in comparison to aesthetically more pleasing and chronologically sensitive decorated traditions yet their simplicity and standardization suggest they are products of craft specialists the result of high volume production and therefore important in understanding the social systems in early complex societies this volume reevaluates the role and significance of plain pottery traditions from both historically specific perspectives and from a comparative point of view examines the uses and functions of this pottery in relation to social negotiation and group identity formation helps scholars understand cross regional similarities in development and use
