picking up on edward said s claim that the historical experience of empire is common to both the colonizer and the colonized peter van der veer takes the case of religion to examine the mutual impact of britain s colonization of india on indian and british culture he shows that national culture in both india and britain developed in relation to their shared colonial experience and that notions of religion and secularity were crucial in imagining the modern nation in both countries in the process van der veer chronicles how these notions developed in the second half of the nineteenth century in relation to gender race language spirituality and science avoiding the pitfalls of both world systems theory and national historiography this book problematizes oppositions between modern and traditional secular and religious progressive and reactionary it shows that what often are assumed to be opposites are in fact profoundly entangled in doing so it upsets the convenient fiction that india is the land of eternal religion existing outside of history while britain is the epitome of modern secularity and an agent of history van der veer also accounts for the continuing role of religion in british culture and the strong part religion has played in the development of indian civil society this masterly work of scholarship brings into view the effects of the very close encounter between india and britain an intimate encounter that defined the character of both nations

the damascus road encounter between jesus and paul is foundational to understanding the early development of christology and indeed christianity since it is the first appearance of the post ascension

jesus contained in the earliest christian literature this study examines the encounter as it is described in paul s epistles and the book of acts since paul interprets his experience within the jewish tradition this study begins with a survey of epiphany texts in the old testament and other ancient jewish literature this reveals two new categories for appearances of god angels and other heavenly beings divine initiative and divine response this survey also finds two distinct patterns of characterization for god and other heavenly beings these findings are then applied to paul s accounts of his damascus road encounter paul depicts the encounter as a divine initiative epiphany this conclusion is significant since it argues against the current view that the encounter was a merkabah vision paul s christology in the damascus road encounter is also significant since jesus is characterized as divine such divine characterization is not typical for heavenly beings in first century ce epiphany texts thus a high pauline christology appears to be present at a very early point the three accounts of the damascus road encounter in acts also fit the pattern of divine initiative not merkabah and exhibit the high christology of paul s accounts in fact the three accounts in acts are shown to form an intentionally increasing sequence culminating in the revelation that paul was called to be an apostle by jesus himself on the damascus road

the advent of colonialism and its associated developments has been characterized as one of the most defining moments in the history of south asia the arrival of christian missionaries has not only been coeval to colonial rule but also associated with development in the region their encounter critique endeavour and intervention have been very critical in shaping south asian society and culture even where they did not succeed in converting people yet there is precious little space spared for studying the role and impact of missionary enterprises than the space allotted to colonialism isolated individual efforts have focused on bengal madras punjab and much remains to be addressed in the context of the unique region of the north east india in north east india for example by the time the british left a majority of the tribals had abandoned their own faith and adopted christianity it was a socio cultural revolution yet this aspect has remained outside the scope of history books whatever reading material is available is pro christian mainly because they are either sponsored by the church authorities or written by ecclesiastical scholars very little secular research was conducted for the hundred years of missionary endeavour in the region the interpretations which have emerged out of the little material available are largely simplistic and devoid of nuances this book is an effort to decenter such explanations by providing an informed historical and cultural appreciation of the role and contribution of missionary endeavors in british india

the politics of the encounter is a spirited interrogation of the city as a site of both theoretical inquiry and global social struggle the city writes andy merrifield remains important virtually and materially for progressive politics and yet he notes more than forty years have passed since henri lefebvre advanced the powerful ideas that still undergird much of our thinking about urbanization and urban society merrifield rethinks the city in light of the vast changes to our planet since 1970 when lefebvre s seminal urban revolution was first published at the same time he expands on lefebvre s notion of the right to the city which was first conceived in the wake of the 1968 student uprising in paris we need to think less of cities as entities with borders and clear demarcations between what s inside and what s outside and emphasize instead the effects of planetary urbanization a concept of lefebvre s that merrifield makes relevant for the ways we now experience the urban the city from tahrir square to occupy wall street seems to be the critical zone in which a new social protest is unfolding yet dissenters aspirations are transcending the scale of the city physically and philosophically consequently we must shift our perspective from the right to the city to the politics of the encounter says merrifield we must ask how revolutionary crowds form where they draw their energies from what kind of spaces they occur in and what kind of new spaces they produce

paul celan 1920 1970 one of the most important and challenging poets in post war europe was also a prolific and highly idiosyncratic translator his post holocaust writing is inextricably linked to the specific experiences that have shaped contemporary european and american identity and at the same time has its roots in literary philosophical and scientific traditions that range across continents

and centuries surrealism being a key example celan s early works emerge from a fruitful period for surrealism and they bear the marks of that style not least because of the deep affinity he felt with the need to extend the boundaries of expression in this comparative and intertextual study charlotte ryland shows that this interaction continued throughout celans lifetime largely through translation of french surrealist poems and that celans great oeuvre can thus be understood fully only in the light of its interaction with surrealist texts and artworks which finally gives rise to a wholly new poetics of translation charlotte ryland is lecturer in german at st hughs college and the queens college oxford
