excerpt from the book review digest vol 8 eighth annual cumulation book reviews of 1912 in one alphabet this the eighth annual cumulation of the book review digest comes to its completion with but little change in the policy that has prevailed in former annual numbers practically the only new feature added is that of estimating by the thousand words the cost of the volumes entered

about 2300 books have been noted during the year the subject index introduced last year has been continued and will be found combined with a title index at the end of the volume the increasing use of the digest by librarians is of course gratifying to us whose business it is to make it especially pleased have we been this year with its introduction into the library training schools where in many cases it is now used as a means of instruction in book selection about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
