frontiers in electronics integrated circuits and vlsi

May 28 2024

part of an innovative journal that explores the role of electronics in technological innovation this section introduces topics related to integrated circuits and vlsi

frontiers in electronics integrated circuits and vlsi

Apr 27 2024

this section comprehensively covers various aspects of integrated circuits and vlsi from design and design automation at the device circuit and architecture levels all the way to system level performance energy efficiency and robustness

defect oriented testing for nano metric cmos vlsi circuits

Feb 25 2024

in this paper nanoscale metal oxide semiconductor field effect transistor mosfet device circuit co design is presented with an aim to reduce the gate leakage current in vlsi logic circuits firstly gate leakage current is modeled through high k

prof patrick yue received 2024 ieee symposium on vlsi

Jan 24 2024

prof patrick yue from the department of electronic and computer engineering has been selected to receive the 2024 ieee symposium on vlsi technology and circuits test of time award for his 1997 paper on chip spiral inductors with patterned ground shields for si based rf ic s which is co authored with his phd supervisor at stanford university prof s simon wong

proceedings of 4th international conference on frontiers in

Dec 23 2023

he published more than 68 research articles in various international journals conference proceedings and book chapters in the areas of vlsi reversible circuits social network analysis agriculture engineering image video processing and cryptography shubhajit roy chowdhury was born on august 27 1981

defect oriented testing for nano metric cmos vlsi circuits

Aug 19 2023

test and design practitioners from academia and industry will find that defect oriented testing for nano metric cmos vlsi circuits lays the foundations for further pioneering work

emulated muscle spindle and spiking afferents validates vlsi

Jan 12 2023

system our design benefits from very large scale integrated circuit vlsi technology to provide considerable scalability and high speed as much as 365 faster than real time an essential component of our design is the proprioceptive sensor or muscle spindle here we demonstrate an accurate and extremely fast emulation of a muscle spindle
