*How students select higher secondary schools? A case study in Kathmandu Valley, Nepal* 2022-05-17 the term education itself means to train to lead out and to bring up it is said that education is a life long process but the basic education that one undergoes during the formative years definitely contributes to the shaping of one's future and outlook at this point the school and high school education assumes importance even though the history of education in nepal is relatively short there has been a considerable growth in the number of educational institutes after the restoration of democracy in 1950 and particularly after 1990 and however having no standard measuring rod to use when evaluating the institutes of higher education students and parents have had trouble when selecting a college furthermore beguiling advertisements make it impossible to decide which college is genuinely worth attending nowadays it cannot be denied that numerous mediocre institutes exist which try to make a quick buck and cheat the students this may not always be the case but such incidents cannot be overlooked hence this subject and possible solutions are analysed in this comprehensive study
