this book constitutes the refereed proceedings of the 7th international conference on pervasive computing pervasive 2009 held in nara japan in may 2009 the 20 revised full papers and 7 revised short papers presented were carefully reviewed and selected from 147 initial submissions the papers are organized in topical sections on digital displays navigation at home with pervasive applications sensors sensors everywhere working together tagging and tracking methods and tools and the importance of context life magazine is the treasured photographic magazine that chronicled the 20th century it now lives on at life com the largest most amazing collection of professional photography on the internet users can browse search and view photos of today s people and events they have free access to share print and post images for personal use popular science gives our readers the information and tools to improve their technology and their world the core belief that popular science and our readers share the future is going to be better and science and technology are the driving forces that will help make it better popular mechanics inspires instructs and influences readers to help them master the modern world whether it s practical diy home improvement tips gadgets and digital technology information on the newest cars or the latest breakthroughs in science pm is the ultimate guide to our high tech lifestyle this book focuses on the impacts of the built environment and how to predict and measure the benefits and consequences of changes taking place to address sustainability in the development and building industries it draws together the best treatments of these subjects from the leeds sustainability institute s inaugural international conference on sustainability ecology engineering design for society seeds the focus of discussion is on understanding how buildings and spaces are designed and nurtured to obtain optimal outcomes in energy efficiency and environmental impacts in addition to examining technical issues such as modeling energy performance emphasis is placed on the health and well being of occupants this holistic approach addresses the interdependence of people with the built and natural environments the book s contents reflect the interdisciplinary and international collaboration critical to assembly of the knowledge required for positive change the latest update to bela liptak s acclaimed bible of instrument engineering is now available retaining the format that made the previous editions bestsellers in their own right the fourth edition of process control and optimization continues the tradition of providing quick and easy access to highly practical information the authors are practicing engineers not theoretical people from academia and their from the trenches advice has been repeatedly tested in real life applications expanded coverage includes descriptions of overseas manufacturer s products and concepts model based optimization in control theory new major inventions and innovations in control valves and a full chapter devoted to safety with more than 2000 graphs figures and tables this all inclusive encyclopedic volume replaces an entire library with one authoritative reference the fourth edition brings the content of the previous editions completely up to date incorporates the developments of the last decade and broadens the horizons of the work from an american to a global perspective béla g lipták speaks on post oil energy technology on the at t tech channel as the blue angels aircraft in the late 1950s grumman s f11f 1 tiger came to symbolize the speed and might of u s navy airpower the tiger was originally conceived as an upgrade of the f9f cougar it eventually morphed into a new design that incorporated the area rule to enable cruising speeds up to 1.1 mach the prototype flew in 1954 and carrier trials commenced in 1956 eventually seven squadrons flew f11fs hampered by maintenance issues affiliated with the j65 engine and the fact that the vought crusader was clearly superior the tiger had a short service life it was withdrawn from carrier duty after four years in 1961 only 199 were built the remaining tigers flew in a training capacity and the blue angels continued to fly them for over a decade 1957 1969 originally printed by the u s navy this handbook provides a fascinating glimpse inside the cockpit of the tiger originally classified restricted the manual was declassified and is here reprinted in book form this comprehensive book examines the technology and practical applications of plant multivariable envelope control optimize plant productivity including air handlers boilers chemical reactors chillers clean rooms compressors and fans cooling towers heat exchangers and pumping stations béla g lipták speaks on post oil energy technology on the at t tech channel in the homeowner s guide to energy efficiency john krigger and chris dorsi help homeowners set realistic personal goals for reducing their energy consumption their methods for making homes more energy efficient will also improve comfort safety durability and resale value they guide readers through the process of assessing current energy usage and predicting the benefits and estimating the costs of remodeling options with projects ranging from simple fixes to large scale renovations this book offers solutions for the energy conscious homeowner regardless of budget technical ability or time the three volume set lnai 9284 9285 and 9286 constitutes the refereed proceedings of the european conference on machine learning and knowledge discovery in databases ecml pkdd 2015 held in porto portugal in september 2015 the 131 papers presented in these proceedings were carefully reviewed and selected from a total of 483 submissions these include 89 research papers 11 industrial papers 14 nectar papers 17 demo papers they were organized in topical sections named classification regression and supervised learning

clustering and unsupervised learning data preprocessing data streams and online learning deep learning distance and metric learning large scale learning and big data matrix and tensor analysis pattern and sequence mining preference learning and label ranking probabilistic statistical and graphical approaches rich data and social and graphs part iii is structured in industrial track nectar track and demo track start up creation is the most distinctive feature of the entrepreneurial knowledge based economy it is also essential for economic growth and especially important in the current context of young graduate s high unemployment rates that are expected to increase in the next few decades there are other books on the creation of start up companies designed to be of value to academics wishing to exploit the commercial value of a new technology or business solution but none of these existing titles focus on start up creation in the construction industry in the second edition of this extremely successful title the editors present a state of the art review on advanced technologies and their application in several areas of the built environment covering energy efficiency structural performance air and water quality to inspire the creation of start up companies from university research part one begins with the key factors behind successful start up companies from university research including the development of a business plan start up financing and the importance of intellectual property part two focuses on the use of big data intelligent decision support systems the internet of things and their use in the energy efficiency of the built environment finally part three is an entire new section that focuses on several smartphone applications for the smart built environment while in the first edition the section concerning apps for smart buildings had just two chapters one for app programming basics and a second a case study on building security in this second edition the core of the book is about app development that constitutes 50 of the book entire new section that was not available in the first edition on smart phone applications and virtual assistance for infrastructure monitoring chapters on business plans start up financing and intellectual property have been brought fully up to date as well as algorithms big data and the internet of things for eco efficient smart buildings comprehensive guide to start ups that arise from college and university research and how the application of advanced technology can be applied to the built environment popular science gives our readers the information and tools to improve their technology and their world the core belief that popular science and our readers share the future is going to be better and science and technology are the driving forces that will help make it better the physical upgrading of the existing domestic and industrial building stock to improve energy performance is an essential part of a transition to a low carbon society successfully retrofitting buildings to improve energy performance is not simply a technological challenge it is a complex socio technical problem that needs to be addressed in a co ordinated way utilising skills and knowledge from a range of industrial and academic backgrounds within both the academic and practitioner communities there is a growing understanding of the scale and nature of the problem one which encompasses issues such as policy and regulation people and behaviour supply chain and process as well as issues of technology retrofitting the built environment discusses the factors that impact on the retrofit problem providing a clear analysis of the main issues that the academic and industrial communities must engage with to resolve the problems of domestic energy and retrofit the book is divided into four broad sections understanding the problem policy and regulation implementing and evaluating retrofit people and communities academic and industrial researchers policy makers and industry practitioners will find each section covers a mix of policy technical and social science issues presented by both academic and industry authors giving a wide and detailed perspective of the issue the editors will swan is a senior lecturer in buildings retrofit in the school of the built environment at the university of salford he leads a number of projects in the field of sustainable retrofit covering a number of topics including monitoring behaviour and retrofit project delivery as part of salford s applied energy and buildings research group he sits on the greater manchester buildings group and also is chair of the retrofit innovation group philip brown is director and senior research fellow at the salford housing urban studies unit shusu at the university of salford he is the lead academic on end use energy demand within the applied energy and buildings research group and sits on greater manchester s low carbon economic area group for customer engagement icann the international conference on artificial neural networks is the official conference series of the european neural network society which started in helsinki in 1991 since then icann has taken place in brighton amsterdam sorrento paris bochum and lausanne and has become europe s major meeting in the field of neural networks this book contains the proceedings of icann 98 held 2 4 september 1998 in skovde sweden of 340 submissions to icann 98 180 were accepted for publication and presentation at the conference in addition this book contains seven invited papers presented at the conference a conference of this size is obviously not organized by three individuals alone we therefore would like to thank the following people and organizations for supporting icann 98 in one way or another the european neural network society and the swedish neural network society for their active support in the organization of this conference the programme committee and all reviewers for the hard and timely work that was required to produce more than 900 reviews during april 1998 the steering committee which met in skovde in may 1998 for the final selection of papers and the preparation of the conference program the other module chairs bengt asker industry and research harald brandt applications anders lansner computational neuroscience and brain theory thorsteinn rognvaldsson theory noel sharkey co chair autonomous robotics and adaptive behavior bertil svensson hardware and implementations the conference secretary

leila khammari and the rest of the combustion engineering gas utilisation is a practical guide to sound engineering practice for engineers from industry and commerce responsible for the selection installation designing and maintenance of efficient and safe gas fired heating equipment home inspectors must understand how heat is generated how it is spread around how it is controlled and how it is made safe this text also discusses how to discard the waste products of heating how much heat is needed and why homes can be uncomfortable even when enough heat is provided this in depth book addresses these issues for two of the most common home heating methods gas and oil furnances residential buildings have continuously improved in energy efficiency partly as a consequence of the introduction of energy regulations in many countries although better thermal properties and systems efficiency have lowered energy consumption for space heating in recent decades substantial differences in energy consumption in similar dwellings are still being observed these differences in consumption are thought to be caused by differences in occupancy patterns by quality of construction and by rebound effects this research addresses the effect of energy performance regulations and occupant behaviour on energy consumption for space and water heating in dwellings built after the introduction of the energy performance regulations in the netherlands the results of this research show that improving the energy efficiency of buildings alone is not enough to decrease that energy consumption given that institutions of higher education have a predisposition to compartmentalize and delineate areas of study creative technology may seem oxymoronic on the contrary the very basis of western thought is found in the idea of transcendent knowledge the marriage of opposing disciplines therefore acts as a more holistic approach to education creative technologies for multidisciplinary applications acts as an inspiration to educators and researchers who wish to participate in the future of such multidisciplinary disciplines because creative technology encompasses many applications with the realm of art gaming the humanities and digitization this book features a diverse collection of relevant research for the modern world it is a pivotal reference publication for educators students and researchers in fields related to sociology technology and the humanities ongoing advancements in modern technology have led to significant developments in artificial intelligence with the numerous applications available it becomes imperative to conduct research and make further progress in this field artificial intelligence concepts methodologies tools and applications provides a comprehensive overview of the latest breakthroughs and recent progress in artificial intelligence highlighting relevant technologies uses and techniques across various industries and settings this publication is a pivotal reference source for researchers professionals academics upper level students and practitioners interested in emerging perspectives in the field of artificial intelligence this book constitutes the refereed proceedings of the 13th international conference on persuasive technology persuasive 2018 held in waterloo on canada in april 2018 the 21 revised full papers and 4 short papers presented were carefully reviewed and selected from 59 submissions the papers demonstrate how persuasive technologies can help solve societal issues they explore new frontiers for persuasive technology such as personalized persuasion new sensor usage uses of big data and new ways of creating engagement through gaming or social connection focusing on a variety of technologies e g web wearables ai and smart environments the papers are organized in the following topical sections social means to persuasion nudging and just in time interventions design principles and practices persuasive games personalization and tailoring and theoretical reflections vols for may 1929 dec 1958 include the journal of the american society of heating and air conditioning engineers called in 1929 54 american society of heating and ventilating engineers in journal section

combustion engineering gas utilisation is a practical guide to sound engineering practice for engineers from industry and commerce responsible for the selection installation designing and maintenance of efficient and safe gas fired heating equipment

The Homeowner's Handbook to Energy Efficiency *2008*

home inspectors must understand how heat is generated how it is spread around how it is controlled and how it is made safe this text also discusses how to discard the waste products of heating how much heat is needed and why homes can be uncomfortable even when enough heat is provided this in depth book addresses these issues for two of the most common home heating methods gas and oil furnances

Machine Learning and Knowledge Discovery in Databases *2015-08-28*

residential buildings have continuously improved in energy efficiency partly as a consequence of the introduction of energy regulations in many countries although better thermal properties and systems efficiency have lowered energy consumption for space heating in recent decades substantial differences in energy consumption in similar dwellings are still being observed these differences in consumption are thought to be caused by differences in occupancy patterns by quality of construction and by rebound effects this research addresses the effect of energy performance regulations and occupant behaviour on energy consumption for space and water heating in dwellings built after the introduction of the energy performance regulations in the netherlands the results of this research show that improving the energy efficiency of buildings alone is not enough to decrease that energy consumption

Start-Up Creation *2020-05-24*

given that institutions of higher education have a predisposition to compartmentalize and delineate areas of study creative technology may seem oxymoronic on the contrary the very basis of western thought is found in the idea of transcendent knowledge the marriage of opposing disciplines therefore acts as a more holistic approach to education creative technologies for multidisciplinary applications acts as an inspiration to educators and researchers who wish to participate in the future of such multidisciplinary disciplines because creative technology encompasses many applications with the realm of art gaming the humanities and digitization this book features a diverse collection of relevant research for the modern world it is a pivotal reference publication for educators students and researchers in fields related to sociology technology and the humanities

Popular Science *1951-11*

ongoing advancements in modern technology have led to significant developments in artificial intelligence with the numerous applications available it becomes imperative to conduct research and make further progress in this field artificial intelligence concepts methodologies tools and applications provides a comprehensive overview of the latest breakthroughs and recent progress in artificial intelligence highlighting relevant technologies uses and techniques across various industries and settings this publication is a pivotal reference source for researchers professionals academics upper level students and practitioners interested in emerging perspectives in the field of artificial intelligence
