empirical evidence from diaries and letters to x radiographs of paintings this book fills important gaps in our knowledge of stuart and connects the strange visual effects in some of stuart s paintings with cognitive deficits attendant with the disorder in addition to stuart other bipolar artists including george romney raphaelle peale gilbert stuart newton and william rimmer are discussed in relation to these deficits revealing patterns which carry broader implications for all manic depressive artists this volume is a significant contribution not only to studies of stuart and the four other painters but also to our understanding of the mind of a manic depressive artist it bridges the broad disciplines of art history and psychopathology
