Concise Glossary of Geology 2007-10-01

there has been a great upsurge in the teaching and practice of geology in india during the last few decades mainly because of development of mineral and petroleum industries soon after independence there were few universities teaching this subject but thereafter there has been an upsurge and now there are geology departments in most universities and their numbers are growing there is however a great dearth of indian text and reference books this work is designed as a much needed aid to students teachers and professionals alike like any modern science the science of geology has its own nomenclature and terminology

Elements of Properties of Matter 2008

the book is a comprehensive work on properties of matter which introduces the students to the fundamentals of the subject it adopts a unique ab initio approach to the presentation of matter solids liquids and gasses with extensive usage of calculus throughout the book for each topic the focus is on optimum blend of theory as well as practical application examples and extensive exercises solved with the logarithms reinforce the concepts and stimulate the desire among users to test how far they have grasped and imbibed the basic principles it primarily caters to the undergraduate courses offered in indian universities

Science of Religion and Religion of Science 2016-07-11

this book is about the ignorance of the learned of all the civilisations of the world india s was one of the oldest and most scientific but it met its grave in the land of its birth at the hands of its own people religion was deliberately misconstrued by sinister and vested interests for commercial gains and to hold sway over the people the result we are now a nation of mental weaklings other religions of the world fare no better the church ruled science galileo s case is exemplary islam s cut throat fundamentalism spearheaded by isis and al qaeda is a certain danger to the survival of humanity should they lay their hands on a nuclear bomb it will be curtains for the world for sure this is not religion the root cause of this evil is our misconception of true religion and true science these are great forces working in consonance with each other at the big bang there was one unifying force science and religion unify the laws of nature religion is the code of right conduct and science is the code of right application of natural laws both are complementary to each other if you and your generation want to live without fear of impending doom appreciate this harmony of science and religion built in the universe this should be the law written on the conscience of the people no conflict no pain

ELEMENTS OF GEOLOGY *2008-04-22*

aimed at b sc students of geology this introductory text develops a basic understanding of the earth as a complex evolving system of geological processes this book will also be of immense use to those postgraduate students of geology who opt for this stream after graduating in disciplines other than geology geology as a science has recently gained increasing importance because of the current developments in oil and mineral exploration and also because of recent occurrences of earthquakes and tsunamis this book covers the entire spectrum of the geologic concepts and relates them to the main processes of geomorphology earthquakes and volcanoes important types of the three categories of rocks igneous sedimentary and metamorphic that form the crust of the earth are described with their characteristic mineralogy major structures that are born of tectonic activities are discussed palaeontological descriptions cover not only the plant and animal groups but also other evidences of life in the geological record and evolution an important feature of the text is that modern stratigraphic methods of classification are outlined clearly and the latest geologic time scale with numerical ages as approved in 2004 by the international commission on stratigraphy of the international union of geological sciences is incorporated

Research in library and information science in india *1989*

with scientific developments certain new technologies based on such scientific principles have now been adopted worldwide this has resulted in complete or partial eradication of some old technologies changes in technologies have become more apparent after the midtwentieth century the world prosperity has improved now and constraints of the second world war are no longer felt thus the light production using incandescent lightbulb has now become a thing of the past while fluorescence based light production has resulted in saving large amounts of generated electric power thermal steam powered coal based locomotive are now completely replaced by diesel and electricity powered locomotives technological changes are constantly being reported in the news even before this book was published in which the replacement of electronic tubes valves by silicon based transistors was included as a chapter now there is report of carbon nanotubes replacing transistors in agriculture there has been a report of a genetically engineered plant tomtato that shall produce both potatoes and tomatoes human memory is short lived the purpose of the present book is to demonstrate such changes with selected examples only i hope more of the younger generation shall learn that the technologies which they are now using had their old predecessors human memory is short lived the new generation may not be aware of a once useful technology getting extinct or being replaced due to the development of a better and stronger new technology examples of such changes are numerous but here we have only used selected examples to illustrate such changes

Proceedings of the Indian Science Congress *1994*

metropolitan governance is an indispensable book for understanding the governance of metropolitan cities the book covers an insight into the governance in ahmedabad and hyderabad the participatory metropolitan governance is also of interest to the students of sociology social work and geography the students of public administration would find it useful to study the decentralisation of powers from centre to state to local level government for academicians engaged in service delivery in metropolitan areas it brings in clarity regarding role of varied stakeholders in governance

Indian Science Abstracts *1978*

provides the most recent developments in microscopy techniques and types of analysis used to study the microstructure of dairy products this comprehensive and timely text focuses on the microstructure analyses of dairy products as well as on detailed microstructural aspects of them featuring contributions from a global team of experts it offers great insight into the understanding of different phenomena that relate to the functional and biochemical changes during processing and subsequent storage structured into two parts microstructure of dairy products begins with an overview of microscopy techniques and software used for microstructural analyses it discusses in detail different types of the following techniques such as light microscopy including bright field polarized and confocal scanning laser microscopy and electron microscopy mainly scanning and transmission electron microscopy the description of these techniques also includes the staining procedures and sample preparation methods developed emerging microscopy techniques are also covered reflecting the latest advances in this field part 2 of the book focuses on the microstructure of various dairy foods dividing each into sections related to the microstructure of milk cheeses yogurts powders and fat products ice cream and frozen dairy desserts dairy powders and selected traditional indian dairy products in addition there is a review of the localization of microorganism within the microstructure of various dairy products the last chapter discusses the challenges and future trends of the microstructure of dairy products presents complete coverage of the latest developments in dairy product microscopy techniques details the use of microscopy techniques in structural analysis an essential purchase for companies researchers and other professionals in the dairy sector microstructure of dairy products is an excellent resource for food scientists technologists and chemists and physicists rheologists and microscopists who deal in dairy products

Developments and Changes in Science Based Technologies *2014-03-06*

the study of nanostructures has become in recent years a theme common to many disciplines in which scientists and engineers manipulate matter at the atomic and molecular level in order to obtain materials and systems with significantly improved properties carbon nanomaterials have a unique place in nanoscience owing to their exceptional thermal electrical chemical and mechanical properties finding application in areas as diverse as super strong composite materials energy storage and conversion supercapacitors smart sensors targeted drug delivery paints and nanoelectronics this book is the first to cover a broad spectrum of

carbon nanomaterials namely carbon nanofibers vapor grown carbon fibers different forms of amorphous nanocarbons besides carbon nanotubes fullerenes graphene graphene nanoribbons graphene quantum dots etc in a single volume

Metropolitan Governance 2014

this is a research journal of science and technology it covers all branches of science and technology it publishes original research papers on all branches of science and technology

Firsts in Space 2021-02-17

food legumes are important constituents of the human diet and animal feed where they are crucial to a balanced diet supplying high quality proteins these crops also play an important role in low input agricultural production systems by fixing atmospheric nitrogen despite systematic and continuous breeding efforts through conventional methods substantial genetic gains have not been achieved with the rise in demand for food legumes pulses and increased market value of these crops research has focused on increasing production and improving the quality of pulses for both edible and industria

Poultry Genetics, Breeding and Biotechnology 2003

the editorial office of frontiers in plant science would like to thank all the chief editors associate editors and review editors that played an integral part in frontiers innovative collaborative peer review process in 2020 in particular we would like to recognize and thank prof joshua l heazlewood our now former field chief editor for his commitment support and enthusiasm for the plant science field josh s dedication and leadership has helped frontiers in plant science become the most cited journal in the field with a strong editorial community looking forward we re excited to welcome prof yunde zhao as our new field chief editor in 2021 having been with frontiers in plant science since 2017 yunde has contributed extensively to the development of the journal and will continue to ensure the journal goes from strength to strength

Rajasthan Bibliographic Index in Social Science 1985

a collection of papers from the american ceramic society s 35th international conference on advanced ceramics and composites held in daytona beach florida january 23 28 2011 this issue includes papers presented in the 5th international symposium on nanostructured materials and nanotechnology on topics such as nanotubes nanorods nanowires and other one dimensional structures nanostructured membranes thin films and functional coatings synthesis functionalization

and processing of nanostructured materials and advanced applications

Nuclear Science Abstracts 1973

correlation between rational scientific thought and dogmatic beliefs of ancient mythology a study

Journal of Scientific and Industrial Research 2012-07

the puils series delivers up to date reviews of progress in ultrafast intense laser science a newly emerging interdisciplinary research field spanning atomic and molecular physics molecular science and optical science which has been stimulated by the recent developments in ultrafast laser technologies each volume compiles peer reviewed articles authored by researchers at the forefront of each their own subfields of uils every chapter opens with an overview of the topics to be discussed so that researchers unfamiliar to the subfield as well as graduate students can grasp the importance and attractions of the research topic at hand these are followed by reports of cutting edge discoveries this tenth volume covers a broad range of topics from this interdisciplinary research field focusing on electron scattering by atoms in intense laser fields atoms and molecules in ultrashort pulsed euv and x ray light fields filamentation induced by intense laser fields and physics in super intense laser fields

Microstructure of Dairy Products 2018-10-22

this book introduces the idea of policy space as an innovative way to reframe recent developments in global governance it brings together a wide ranging group of leading experts in international law trade human rights political economy international relations and public policy who have been asked to reflect on this important development in globalization

Elements of Properties of Matter 1974

the present collection examines the many different ways in which religions appeal to the authority of science the result is a wide ranging and uniquely compelling study of how religions adapt their message to the challenges of the contemporary world

Carbon Nanomaterials 2016-12-19

completely revised updated and enlarged now encompassing two volumes this third edition of fruit and vegetables reviews and evaluates in comprehensive detail postharvest aspects of a very wide international range of fresh fruit and vegetables as it applies to their physiology quality technology harvest maturity determination harvesting methods packaging postharvest treatments controlled atmosphere storage ripening and transportation the new edition of this definitive work which contains many full colour photographs and details of species not covered in the previous editions provides key practical and commercially oriented information of great use in helping to ensure that fresh fruit and vegetables reach the retailer in optimum condition with the minimum of deterioration and spoilage with the constantly increasing experimental work throughout the world the book incorporates salient advances in the context of current work as well as that dating back over a century to give options to the reader to choose what is most relevant to their situation and needs this is important because recommendations in the literature are often conflicting part of the evaluation of the published results and reviews is to guide the reader to make suitable choices through discussion of the reasons for diverse recommendations also included is much more on the nutritional values of fruit and vegetables and how these may vary and change postharvest there is also additional information on the origin domestication and taxonomy of fruit and vegetables putting recommendations in context fruits and vegetables 3e is essential reading for fruit and vegetable technologists food scientists and food technologists agricultural scientists commercial growers shippers packhouse operatives and personnel within packaging companies researchers and upper level students in food science food technology plant and agricultural sciences will find a great deal of use within this popular book all libraries in research establishments and universities where these subjects are studied and taught should have copies readily available for users
