## **Evaluation Methods In Research 2005**

practice and research of peace education has grown in the recent years as shown by a steadily increasing number of publications programs events and funding mechanisms the oft cited point of departure for the peace education community is the belief in education as a valuable tool for decreasing the use of violence in conflict and for building cultures of positive peace hallmarked by just and equitable structures educators and organizations implementing peace education activities and programming however

often lack the tools and capacities for evaluation and thus pay scant regard to this step in program management reasons for this inattention are related to the perceived urgency to prioritize new and more action in the context of scarce financial and human resources notwithstanding violence or conflict the lack of skills and time to indulge in a thorough evaluative strategy and the absence of institutional incentives and support evaluation is often demand driven by donors who emphasize accounting given the current context of international development assistance and budget cuts program evaluation is considered an added burden to already over tasked programmers who are unaware of the incentives and of assessment techniques peace education practitioners are typically faced with forcing evaluation frameworks techniques and norms standardized for traditional education programs and venues together these conditions create an unfavorable environment in which evaluation becomes under valued de prioritized and mythologized for its laboriousness this volume serves three inter related objectives first it offers a critical reflection on theoretical and methodological issues regarding evaluation applied to peace education interventions and programming the overarching questions of the nature of peace and the principles guiding peace education as well as governing theories and assumptions of change transformation and complexity are explored second the volume investigates existing quantitative qualitative and mixed methods evaluation practices of peace educators in order to identify what needs related to evaluation persist among practitioners promising practices are presented from peace education programming in different settings formal and non formal education within various groups e g children youth police journalists and among diverse cultural contexts finally the volume proposes ideas of evaluation novel techniques for experimentation and creative adaptation of tools from related fields in order to offer pragmatic and philosophical substance to peace educators next moves and inspire the agenda for continued exploration and innovation the authors come from variety of fields including education peace and conflict studies educational evaluation development studies comparative education economics and psychology

provides cooperative education and internship professionals and researchers design carry out and disseminate quality research and evaluation studies highlights key programs and shows how to demonstrate sound learning outcomes publisher description

## **Program Evaluation and Review Technique 1966**

this volume gathers some of the methods being developed by evaluators from university settings and the private sector while providing models and methods these authors also raise larger questions such as how can schools meet the challenge of educating all children without being limited by the educational legacy of a one size fits all curriculum and normative testing more than documenting an apprenticeship to gadgetry evaluators are seeking to measure meaningful learning and changes in teaching investigating approaches that are not possible or that are less accessible when students are in traditional classrooms without technology in this first volume of the series research methods for educational technology rmet the contributing authors draw upon examples of their work evaluating the implementation and development of educational technology as well as the impact of policies and programs in this field within this volume

several authors have written about the implementation and evaluation of technology across cultures and national boundaries pointing to an area of research that will rapidly expand in this decade the concern for meeting the needs of policymakers is also apparent in several of these chapters but there is tension between providing them with positive results to support their efforts and reexamining the questions they are asking and how these questions are developed we know that evaluation is not the extended arm of public relations and yet it becomes clear that evaluators are often asked to demonstrate a project is successful on the threat that the funding will be cut while this decision making process fits the timetable of the fiscal year it does not acknowledge that evaluation can be formative and strengthen programs this timetable also ignores the investment of time that is needed when implementing innovations like the internet into teaching and learning many of the authors included in this volume write from the context of evaluating federally funded programs and they provide valuable insight for future projects which are created and evaluated at the state level as technology initiatives are developed and funded outside of the federal arena more evaluators will be called upon from approaches developed from federally funded projects we can build upon these methods and models for evaluation within regional projects to answer questions related to budgets and accountability as we answer these immediate questions we can move forward to examine the long term impact of technology and the possibility that exercises in conformity will replace the adventure of human enlightenment for our children

### ***Evaluation techniques for classroom teachers 1971***

a growing body of research demonstrates how the arts including literary performing and visual arts as well as architecture and design can greatly enhance the experience of healthcare contributing to improved health outcomes a better patient experience and lower healthcare costs this unique book provides an overview of what the arts in healthcare can achieve and how to implement the arts in the most effective manner exploring possibilities for innovative program design and implementation from healing gardens through public performances to bedside activities the text draws on examples from a wide range of arts the book then goes on to look at how programs can be aimed at specific populations and fields such as children palliative care and caregivers this comprehensive book is an invaluable reference for all those studying or engaged in creating designing managing and evaluating arts in healthcare programs and initiatives
