New York Times Story of the Yankees 2017-04-04

There has never been a team like the New York Yankees. No team has won as many World Series titles, no team has hit as many home runs, no team has had as many great superstars playing for them. Ruth, Gehrig, DiMaggio, Mantle, Berra, Ford, Rivera, and Jeter to name a few. No team draws as many fans and enemies as the Yankees. The New York Times story of the Yankees includes more than 350 articles chronicling the team's most famous milestones as well as the best writing about the ball club. Each article is hand-selected from the Times by the peerless sportswriter Dave Anderson, creating the most complete and compelling history to date about the Yankees. Organized by era, the book covers the biggest stories and events in Yankee history, such as the purchase of Babe Ruth, Roger Maris's 61st home run, and David Cone's perfect game. It chronicles the team's 27 World Series championships and 40 American League pennants, its rivalries with the Brooklyn Dodgers and the Boston Red Sox, controversial owners, players, and managers, and more. The articles span the years from 1903, when the team was known as the New York Highlanders, to the present, and include stories from well-known and beloved Times reporters such as Arthur Daley, John Kieran, Leonard Koppett, Red Smith, Tyler Kepner, Ira Berkow, Richard Sandomir, Jim Roach, and George Vecsey. This up-to-date paperback edition includes Derek Jeter's last season and Yogi Berra's obituary, is illustrated with hundreds of black and white photographs that capture every era, a foreword by die-hard Yankees fan Alec Baldwin, and completes the celebration of baseball's greatest team.

The Annotated Old Four Legs 2017-11-01

When the famous South African fish scientist Professor JLB Smith published *Old Four Legs*, the story of the coelacanth in 1956, he created an international sensation. After all, this 400-million-year-old fish, known only from fossil remains, was thought to have become extinct around 66 million years ago. JLB Smith's dramatic account of the discovery of the first and second coelacanths in 1938 and 1952 turned him into a cult figure and put South African science on the world map. His book was eventually published in six English editions and translated into nine foreign languages.

bruton s the annotated old fourlegs includes a facsimile reprint of the original book to which he has added notes and images in the margins that provide an interesting and revealing commentary on smith s text as well as new introductory and explanatory chapters that bring the coelacanth story up to date

it seems to be certain says the abbé mcgeoghehan that ireland continued uninhabited from the creation to the deluge with this assurance to help us on our onward way i may venture to supplement it by saying that little is known about the first or even about the second third and fourth succession of settlers in ireland at what precise period what is known as the scoto celtic branch of the great aryan stock broke away from its parent tree by what

route its migrants travelled in what degree of consanguinity it stood to the equally celtic race or races of britain what sort of people inhabited ireland previous to the first aryan invasion all this is in the last degree uncertain though that it was inhabited by some race or races outside the limits of that greatest of human groups seems from ethnological evidence to be perfectly clear when first it dawns upon us through that thick darkness which hangs about the birth of all countries whatever their destiny it was a densely wooded and scantily peopled island lying a loose as old campion the elizabethan historian tells us upon the west ocean though his further assertion that in shape it resembleth an egg plain on the sides and not reaching forth to the sea in nooks and elbows of land as brittaine doeth cannot be said to be quite geographically accurate the last part of the description referring evidently to the east coast the only one with which like most of his countrymen he was at that time familiar geographically then and topographically it was no doubt in much the same state as the greater part of it remained up to the middle or end of the sixteenth century a wild tangled roadless land that is to say shaggy with forests abounding in streams abounding too in lakes far more doubtless than at present drainage and other causes having greatly reduced their number with rivers bearing the never failing tribute of the skies to the sea yet not so thoroughly as to hinder enormous districts from remaining in a swamped and saturated condition given up to the bogs which even at the present time are said to cover nearly one sixth of its surface
