In Our Hands 2010 a call for better child care policies exploring the reasons why there has been so little headway on a problem that touches so many families working mothers are common in the united states in over half of all two parent families both parents work and women's paychecks on average make up 35 percent of their families incomes most of these families yearn for available and affordable child care but although most developed countries offer state funded child care it remains scarce in the united states and even in prosperous times child care is rarely a priority for u.s. policy makers in In Our Hands the struggle for u.s. child care policy elizabeth palley and corey s. shdaimah explore the reasons behind the relative paucity of u.s. child care and child care support they examine the history of child care advocacy and legislation in the united states from the child care development act of the 1970s that was vetoed by nixon through the obama administration's child care development

block grant the book includes data from interviews with 23 prominent child care and early education advocates and researchers who have spent their careers seeking expansion of child care policy and funding and an examination of the legislative debates around key child care bills of the last half century palley and shdaimah analyze the special interest and niche groups that have formed around existing policy arguing that such groups limit the possibility for debate around u s child care policy

**Piggy Banks To Porsches** 2023-10-25 digging deep aiming high is a memoir of my career as a teacher and administrator in the new york city public schools my experiences teaching in the middle school and my tenure working as an assistant principal and principal at the manhattan center high school for science and mathematics paint a contrasting picture both schools were dramatically different in terms of providing job satisfaction and student achievement it is remarkable how two different schools could produce incredibly different results when teams of dedicated educators truly put kids first manhattan center attracted trailblazers who made it their mission to defy the odds to raise the bar to reject mediocrity and encourage all children to succeed as a team we decided early on to evaluate all of our programs and academic results by digging deep and aiming high to work toward the highest level of educational achievement for our kids failure was never an option yet we realized that the bureaucratic challenges of working in a large school system and in an impoverished inner city neighborhood would pose numerous roadblocks in accomplishing our goals the school was created in 1982 as a collaboration between the high school division and district 4 located in east harlem this project was an educational experiment it being the first high school to accept students from anywhere in the city as long as they were willing to make a commitment to the rigors of a college bound program and a longer school day the campus was unique in that the school also housed an elementary school and junior high program in the same building working in this environment was especially gratifying for staff to be surrounded by kids of all ages and by students who were accepted regardless of their zip

code the parents and their children were especially grateful for the opportunity to attend a school of their choice rather than be forced to accept their neighborhood school which in many cases had a poor academic rating what makes this story so noteworthy is that we the stakeholders in this one special school recognized that we would need to seek out numerous public and private partnerships to assist us in the task of educating our youngsters with the abundance of resources and the generosity of time provided by organizations such as general electric nbc mt sinai hospital local universities nyu columbia hunter college and the children s aid society a community based organization to name a few we were able to create miracles for kids with the help of hundreds of mentors and many volunteers together with teachers and auxiliary personnel working 10 12 hour days and often on weekends we created a top notch academic program our entire school population was accepted into colleges with prestigious scholarships and financial aid packages thanks to the dedication of a very talented teaching staff building the school from scratch in 1982 was far from easy the growing pains of attracting competent staff willing to work collaboratively and dedicated leaders who were willing to work tirelessly to provide an environment for teachers to flourish were always a challenge the explosive issues of funding for public education desegregation privatization of schools the role of law enforcement and the involvement of the unions were very real then and continue to be current problems facing educators today digging deep aiming high will provide the reader with a thorough examination of the ways in which our team dealt with these controversies as well as with the politicization of diversity equity and inclusion issues it is my hope that our best practices in this one very unique high school will serve as a road map to the resolution of many of the obstacles facing our public schools nationwide today and tomorrow

McGill's Life Insurance 2018-12-27 this book is the result of cooperation between the scientists of the university of ljubljana and the jagiellonian university in krakow the aim of the authors and editors was not to create a compendium of knowledge about the current state of the development of education in the field of lifelong learning the creation of such a publication that would present a comprehensive photographic image of the state of research and practices in the field of lifelong learning would be so laborious and long term that it would not keep up with the constant changes which appear in reality the authors decided to present a compilation of examples illustrating areas worth considering contexts and practices as well as certain problems and dilemmas the image of the reality outlined in this book is very selective but spatial to such an extent that it enables to grasp its size and dynamism of the development it encompasses not only significant issues from the standpoint of economy in the scope of key competences but also the concepts related to the social cultural scientific artistic and common schooling leading to more comprehensive personal development and embraces raising the quality of life
