or beginning of the tenth century the text which is substantially shorter than Bede's original was well known and actively used in medieval England and was highly influential. However, despite its importance, it has been little studied. In this first book on the subject, the author places the work in its manuscript context, arguing that the text was an independent ecclesiastical translation thoughtfully revised for its new audience rather than looking back on the age of Bede from the perspective of a king centralizing power and building a community by recalling a glorious English past. The Old English version of Bede's *Historia* transforms its source to focus on local history, key Anglo-Saxon saints and their miracles. The author argues that its reading reflects an ecclesiastical setting more than a political one, with uses more hagiographical than royal and that rather than being used as a class book or crib, it functioned as a resource for vernacular preaching as a corpus of vernacular saints' lives for oral performance and episcopal authority. Sharon M. Rowley is Associate Professor of English at Christopher Newport University. *The Routledge Handbook of Translation, Feminism and Gender* provides a comprehensive state-of-the-art overview of feminism and gender awareness in translation and translation studies today, bringing together work from more than 20 different countries, from Russia to Chile, Yemen, Turkey, China, India, Egypt, and the Maghreb, as well as the UK, Canada, the USA, and Europe. This handbook represents a transnational approach to this topic, which is in development in many parts of the world. With 41 chapters, this book presents, discusses, and critically examines many different aspects of gender in translation and its effects, both local and transnational, providing overviews of key questions and case studies of work currently in progress. This handbook is the essential reference and resource for students and researchers of translation, feminism, and gender. Envisioning machine translation in the information future: when the organizing committee of AMTA 2000 began planning it was in that brief moment in history when we were absorbed in contemplation of the passing of the century and the millennium. Nearly everyone was comparing lists of the most important accomplishments and people of the last 10, 100, or 1000 years, imagining the radical changes likely over just the next few years and at least mildly anxious about the potential Y2K apocalypse. The millennial theme for the conference, Envisioning MT in the Information Future, arose from this period. The year 2000 has now come and nothing terrible has happened yet to our electronic infrastructure. Our musings about great people and events probably did not ennoble us much, and whatever sense of jubilee we held has since dissipated, so it may seem a bit obsolete or anachronistic to cast this AMTA conference into visionary themes. latin america and existentialism is a preliminary intellectual history prioritising literature and contextualising latin american philosophical contributions from the 1860s to the late 1930s decades that coincide with the canon s foundational years this study takes a pan american approach to move the critical focus away from the river plate a region that has received some critical attention in doing so it focuses on existentially neglected writers such as brazil s machado de assis and graciliano ramos josé asunción silva from colombia cuba s enrique labrador ruiz and the chilean maría luisa bombal underappreciated latin american philosophical voices and existentialism s canonical perspectives allow the author to discuss the many problems concerning the

experiencing i of these authors and to consider such existential themes as ethical vacuity forlornness the crisis of insufficiency the conundrum of choice and the enigma of authentic being the concentration on latin america s existentially hued interest in the human condition is an invitation to the reader to reconsider the peripheral status in the existentialism canon
