Building B2B Applications with XML

2002-03-14

what every it manager and system administrator needs to know about the technology that drives the b2b marketplace the b2b marketplace is rapidly exploding fast outpacing business to consumer e commerce and expected to reach more than 7 trillion in sales by 2004 this guidebook equips xml authors programmers and managers with the technology know how they need to create and develop simple yet robust b2b systems from scratch it provides easy to understand explanations on how and why xml and other important technologies such as http and mime are driving the b2b marketplace along with xml and java code examples readers will find broad coverage of emerging standards and protocols including simple object access protocol soap ebxml from oasis un cefact xml common business language xcbl biztalk and commerce xml cxml

B2B Integration

2013-06-29

business to business b2b integration is a buzzword which has been used a lot in recent years with a variety of meanings starting with a clear technical definition of this term and its relation to topics like a2a application to application asp application service provider a2a and b2c business to consumer christoph bussler outlines a complete and consistent b2b integration architecture based on a coherent conceptual model he shows that b2b integration not only requires the exchange of business events between distributed trading partners across networks like the internet but also demands back end application integration within business processes and thus goes far beyond traditional approaches to enterprise application integration approaches his detailed presentation describes how b2b integration standards like rosettanet or swift the application integration standard j2ee connector architecture and basic standards like xml act together in order to enable business process integration the book is the first of its kind that discusses b2b concepts and architectures independent of specific and short term industrial or academic approaches and thus provides solid and long lasting knowledge for researchers students and professionals interested in the field of b2b integration

Deploying Solutions with .NET Enterprise Servers
