The Politics of Environment in Southeast Asia 2002-01-31

the environment in southeast asia is now a major issue of topical concern first book to give analysis in depth of the political processes involved in environmental disputes provides a good selection of case studies in the region questions the assumption that the middle classes are in the vanguard of the environmental movement

Community-Based Monitoring Initiatives of Water and

Environment: Evaluation of Establishment Dynamics and Results 2021-02-25

citizen participation in water and environmental management via community based monitoring cbm has been praised for the potential to facilitate better informed more inclusive transparent and representative decision making however methodological and empirical research trying to conceptualize and evaluate the dynamics at play that might enable or hinder these initiatives from delivering on their potential is limited this research contributed to the conceptualization of cbms through development of a conceptual framework that is suitable for context analysis process evaluation and impact assessment of cbms the cpi framework this conceptualization provides an interpretation of what community means in the context of a cbm initiative in addition this research contributed to the existing empirical knowledge about the establishment functioning and outcomes of cbms by testing the cpi framework for studying two real life cbms throughout the lifetime of an eu funded project the ground truth 20 the first cbm is called grip op water altena that focuses on the issue of pluvial floods in land van heusden en altena of the netherlands the second cbm is maasai mara citizen observatory and aims at contributing to a better balance between biodiversity conservation and sustainable livelihood management in the mara ecosystem in kenya

Artificial Evolution 2012-11-28

this book constitutes selected best papers from the 10th international conference on artificial evolution ea 2011 held in Angers France in October 2011. Initially 33 full papers and 10 post papers were carefully reviewed and selected from 64 submissions. This book presents the 19 best papers selected from these contributions. The papers are organized in topical sections on ant colony optimization, multi-objective optimization, analysis, implementation, and robotics, combinatorial optimization, learning, and parameter tuning, new nature-inspired models, probabilistic algorithms, theory, and evolutionary search and applications.

Handbook of Globalization and the Environment 2017-09-25

Proponents of globalization argue that it protects the global environment from degradation and promotes worldwide sustainable economic growth, while opponents argue the exact opposite. Examining the local, national, and international impacts of globalization, the *Handbook of Globalization and the Environment* explores strategies and solutions that support healthy economic growth, protect the environment, and create a more equitable world. The book sets the stage with coverage of global environmental issues and policies, explores international sustainable development, the evolution of global warming policy, transborder air pollution, desertification, space, and the global environment, and human right to water, building on

this foundation the editors discuss global environmental organizations and institutions with coverage of the un s role in globalization the trade environment nexus the emergence of ngos and an analysis of the state of global environmental knowledge and awareness from an international and comparative perspective emphasizing the effects of increasingly integrated global economy on the environment and society the book examines environmental management and accountability it addresses green procurement provides an overview of u s environmental regulation and the current range of voluntary and mandatory pollution prevention mechanisms in use explores a two pronged approach to establishing a sustainable procurement model and examines a collaborative community based approach to environmental regulatory compliance the book concludes with an analysis of controversial issues such as eco terrorism north south disputes environmental justice the promotion of economic growth through globalization in less developed countries and the ability of scientists to communicate ideas so that policy makers can use science in decision making

The Right of the Child to a Clean Environment 2017-11-30

this title was first published in 2000 a discussion on the right of a child to a clean environment it links two important contemporary issues human rights and the environment the volume consists of the extended versions of some of the papers which were presented at a workshop on the right of a child to a clean environment held at queen mary and

westfield college university of london in 1997 and there are also some additional contributions the workshop participants included michael anderson and sylvia bluck harry post holly cullen and olufemi elias the additional contributors include veronic wright maria g doglioli and soledad aguilár there are essays on general issues selected case studies and annexes

Europeanization of Environmental Policy in the New Europe

2016-04-22

prior to the european union eu 2004 2007 enlargement there were several predictions that this event would hamper progressive decision making within the eu on environmental policy it was believed that the new member states had adopted eu rules as a consequence of the eu s conditionality and consequently they would rather slow down the reform speed in the field after accession in this book mats braun offers an up to date account of how post communist member states have handled policy initiatives in the field of environmental policy after accession using detailed case studies of how bulgaria the czech republic poland and romania dealt with two different eu policy initiatives reach and the climate energy package he explores whether social norms and the process of socialization can help us understand why the track record of new member states in the area of environmental policy is more varied than was originally envisaged prior to enlargement

Inquiry-Based Learning for Science, Technology, Engineering, and Math (STEM) Programs 2015-10-20

this volume covers the many issues and concepts of how ibl can be applied to stem programs and serves as a conceptual and practical resource and guide for educators and offers practical examples of ibl in action and diverse strategies on how to implement ibl in different contexts

Air Transport and the Environment **2016-04-01**

air transport and the environment provides an overview of the main issues relating to aviation environmental impacts it explains the challenge facing policymakers in terms of sustainable development focusing on the importance of balancing the industry s economic social and environmental costs and benefits both for people living now and for future generations individual chapters review the current scientific understanding of the main aviation environmental impacts climate change local air pollution and aircraft noise various responses to those issues are also considered including a range of policy options based on regulatory market based and voluntary approaches key concepts such as environmental capacity radiative forcing and carbon offsetting are explained in addition the book emphasises the main implications of aviation environmental issues for policymakers and for the management of the air transport

industry debates about the environmental impacts of flying often generate strongly polarised reactions yet this book adopts a constructive approach to the subject and attempts to present the environmental issues in a clear straightforward manner it aims to provide a policy relevant synthesis of a wide range of perspectives rather than advocating one particular viewpoint yet the central purpose of this book is to bring the sustainable development challenge facing the air transport industry to the fore and so to inform effective policy responses air transport plays a critical role in supporting economies and societies that are increasingly interconnected by globalisation this book presents the view that the vital economic and social benefits of the air transport industry should not be lost and in fact could be distributed far more widely and equitably but that the environmental impacts of air transport nevertheless require urgent and effective management air transport and the environment has been written primarily for professionals in the air transport industry policymakers and regulators it is also intended for use by academic researchers students and others who are interested in the complex relationship between air transport and the environment

Artificial Intelligence for Big Data

2018-05-22

build next generation artificial intelligence systems with java key features implement ai techniques to build smart applications using deeplearning4j perform big data analytics

to derive quality insights using spark mllib create self learning systems using neural networks nlp and reinforcement learning book description in this age of big data companies have larger amount of consumer data than ever before far more than what the current technologies can ever hope to keep up with however artificial intelligence closes the gap by moving past human limitations in order to analyze data with the help of artificial intelligence for big data you will learn to use machine learning algorithms such as k means svm rbf and regression to perform advanced data analysis you will understand the current status of machine and deep learning techniques to work on genetic and neuro fuzzy algorithms in addition you will explore how to develop artificial intelligence algorithms to learn from data why they are necessary and how they can help solve real world problems by the end of this book you ll have learned how to implement various artificial intelligence algorithms for your big data systems and integrate them into your product offerings such as reinforcement learning natural language processing image recognition genetic algorithms and fuzzy logic systems what you will learn manage artificial intelligence techniques for big data with java build smart systems to analyze data for enhanced customer experience learn to use artificial intelligence frameworks for big data understand complex problems with algorithms and neuro fuzzy systems design stratagems to leverage data using machine learning process apply deep learning techniques to prepare data for modeling construct models that learn from data using open source tools analyze big data problems using scalable machine learning algorithms who this book is for this book is for you if you are

a data scientist big data professional or novice who has basic knowledge of big data and wish to get proficiency in artificial intelligence techniques for big data some competence in mathematics is an added advantage in the field of elementary linear algebra and calculus

EU Enlargement and the Environment 2023-05-31

this volume focuses attention on key environmental and institutional changes associated with eastern expansion of the european union assessing and challenging prevailing views about the outcomes and processes of this historic development looking at four central themes capacity changes and limitations the eu s mixed messages and conflicting priorities non state actor roles and developments and the exchange of ideas and information the volume shows that enlargement will change the eu not just make it bigger and that eu officials and programs are improving aspects of environmental policy in cee countries even as they are making others less sustainable this book was previously published as a special issue of the journal environmental politics

Work-Based Learning 2001-02-16

work based learning

Transatlantic Environment and Energy Politics 2013-03-28

environmental and energy policies have become increasingly significant in European and North American politics. This fascinating book uses a wide range of case studies that embrace climate change, product standards, chemical regulations, renewable energy policies, food safety, and genetically modified organisms to examine areas of conflict and cooperation in the transatlantic relationship. While there are many areas where the European Union and the United States are following divergent policy paths, there are also many signs that a more cooperative transatlantic relationship could emerge in the future. Transatlantic environment and energy politics is highly relevant to understanding how the European Union and North America can cooperate more effectively in meeting today's many global environmental and energy policy challenges. It is essential reading for all advanced students and scholars.

Researching Education and the Environment 2007-10-25

Previously published as a special issue of *Environmental Education Research*, this collection includes some of the most influential and important articles contributed to the field over the last decade. Drawing out the best articles from volumes one to ten, the editors highlight six major themes: education and environment, education and energy, education and climate change, education and sustainable development, education and environmental justice, and education and environmental policy. This book is essential reading for all advanced students and scholars.

2017 CFR Annual Print Title 40 Protection of Environment - Parts 300 to 399 2017-07-01

enriching understanding of the current theoretical debate on project based learning and r d sourcing project based knowledge in organizing open innovation draws on innovation literature and knowledge based perspectives to solve open problems in the relationship between knowledge development at project level and how firms organize product innovation combining in house r d activities with inbound open innovation through field research in different industrial settings pharmaceutical automotive and machine tools and with complementary methodological approaches this book provides empirical evidence on how project knowledge features affect sourcing decisions at firm level due to the emerging interest in the management literature on project based organizations and on the relevance of project forms of organizing in a knowledge based economy this volume will appeal to scholars and students in business and management in particular those in innovation management organization theory and strategic management addressing the still open issue of how the firm level should be complemented by studies at the project level of analysis this book provides theoretical and empirical arguments on the advantages of a more fine grained level of analysis to understand how firms organize their innovation processes across boundaries

Project-Based Knowledge in **Organizing Open Innovation** **2014-07-10**

what is risk based auditing rba international organization for standardization iso incorporated risk based thinking rbt into iso 9001 2015 risk based auditing is the first book to address risk based auditing and risk based thinking which are fundamental to first party second party and third party auditing in all the new iso families of standards learn what rba and rbt mean and most importantly understand what you need to do to manage plan conduct and report risk based audits everyone who is certified to iso 9001 2015 or any iso standard should read this book to understand and implement rba and rbt what this book can do for you explains the integration of risk into auditing all iso management systems answers the critical questions you need to know about rba and risk management explains key risk concepts such as risk based auditing managing rba programs planning conducting and reporting risk based audits explains in detail iso 19011 2018 explains in detail the steps for planning conducting and reporting risk based audits presents insider tips and tools known to first party second party and third party auditors bonus materials resources access almost 2 000 risk and quality articles through cerm academy get lessons learned at the end of each key question get free course materials such as using fmea s in iso 9001 2015

Utah BLM Statewide Wilderness Environmental Impact Statement : Final 1990

this volume provides a comprehensive account of the linkages between environment and sustainable development in society from an interdisciplinary perspective with its case studies from across the world including countries such as india australia south africa sri lanka the united states croatia italy brazil japan and kenya it explores critical environmental issues concerning energy justice queer ecology mountain cultures incarceration energy strategies mining tourism pollution control mechanisms social impacts of oil and gas production contract farming gender mainstreaming climate change and droughts and adaptation strategies along with literacy leisure well being development sexuality sustainability and environmental education the book examines several dimensions within global environment of the adverse impact of developmental activities discusses sustainable development activities undertaken in contemporary times and underscores the importance of a just people centric policy framework in promoting sustainable development lucid and topical this book will be useful to scholars and researchers of environmental studies development studies sustainable development political studies sociology and political economy it will also interest policymakers development practitioners ngos and think tanks working on environment and sustainable development climate issues and sdgs

Risk Based Auditing Using ISO **19011:2018 2018-11-23**

Interior, Environment, and Related Agencies Appropriations for 2008, Part 6, February 28, 2007, 110-1 Hearings, * 2007

this impressive study compares the adoption of environmentally sound technology in industrial sectors in eight developing countries in combining a variety of quantitative and qualitative methodologies on rich empirical data the authors open the technological change black box and are able to formulate clear conclusions on the drivers and barriers for technological change a major contribution to better understanding and governing environmentally sound technological change arthur p j mol wageningen university the netherlands all theory is gray but the golden tree of life springs ever green says goethe this book is very green that is empirical about a green topic the adoption of

environmentally sound technologies in developing countries using triangulation for assessing the factors behind such choices a very nice study on an important topic rené kemp unu merit maastricht the netherlands industries located in developing countries have made major improvements in environmental performance since the rio earth summit of 1992 more specifically their record in reducing energy use and water pollutant intensities has been better than developed countries this significant new book investigates what motivates industries in developing countries to adopt environmentally sound technology est a subject about which very little is actually known the authors present the findings of a united nations study of the factors that determined est adoption by 105 manufacturing plants in four different sectors within eight developing countries they explore both factors internal to the plants as well as external factors including governments markets and civil society environment and industry in developing countries will be of great interest to development assistance agencies supporting programmes for industrial environmental management in developing countries and also to graduate school programmes in economic development technology management as well as in international business

Environment and Sustainable Development 2021-11-29

the food and agriculture organization fao hosted an expert consultation on genetically modified organisms in crop production and their effects on the environment

methodologies for monitoring and the way ahead from 18 to 20 January in Rome the main objective of the consultation was to review the scientific basis for and procedures to establish effective post release monitoring of genetically modified GM crops and develop guidelines to strengthen member countries capacities to design and carry out monitoring programmes the consultation was a follow up to the earlier FAO expert consultation on environmental effects of genetically modified crops which had recommended the environmental effects of GM crops be assessed on a case by case basis and emphasized the need to monitor possible medium to long term environmental impacts the main outputs of the meeting were a review of the scientific criteria and procedures strategies that could form the basis of efficient monitoring programmes recommendations for both scientists managing the monitoring process and policy makers

The Oxford Handbook of Environmental Ethics 2017

this book offers insight into the relationship between prehistoric and protohistoric human populations and the world around them it reconstructs key aspects of the palaeoenvironment from large scale drivers of environmental conditions such as climate to more regional variables such as vegetation cover and faunal communities the volume underscores how computational archaeology is leading the way in the study of past human environment interactions across spatial and chronological scales with the

increased availability of high resolution climate models agent based modelling palaeoecological proxies and the mature use of geographic information system in ecological modelling archaeologists working in interdisciplinary settings are well positioned to explore the intersection of human systems and environmental affordances and constraints these methodological advancements provide a better understanding of the role humans played in past ecosystems both in terms of their impact upon the environment and in return the impact of environmental conditions on human systems they may also allow us to infer past ecological knowledge and land use patterns that are historically contingent rather than environmentally determined this volume gathers contributions that combine reconstructions of past environments and archeological data with a view to exploring their complex interactions at different scales and invites scholars from varying disciplines and backgrounds to present and compare different modelling approaches

Environment and Industry in Developing Countries 2007-01-01

there is persuasive evidence suggesting we are on the brink of human induced ecological disaster that could change life on earth as we know it there is also a general consensus among scientists about the pace and extent of global ecological decay including a realisation that humans are central to causing the global socio ecological crisis this new epoch has been called the anthropocene considering the

many benefits that constitutional environmental protection holds out in domestic legal orders it is likely that a constitutionalised form of global environmental law and governance would be better able to counter the myriad exigencies of the anthropocene this book seeks to answer this central question from the perspective of the anthropocene what is environmental constitutionalism and how could it be extrapolated to formulate a global framework in answering this question this book offers the first systematic conceptual framework for global environmental constitutionalism in the epoch of the anthropocene
