selected papers from the world engineering education forum global engineering deans council held in november 2016 in seoul korea the massive changes currently underway in all areas of society especially in engineering and consequently in engineering education call for new pedagogic qualifications and approaches to face these current real world challenges higher education has to find innovative ways to quickly respond to these new needs the papers gathered here address three essential problems the main approach to engineering in the 21st century is collaboration at many levels within universities or colleges between institutions and on a global scale at the same time we need a new quality of collaboration between academia industry professional and governmental organizations the complexity of engineering projects and solutions is rapidly growing and increasingly includes non technical aspects one of the key tasks for future engineers will be the development of a sustainable society which is essential to keeping the global environment in balance announcements for the following year included in some vols this book constitutes the refereed proceedings of the 10th ifip wg 11 8 world conference on security education wise 10 held in rome italy in may 2017 the 14 revised papers presented were carefully reviewed and selected from 31 submissions they represent a cross section of applicable research as well as case studies in security education and are organized in the following topical sections information security education teaching information security information security awareness and culture and training information security professionals this volume works towards overcoming the lack of systematic impact evaluation in higher education particularly analyses which are not restricted to ex post gathered data and expert assessments since higher education is more important than ever in knowledge societies high priority should be ascribed to quality management qm in higher education institutions heis consequently impact evaluation of qm effectiveness is indispensable because it generates the knowledge required for quality management improvement the introductory chapter elucidates the motivation and objective of impact analyses of qm in heis and provides an overview of the volume s other contributions one chapter reflects on success factors and un intended effects of qm while another one analyses more discursive ways of evidence informed guidance of qm policies which are complementary to rigorous impact studies five chapters investigate qm effectiveness in heis by ex post and simultaneous impact evaluation in european case studies including assessments of students teachers quality managers and institutional leadership the case studies comprise universities from germany spain finland and romania the final chapter reports a swot analysis of impact evaluation of qm in heis which is suggested as a tool for bridging the notorious gap between the demanding methodology of impact evaluation and its proper implementation this book was originally published as a special issue of the european journal of higher education a new framework for understanding the underpinnings of real estate property value and the role it plays in the larger economy value in a changing built environment examines the professional foundations on which the valuation exercise and the valuation profession rest written by noted experts in the field the book addresses the often limited understanding of the concept of property value by explaining the intrinsic linkages between economic environmental social and cultural measures and components of property value the book offers a framework that paves the way towards a more holistic approach to property value value in a changing built environment unwraps many of the traditional assumptions that have underpinned market participants decision making over the last few decades the authors explore the concept that a blindfold application of valuation theories and approaches adopted from finance is unlikely to be able to cope with the nature of property as an economic and public good this vital resource explains the criteria for making estimates of value that can be applied worldwide offers an integrated approach to property value and the valuation processes captures the often illusive intangibles such as environmental performance into valuation addresses a market failure to account for wider criteria on building performance value in a changing built environment examines how real estate valuation plays a pivotal role in decision making and how can a new body of knowledge improve the practice in both business and social domains yaron harel has constructed a dramatic story of how eleven chief rabbis all became the subject of controversy and were subsequently dismissed this took place against a background of crime and licentiousness
