rebellion insurgency civil war conflict within a society is customarily treated as a matter of domestic politics and analysts generally focus their attention on local causes yet fighting between governments and opposition groups is rarely confined to the domestic arena internal wars often spill across national boundaries rebel organizations frequently find sanctuaries in neighboring countries and insurgencies give rise to disputes between states in rebels without borders which will appeal to students of international and civil war and

those developing policies to contain the regional diffusion of conflict idean salehyan examines transnational rebel organizations in civil conflicts utilizing cross national datasets as well as in depth case studies he shows how external contra bases in honduras and costa rica facilitated the nicaraguan civil war and how the rwandan civil war spilled over into the democratic republic of the congo fostering a regional war he also looks at other cross border insurgencies such as those of the kurdish pkk and taliban fighters in pakistan salehyan reveals that external sanctuaries feature in the political history of more than half of the world s armed insurgencies since 1945 and are also important in fostering state to state conflicts rebels who are unable to challenge the state on its own turf look for mobilization opportunities abroad neighboring states that are too weak to prevent rebel access states that wish to foster instability in their rivals and large refugee diasporas provide important opportunities for insurgent groups to establish external bases such sanctuaries complicate intelligence gathering counterinsurgency operations and efforts at peacemaking states that host rebels intrude into negotiations between governments and opposition movements and can block progress toward peace when they pursue their own agendas

if an innocent person is sent to prison or if a killer walks free we are outraged the legal system assures us and we expect and demand that it will seek to do justice in criminal cases so why for some cases does the criminal law deliberately and routinely sacrifice justice in this unflinching look at american criminal law paul robinson and michael cahill demonstrate that cases with unjust outcomes are not always irregular or unpredictable rather the criminal law sometimes chooses not to give defendants what they deserve that is unsatisfying results occur even when the system works as it is designed to work the authors find that while some justice sacrificing doctrines serve their intended purpose many others do not or could be replaced by other better rules that would serve the purpose without abandoning a just result with a panoramic view of the overlapping and often competing goals that our legal institutions must balance on a daily basis law without justice challenges us to restore justice to the criminal justice system

what is the historical appeal of football how diverse are its players supporters and institutions throughout the world what are its various traditions and how are these affected by pressures to modernize in what ways does the game help to reinforce or overcome social differences and prejudices how can we understand football s subcultures especially football hooligan ones the 1994 world cup finals in the united states have again demonstrated the conflicts which exist around football over its international future the multi media age beckons new audiences for top level matches but worries remain that the historical and cultural appeal of football itself may be the real loser the global game has a breadth of skills playing techniques supporting styles and ruling bodies these are all subject to local and national traditions of team play and fan display modern commercial influences and

international cultural links through players and fan styles are accommodated within the game to an increasing extent yet football s ability to differentiate remains at local regional national and even continental levels in some cases the game s traditions ensure that these differences are becoming as oppositional today as is modern football hooliganism but the overall picture is one of a game without frontiers rich in historical and cultural detail pluralistic in its traditions and identities this volume brings together essays by leading academics and researchers writing on world football their studies draw on interdisciplinary researches in england scotland france italy germany austria argentina and australia the book will be of interest to students of sports science cultural studies and social science and to all those who simply enjoy football as the world s greatest sporting passion

the early history of british aerial defence development is one of misdirection and delusion the misdirection judging by the criteria of successful aerial defence in world war ii was primarily in the downgrading of home defence measures including the fighter plane the delusion again judging by britain s efforts in that second world war was primarily in the

assumption of the effects to be obtained by strategic bombing in both cases the first world war was a major catalyst although events and writings before that war indicate the coming patterns it was during that war that a great amount of the patterns are well established originally published in 1976 this work explores these origins and stresses the interaction between various diverse segments of english society in the formation of the major patterns the working out of these patterns in the first half of the interwar years is also analysed again with respect to diverse groupings in britain

without destroying ourselves is an intellectual history of native activism seeking greater access to and control of higher education in the twentieth century john a goodwin traces themes of henry roe cloud s ho chunk vision for native intellectual leadership and empowerment in the early 1900s to the later missions of tribal colleges and universities tcus and education based self determination movements of the 1960s onward vital to cloud s work was the idea of how to build from native identity and adapt without destroying that identity as the central themes of the movement for native control in higher education

developed over the course of several decades a variety of native activists carried cloud s vision forward goodwin explores how elizabeth bender cloud ojibwe d arcy mcnickle salish kootenai jack forbes powhatan renapé delaware lenape and others built on and contributed to this common thread of native intellectual activism goodwin demonstrates that native activism for self determination was never snuffed out by the swing of the federal government s pendulum away from tribal governance and toward termination moreover efforts for native control in education remained a vital aspect of that activism without destroying ourselves documents this period through the full accreditation of tcus in the late 1970s and reinforces tcus continuing relevance in confronting the unique needs and challenges of native communities today

this sophisticated book by internationally renowned theorist zaki laidl tackles the problem of individual identity in a rapidly changing global political environment he argues that it is increasingly hard to find meaning in our ever expanding world especially after the collapse of political ideologies such as communism with the breakup of countries such as the former

yugoslavia it is clear that people are now looking to old models like nationalism and ethnicity to help them forge an identity but how effective are these old certainties in a globalized world in a permanent state of flux

silver winner of the 2008 foreword magazine book of the year award religion category before he began his recent travels it seemed to phil zuckerman as if humans all over the globe were getting religion praising deities performing holy rites and soberly defending the world from sin but most residents of denmark and sweden he found don t worship any god at all don t pray and don t give much credence to religious dogma of any kind instead of being bastions of sin and corruption however as the christian right has suggested a godless society would be these countries are filled with residents who score at the very top of the happiness index and enjoy their healthy societies which boast some of the lowest rates of violent crime in the world along with some of the lowest levels of corruption excellent educational systems strong economies well supported arts free health care egalitarian social policies outstanding bike paths and great beer zuckerman formally interviewed nearly 150 danes and swedes of all ages and educational backgrounds over the course of fourteen

months he was particularly interested in the worldviews of people who live their lives without religious orientation how do they think about and cope with death are they worried about an afterlife what he found is that nearly all of his interviewees live their lives without much fear of the grim reaper or worries about the hereafter this led him to wonder how and why it is that certain societies are non religious in a world that seems to be marked by increasing religiosity drawing on prominent sociological theories and his own extensive research zuckerman ventures some interesting answers this fascinating approach directly counters the claims of outspoken conservative american christians who argue that a society without god would be hell on earth it is crucial zuckerman believes for americans to know that society without god is not only possible but it can be quite civil and pleasant

production for family consumption and for the wider market while the importance of women s domestic labor has been generally recognized the complex articulation between household activities and the changing nature of the economy has rarely been examined in greater depth than in this volume the authors explore theoretically and empirically the relationships between household labor wage levels markets economic change and the status of women in

the context of both first and third world countries in the process narrowly defined debates are expanded suggesting ways in which our understanding of domestic activities is relevant to studies of petty commodity production and vice versa

Vital Statistics of the United States

first published in september 1992 the book traces the nature and development of the fundamental legal relationships among slaves masters and third parties it shows how the colonial and antebellum southern judges and legislators accommodated slavery s social relationships into the common law and how slave law evolved in different states over time in response to social political economic and intellectual developments the book states that the law of slavery in the us south treated slaves both as people and property it reconciles this apparent contradiction by demonstrating that slaves were defined in the law as items of human property without any legal rights when the lawmakers recognized slaves as people they burdened slaves with added legal duties and disabilities this epitomized in legal terms slavery s oppressive social relationships the book also illustrates how cases in which the lawmakers recognized slaves as people legitimized slavery s inhumanity references in the law to the legal humanity of people held as slaves are shown to be rhetorical devices and

cruel ironies that regulated the relative rights of the slaves owners and other free people that were embodied in people held as slaves thus it is argued that it never makes sense to think of slave legal rights this was so even when the lawmakers regulated the individual masters rights to treat their slaves as they wished these regulations advanced policies that the lawmakers perceived to be in the public interest within the context of a slave society
