An Analysis of Religious Belief 1877 comprising more than twelve million people and renowned for their resistance to brahminical values the virasaivas are a vibrant and unorthodox religious community with a provocative socio political voice the virasaiva tradition has produced a vast and original body of literature composed mostly in kannada a dravidian language from south india siva's saints introduces a previously unexplored and central primary work produced in the early thirteenth century the ragalegalu this was the first narrative text written about the incipient devotional tradition dedicated to the god siva in the kannada speaking regions through stories of the saints it images the life of this new religious community the ragalegalu inaugurated a new era in the production of devotional narratives accessible to wide audiences gil ben herut challenges common notions about this tradition in its nascent phases by closely reading the saints stories in this text siva's saints takes a more nuanced historical view than commonly held notions about the egalitarian and iconoclastic nature of the early tradition arguing instead that early bhakti devotionalism in the kannada speaking region was less radical and more accommodating toward traditional religious social and political institutions than thought of today in contrast to the narrowly sectarian and exclusionary vision that shapes later accounts the ragalegalu is characterized by an opposite impulse of offering an open invitation to people from all walks of life and their stories illustrate the richness of their devotional lives analysis of this seminal text yields important insights into the role of literary representation of the social and political development of a religious community in a pre modern and non western milieu

An Analysis of Religious Belief 2023-10-05 over the past three decades there has been a dramatic increase in theoretical and practical studies on insect natural enemies the appeal of insect predators and parasitoids in particular as research animals derives from the relative ease with which many species may be cultured and experimented with in the laboratory the simple life cycles of most parasitoids and the increasing demand for biological pest control there is now a massive literature on insect natural enemies so there is a great need for a general text that the enquiring student or research worker can use in deciding on approaches and techniques that are appropriate to the study and evaluation of such insects this book fulfils that demand a considerably updated and expanded version of a previous best seller it is an account of major aspects of the biology of predators and parasitoids punctuated with information and advice on which experiments or observations to conduct and how to carry them out guidance is provided where necessary on the literature that may need to be consulted on particular topics while researchers can now refer to several books on parasitoids and predators insects as natural enemies is unique in emphasising practicalities it is aimed at students and professional working in universities and both government and commercial institutes in the fields of pest management agriculture horticulture and forestry

Image Analysis for Moving Organ, Breast, and Thoracic Images 2018-09-11 saivism is one of the pervasive expressions of indian religious culture stretching to the dim past of pre history and surviving as a living force in the thought and life of millions of hindus especially in southern india and northern ceylon the present work is scholarly reconstruction of saivism in its characteristic and classical form as saiva siddhanta focusing mainly on the philosophical doctrine and presenting a conceptual analysis of its formative notions problems and methods anteceding the rise of the great systems of vedanta including that of sankara saiva siddhanta in its fully systematised form as mystical theology in the thirteenth and fourteenth centuries represents a constructive reaction to the theological ethical and aesthetic aspects of vedanta as a whole a patient study of this much neglected phase of religio philosophical development of india should prove useful for a more balanced understanding of indian religiosity providing a corrective to the view entertained not without justification that indian religious thought does not affirm the values of freedom love and personality this methodical study appended with very exhaustive glossary bibliography and index and two hundred pages of references and foot notes is designed to meet the requirements of serious students of eastern religious thought

Digital Image Processing and Analysis 2017-11-30 many static and behavior based malware detection methods have been developed to address malware and other cyber threats even though these cybersecurity systems offer good outcomes in a large dataset they lack reliability and robustness in terms of detection there is a critical need for relevant research on enhancing ai based cybersecurity solutions such as malware detection and malicious behavior identification malware analysis and intrusion detection in cyber physical systems focuses on dynamic malware analysis and its time sequence output of observed activity including advanced machine learning and ai based malware detection and categorization tasks in real time covering topics such as intrusion detection systems low cost manufacturing and surveillance robots this premier reference source is essential for cyber security professionals computer scientists students and educators of higher education researchers and academicians

Building Customer-brand Relationships 2015-01-28 in this dissertation novel content based microscopic image analysis cbmia methods including weakly supervised learning wsl are proposed to aid biological studies in a cbmia task noisy image image rotation and object recognition problems need to be addressed to this end the first approach is a general supervised learning method which consists of image segmentation shape feature extraction classification and feature fusion leading to a semi automatic approach in contrast the second approach is a wsl method which contains sparse coding sc feature extraction classification and feature fusion leading to a full automatic approach in this wsl approach the problems of noisy image and object recognition are jointly resolved by a region based classifier and the image rotation problem is figured out through sc features to demonstrate the usefulness and potential of the proposed methods experiments are implemented on different practical biological tasks including environmental microorganism classification stem cell analysis and insect tracking

Social Analysis 1996 annotation heroic mothers defending home and hearth against a nature deformed by multinationalist corporate practice this may be a compelling story but it is not necessarily the source of valid feminist or ecological critique what's missing is the democratic element an insistence on bringing to public debate all the relations of gender and nature that such a view takes for granted this book aims to situate a commitment to theory and politics that is to democratic practice at the center of ecofeminism and thus to move toward an ecofeminism that is truly both feminist and ecological the good natured feminist inaugurates a sustained conversation between ecofeminism and recent writings in feminist postmodernism and radical democracy starting with the assumption that ecofeminism is a body of democratic theory the book tells how the movement originated in debates about nature in north american radical feminisms how it then became entangled with identity politics and how it now seeks to include nature in democratic conversation and especially to

politicize relations between gender and nature in both theoretical and activist milieus
