at last a book that has what every atmospheric science and meteorology student should know about satellite meteorology the orbits of satellites the instruments they carry the radiation they detect and most importantly the fundamental atmospheric data that can be retrieved from their observations key features of special interest are sections on remote sensing of atmospheric temperature trace gases winds cloud and aerosol data precipitation and radiation budget satellite image interpretation satellite orbits and navigation radiative transfer fundamentals

Energy Research Abstracts

1963

the authors leading representatives of russian space research and industry show the results and future prospects of astronautics at the start of the third millennium the focus is on the development of astronautics in russia in the new historical and economic conditions the text spotlights the basic trends in space related issues before moving on to describe the possibilities of the wide use of space technologies and its numerous applications such as navigation and communication space manufacturing and space biotechnology the book contains a large amount of facts described in a way understandable without specialist knowledge the text is accompanied by many photographs charts and diagrams mostly in color

Technical Abstract Bulletin

2018-07-27

the joint nasa esa cassini huygens mission to saturn is the most ambitious planetary mission since the vega mission to venus and halley in 1985 86 and the viking arbiters and landers to mars in 1976 this volume describes the mission the orbiter spacecraft the titan atmospheric probe and the mission design in articles written by its project scientists and engineering team these are followed by five articles from each of the discipline working groups discussing the existing knowledge of the saturnian system and their goals for the mission finally each of the huygens entry probe instrument teams describes their instruments and measurement objectives these instruments include an atmospheric structure instrument an aerosol pyrolyser an imager radiometer a gas chromatograph a surface science package and a radio science investigation this book is of interest to all potential users of the cassini huygens data to those who wish to learn about the planned scientific return from the cassini huygens mission and those curious about the processes occurring on this most fascinating planet
