

Free pdf Neonatal resuscitation guidelines (Read Only)

globally about one quarter of all neonatal deaths are caused by birth asphyxia in this document birth asphyxia is defined simply as the failure to initiate and sustain breathing at birth effective resuscitation at birth can prevent a large proportion of these deaths the need for clinical guidelines on basic newborn resuscitation suitable for settings with limited resources is universally recognized who had responded to this need by developing guidelines for this purpose that are contained in the document basic newborn resuscitation a practical guide as this document is over a decade old a process to update the guidelines on basic newborn resuscitation was initiated in 2009 the objective of these updated who guidelines is to ensure that newborns in resource limited settings who require resuscitation are effectively resuscitated these guidelines will inform who training and reference materials such as pregnancy childbirth postpartum and newborn care a guide for essential practice essential newborn care course managing newborn problems a guide for doctors nurses and midwives and pocket book of hospital care for children guidelines for the management of common illnesses with limited resources these guidelines will assist programme managers responsible for implementing maternal and child health programmes to develop or adapt national or local guidelines standards and training materials on newborn care the who technical specifications for neonatal resuscitation devices were developed based on existing international standards evidence based publications from reliable sources and field expert experience for equipment without prior technical specifications recommendations were made based on a literature research depending on quality and significance of evidence the purpose of who technical specifications for neonatal resuscitation devices is to provide a minimum standard baseline to meet the increasing demand to procure good quality affordable accessible and appropriate neonatal resuscitation devices the specifications are intended to support policy makers managers procurement officers manufacturers regulators and nongovernmental agencies especially in low and middle income countries to select procure use reprocess and decommission appropriate neonatal resuscitation equipment the end goal is to save the children particularly in low resource settings this book primarily based on nrp guidelines deals with intrauterine and natal physiology perinatal asphyxia and its management neonatal resuscitation resuscitation in the community organization of follow up services and pertinent legal issues concerning resuscitation in seven chapters with extensive references the book has been profusely illustrated with figures and tables for better understanding of the nrp guidelines the overall objective has been to provide a sound physiological and practical basis for neonatal resuscitation and follow up care intended for health care providers nurses tbas and other personnel involved in newborn care the guest editors have assembled well published authors to present state of the art clinical reviews devoted to resuscitation of the newborn and fetus articles are devoted to the following topics fetal intrauterine compromise cellular biology of end organ injury and strategies to prevent end organ injury role of oxygen in the dr dr management of meconium stained infant role of medications in neonatal resuscitation delayed cord clamping post resuscitation management hie and novel strategies for neuroprotection physiology of transition from intrauterine to extrauterine life resuscitation of preterm infants special considerations chest compressions and dysrhythmias in neonates resuscitation of infants with prenatally diagnosed anomalies ethical issues in neonatal resuscitation training programs in neonatal resuscitation the neonatal resuscitation program and helping babies breathe and future of neonatal resuscitation new 7th edition powerful resource for interactive simulation based teaching and learning the neonatal resuscitation program nrp is an educational program jointly sponsored by the american academy of pediatrics aap and the american heart association aha the course is designed to teach an evidence based approach to resuscitation of the newborn to hospital staff who care for newborns at the time of delivery new in the 7th edition text updated to reflect the 2015 aap aha guidelines for cardiopulmonary resuscitation and emergency cardiovascular care of the neonate two new chapters added covering post resuscitation care and preparing for resuscitation 140 new full color photographs replacing most line drawings the extensively revised and updated 6th edition of the neonatal resuscitation program nrp textbook is designed in accord with the program s curriculum changes and sharpened focus on active hands on learning the text facilitates the newly recommended self paced learning approach self study is optimized to help students prepare for the mandatory online examination that replaces the traditional written test it also complements the simulations and case based scearios at the heart of the new nrp content updates throughout the text reflect the 2010 american academy of pediatrics aap american heart association guidelines for neonatal resuscitation must know new material includes the latest recommendations across key areas of change including revisions in the nrp flow diagram elimination of evaluation of amniotic fluid in initial rapid assessment use of supplemental oxygen during neonatal resuscitation use of pulse oximetry chest compression procedures new 8th edition innovative resource for interactive simulation based teaching and learning the neonatal resuscitation program nrp is an educational program jointly sponsored by the american academy of pediatrics aap and the american heart association aha the course is designed to teach an evidence based approach to resuscitation of the newborn to health care professionals who care for newborns at the time of delivery nrp essentials and nrp advanced the nrp 8th edition introduces a new educational methodology to better meet the needs of health care professionals who manage the newly born baby new in the 8th edition key points at the beginning of each lesson quick response qr codes that enable the reader to view short videos about the topics on their mobile device lesson review questions grouped together at the end of each lesson quality improvement opportunities and frequently asked questions in each lesson new sections in lesson 10 special considerations about resuscitation of the newborn with a myelomeningocele or an abdominal wall defect three supplemental lessons improving resuscitation team performance resuscitation outside the delivery room and bringing quality improvement to your resuscitation team that allow nrp users to enhance their resuscitation knowledge and performance the neonatal resuscitation program nrp is an educational program jointly sponsored by the american academy of pediatrics aap and the american heart association aha this updated edition reflects the 2015 aap aha guidelines for cardiopulmonary resuscitation and emergency cardiovascular care of the neonate full color cd includes full text plus dramatic footage of actual resuscitation events laryngoscopic view of the airway digitized animation review questions and learner directed interactive video scenarios this edition of the manual of neonatal care has been completely updated and extensively revised to reflect the changes in fetal perinatal and neonatal care that have occurred since the sixth edition this portable text covers current and practical approaches to evaluation and management of conditions encountered in the fetus and the newborn as practiced in high volume clinical services that include contemporary prenatal and postnatal care of infants with design testing and optimization

medical and surgical problems written by expert authors from the harvard program in neonatology and other major neonatology programs across the united states the manual s outline format gives readers rapid access to large amounts of valuable information quickly the children s hospital boston neonatology program at harvard has grown to include 57 attending neonatologists and 18 fellows who care for more than 28 000 newborns delivered annually the book also includes the popular appendices on topics such as common nicu medication guidelines the effects of maternal drugs on the fetus and the use of maternal medications during lactation plus there are intubation sedation guidelines and a guide to neonatal resuscitation on the inside covers that provide crucial information in a quick and easy format covering the management of critically ill newborns from the first minute of life through the first 72 hours this practical evidence based and clinically informed guide will provide all members of the pediatric care team with the essential information to save lives and prevent disability with chapters on neonatal transport resuscitation ventilation and ethical issues the content is further illustrated with case studies illustrating the real world aspects of identifying critical signs and symptoms diagnostics and treatment in multiple settings as well as including numerous clear diagrams and summary tables the text includes algorithms based on international guidelines to help navigate the reader through the delivery of care and a comprehensive listing of drugs and dosages serving as a quick reference guide when making treatment decisions this is essential reading for pediatric residents fellows and junior faculty neonatal intensive care nurses paramedics obstetricians midwives anesthesiologists and emergency medicine physicians the united nations commission on life saving commodities unclsc 2012 defined 13 health products to end preventable deaths of woman and children one of those 13 products is the neonatal resuscitator is indispensable medical device to save newborns from asphyxia at birth for the efficient use of neonatal resuscitation training of healthcare professionals using neonatal resuscitation manikins is the most effective approach critical lifesaving trainings calls for the need of neonatal resuscitation manikins with the right features the purpose of the who neonatal resuscitation manikin technical specifications is to provide a minimum standard baseline to meet the increasing demand to procure good quality affordable accessible and appropriate neonatal resuscitation manikins towards the development of this baseline this document includes compilation of available scientific evidence from technical literature international publications expert reviews and an industry survey which was conducted by who medical devices team covering the management of critically ill newborns from the first minute of life through the first 72 hours this practical evidence based and clinically informed guide will provide all members of the pediatric care team with the essential information to save lives and prevent disability with chapters on neonatal transport resuscitation ventilation and ethical issues the content is further illustrated with case studies illustrating the real world aspects of identifying critical signs and symptoms diagnostics and treatment in multiple settings as well as including numerous clear diagrams and summary tables the text includes algorithms based on international guidelines to help navigate the reader through the delivery of care and a comprehensive listing of drugs and dosages serving as a quick reference guide when making treatment decisions this is essential reading for pediatric residents fellows and junior faculty neonatal intensive care nurses paramedics obstetricians midwives anesthesiologists and emergency medicine physicians ebl quick one stop guide to neonatal resuscitation steps forms and charts size 4 x 6 this international bestselling book on acute paediatric care is the coursebook for the advanced life support group s advanced paediatric life support apls it uses their practical approach a tried and tested method of treating children during the crucial first few hours of a life threatening condition this edition has been adapted specifically for use in australia and new zealand with the latest procedures medications and clinical best practice to match the guidelines of the australia and new zealand resuscitation councils advanced paediatric life support is used in emergency and paediatric departments by physicians nurses and allied health professionals and its clear layout and straightforward style make it a highly practical tool both for training and in the event of an emergency the fifth edition includes major new features bringing it right up to date including the latest international liaison committee on resuscitation ilcor 2010 guidelines a new and improved design including full colour photographs and diagrams fully adapted for use in australia and new zealand new sections for australasian specific practice including envenomation burns triage neonatal resuscitation and formulary with this book at hand paediatric and emergency staff can be confident in having comprehensive and authoritative guidance on the first principles of recognising life threatening conditions through to all the procedures necessary to save a child s life the extensively revised and updated 6th edition of the neonatal resuscitation program nrp textbook and accompanying dvd rom are designed in accord with the program s curriculum changes and sharpened focus on active hands on learning the text facilitates the newly recommended self paced learning approach self study is optimized to help students prepare for the mandatory online examination that replaces the traditional written test it also complements the simulations and case based scearios at the heart of the new nrp content updates throughout the text and dvd rom reflect the 2010 american academy of pediatrics aap american heart association guidelines for neonatal resuscitation must know new material includes the latest recommendations across key areas of change including revisions in the nrp flow diagram elimination of evaluation of amniotic fluid in initial rapid assessment use of supplemental oxygen during neonatal resuscitation use of pulse oximetry chest compression procedures the book includes a companion dvd rom for use on both pc and mac bringing a higher level of interactivity to the learning process active learning features on the dvd include multi decision point scenarios and randomly generated clinical problems and outcomes page 4 of cover this concise book covers all aspects of neonatal resuscitation from the moment of birth to transfer to the neonatal unit it discusses special considerations and communication with parents and other professionals the advice has been drawn up by a working party giving it the authority of a distinguished body of specialists the guest editors have assembled well published authors to present state of the art clinical reviews devoted to resuscitation of the newborn and fetus articles are devoted to the following topics fetal intrauterine compromise cellular biology of end organ injury and strategies to prevent end organ injury role of oxygen in the dr dr management of meconium stained infant role of medications in neonatal resuscitation delayed cord clamping post resuscitation management hie and novel strategies for neuroprotection physiology of transition from intrauterine to extrauterine life resuscitation of preterm infants special considerations chest compressions and dysrhythmias in neonates resuscitation of infants with prenatally diagnosed anomalies ethical issues in neonatal resuscitation training programs in neonatal resuscitation the neonatal resuscitation program and helping babies breathe and future of neonatal resuscitation

care professionals who care for newborns at the time of delivery since publication of the first edition in 2015 neonatal anesthesia and surgery have advanced at lightning speed with many new developments hence the need to update several essential topics these include our understanding of neonatal apoptosis the ever increasing use of regional anesthesia in neonates pharmacology of drugs in neonates the delivery of anesthesia outside the operating room neonatal resuscitation guidelines and perinatal complexities such as the exit procedure together with the fundamental principles of developmental physiology airway management and ventilation as well as perioperative complications and ethical considerations that are unique to this age group this comprehensive and well illustrated book is led by dr jerrold lerman who brings four decades of research publication and clinical experience in pediatric and neonatal anesthesia he has amassed a team of recognized international experts in neonatal anesthesia surgery and intensive care to share their knowledge in managing neonates for the challenges they face both within and without the surgical suites neonatal anesthesia the 2nd edition is the quintessential clinical reference for perioperative care of these small patients that should be read by trainees as well as experienced clinicians and is certain to become an invaluable resource for every anesthetic and critical care department that serves children containing the american heart association s emergency cardiovascular guidelines this edition includes the various techniques and protocols from the 2000 guidelines it also features tools to enhance both teaching and learning including a cd rom and offers knowledge for those professionals who care for newborns content developed by awhonn one of the most authoritative associations in neonatal intensive care nursing ensures the information is both accurate and relevant concise outline format provides access to important nursing considerations associated with the management of the most common conditions in the neonate full scope coverage of neonatal nursing practice provides information on families ethics legal issues research case management the transition to home and more focus on evidence based practice related to preterm infants medications and antepartum intrapartum complications sets the standard for neonatal nursing practice strategies to promote inclusionary care better reflect today s nursing care today with a focus on family centered care comprehensive perinatal records health care teams in the nicu and infant care best practices new expanded information on breastfeeding and acquired opioid dependency keep you informed with the latest best practices related to these two everchanging areas new updated neonatal resuscitation guidelines ensures you follow the most up to date protocols and procedures in this critical skill area new additional tables and boxes help you quickly find important information the s t a b l e program is a neonatal education program that focuses on the post resuscitation pre transport stabilization care of sick newborns s t a b l e stands for the 6 assessment parameters covered in the program sugar temperature airway blood pressure lab work and emotional support for the family the s t a b l e program is designed to provide important information about neonatal stabilization for maternal infant healthcare providers in all settings from community hospitals and birth centers to emergency rooms and hospital environments quick one stop guide to neonatal resuscitation nrp steps great take along for students in training size 4 x 6 introductory section in the beginning of the manual provides detailed background information about the s t a b l e program testing course renewal and instructor classifications and qualifications case vignettes introduce each module and several case studies are provided for discussion s t a b l e stands for the 6 assessment parameters covered in the program sugar temperature airway blood pressure lab work and emotional support for the family reflect new course content and instructor tips developed by the leading experts in neonatal simulation this innovative new resource delivers neonatology health care providers and educators essential guidance on designing developing and implementing simulation based neonatal education programs the early chapters cover learning theory fundamentals of scenario design and simulation and the neonatal resuscitation program the later chapters cover specific applications of simulation in neonatology and debriefing techniques the book walks the reader through scenario design mannequins and task trainers moulage simulation techniques virtual simulations mannequin adaptations needed to conduct specific simulation procedures debriefing methods and more step by step images walk the reader through adapting mannequins to simulate procedures and how to replicate body fluids and conditions commonly encountered in newborns with 225 color images as well as plenty of helpful boxes and tables throughout the book will be useful to both novice and expert more than 30 chapters include in situ simulation simulation and the neonatal resuscitation program mannequins and task trainers boot camps debriefing in simulation based training simulation operations and more product 15 2100jp
